In Addition to Tradition...
"To the readers of the Bugle, the editors and managers extend a most hearty greeting in presenting the first volume. We have labored hard to produce a book that would be of interest, and that would reflect credit on the College and Corps of Cadets it endeavors to represent. In consideration of the fact that it is the first volume and of the consequent lack of a sufficient guide in compiling it, we ask that you be mild in your criticisms and make allowances for our frailties." --Editors and Managers 1895

Well here we are. 100 years later. It's hard to believe how quickly time passed. This year we take time out to celebrate the traditions and continued excellence that students have put forth to make The Bugle what it is today. Since the first editor and staff, to this year, countless hours, money and effort have gone into making this yearbook.

The first Bugle was published in 1895 by the senior Corps class. It was sold for $1.50 with postage being an extra 25 cents and now with the increase in inflation, our dreaded publishing bill, and infinite expenses the cost has risen gradually to $37 with postage being an extra $5.

Furthermore, the first edition contained less than 100 pages and was only around 8 x 9 inches in size, while today’s yearbook contained 464 pages and was 9 x 12 in

Continued on page 5
Opening
Continued from page 2

The Bugle has undergone many editorial changes as well. The first editions consisted of poems, short stories, class histories, and riddles. The later editions started to divide The Bugle into sections of faculty, students, organizations and sports. This type of division has evolved into what The Bugle is today.

In addition to editorial changes, the staff has also evolved through time. When women were first admitted to Virginia Tech in 1921 they were not allowed to be in the yearbook or be

on the staff. So to make up for this the
women published their own book called The
Tin Horn from 1927-1929 and from 1930-1931.
However, it is ironic now since the modern
day Bugle staff is not only run by women, but
the majority of the staff is consistently
women.

But were not here to only
remember the past, but to fulfill
our purpose and that is to record
the present. So let’s not forget
what has happened during this
school year. The football team once
again excelled and received a bowl
bid to the Gator Bowl where they

unfortunately lost 43-27 to the Tennessee
Volunteers. Also two cadets, Timothy
Hayden and Mark Sherkey, continued to
show how the Corps carries on the traditions
for the university by designing the first
commemorative coin. However, we did
receive our share of problems as Gov. Allen
put a hiring freeze on all state agencies and
more budget cuts were made. In addition,
there was an increase in assaults on campus,
and the Tech Independent, Tech’s
second student newspaper, shut
down for the final time.

But through it all, our
tradition of excellence was seen in
everything we did this year whether
it be with The Bugle, sports,
academics or in our extracurricular
activities.
As we make our way through life, it’s hard to remember to take time out and “smell the roses.” After living in Blacksburg for at least four years, we have all walked down Main Street many times but who would have thought that Arnold’s used to be a hotel or that the campus entrance was at one time College Avenue? Looking at this picture of Main Street from 1942 it’s hard to believe how much has changed in only 50 years.
From Homecoming to fights making with roommates and from our searching for the rarely way available parking space to through graduation, we managed to life. make it through another year.
Uniqueness, Yes or No?

Throughout the history of Virginia Tech many interesting facts have come to be known. They are part of what makes our university different and unique from the thousands of other universities. A few are as follows:
- The university bookstore is in the shape of the state of Virginia.
- Davidson Hall is shaped like the periodic table.
- There is a Pea Picker on the top of Burruss Hall.
- The Dietrick Dining Hall serves more people in any one day than any other campus on the East Coast.
- Pritchard Hall is the largest marble room on the East Coast.
- Tech is one out of two universities to have the Corps in uniform all week, the other is Texas A&M.
- In 1996 Tech changed its colors from gray and black to burnt orange and Chicago maroon, because we looked like inmates in a prison.
- At first women had to publish their own yearbook, The Tin Horn.
- The first fight song "Play Ball" composed in 1916 was replaced by "Tech Triumph" in 1919.
- The Morrill-Land Grant Act of 1862, signed by Governor Walker, gave Tech the land to build the college.
One of our best everpresent traditions is our Corps of Cadets. Texas A&M is the only other university that has their cadets in uniform every day of the week.
What do cups, pizza boxes, paper airplanes, and fans have to do with each other? Students threw all of these in Lane Stadium, especially during the Homecoming game when everyone was psyched up. But the actual game was only one component of all the festivities.

Both alumni and students alike gathered in groups to party before the game. This ritual was sponsored by many groups on campus who often offered free food and drinks to those who came.

The Homecoming Game included the usual, with the nominations of the Homecoming Court and half-time entertainment. Kevin Ickes, sponsored by the German Club and the Corps of Cadet and Amy Bullock, sponsored by Alpha Delta Pi, were crowned Homecoming King and Queen. However, the cup wars and the hurling pizza boxes added to the entertainment during the game.

And of course there were the parties afterwards that lasted well into the night. Whether or not the Hokies won the game did not affect the intensity of these after-the-game parties. But this game had a spectacular outcome, with the Hokies beating Temple 41-13.

By: Jean Hou
The Hokie Bird definitely gets caught up in school spirit. This Virginia Tech mascot was seen along the sidelines starting the wave, and motioning for fans to participate in "key" plays.

During halftime, President Torgersen crowns the Homecoming King and Queen. After aggressive campaigning during spirit week, Kevin Ickes and Amy Bullock won.
A couple dance to the music, provided by the Electric Video Company, at the Homecoming Dance.
It was truly a night under the stars, with stars floating above and decorating the walls. Homecoming was a lot of fun because the music was pretty good...there was a variety of music and not just one kind,” said senior Aurora Fan. More then 350 students attended and danced 'till they dropped.

The Homecoming Dance, sponsored by the Virginia Tech Union, was created so students could have a semi-formal dance, even if they were not involved in a sorority or fraternity. Held the night of the Homecoming Game, students got dressed up, in outfits ranging from simple sundresses to formal gowns.

A veejay, from Electric Video Company, provided dance rhythms on three, ten foot video screens for the night. “It was successful this year, and we hope we will be able to bring in more people next year,” said senior Jenny Kinn, the Homecoming Chair.

By: Jean Hou

Singing along with the songs, sophomore Harriet McCadden Geology major and senior communications/LASc major Grant Corkey dance to the tunes all night long. Couples enjoyed dancing to the mix of songs.
"Oh come on, living with someone, sharing a room, it won't be that bad--or will it?" If you had one of two types of roommates then it wasn't that horrible. These types were those who you clicked with right off the bat and those who you could put up with. But then there was the worse kind of roommate ever, the one you dream of killing, the one you hate.

Once being forced to share a tiny 10" by 10" cubicle with someone you had never met before in your life, you realized what you had taken for granted for the first 18 years of your life: PRIVACY!

No longer could you walk around naked after a shower, or talk on the phone without having someone eavesdrop on your conversation. The days of being able to be loud whenever you want, and being able to sleep 'till noon without being woken up by a hairdryer or the TV being turned on, were over.

For some of us, it didn't turn out too bad. Sure there were the little fights, but nothing horrible. The little irritating habits, those that drove us absolutely crazy, were bearable, and the lucky ones found someone who they could depend on, a friend they missed over the long breaks.

Then there were those who hated their roommate with a passion. They did everything in their power to make each others lives miserable, such as changing the locks and attempting to try out their mace on their roommate. It was this kind of roommate who made life difficult. But no matter what kind of roommate you had, you still had to learn to compromise in order to survive.

By: Laura Shull

Just chillin': The warmth among these roommates is evident as Jen Kaiser, a comm. major strums her guitar and Pam Hewitt, a comm. major and Hayley Leinfelder, a horticulture major sit and relax.
"To get even to make her miserable I changed the locks, threw out her CD case which had fifteen CD's and her worms (she thinks she just misplaced it), I also changed the telephone password every week (she believes that she can't remember the code)."

-Freshman Business Major

Why I Outta...

Scenes like this could become common among roommates who didn't get along. Sometimes roommates would have pillow fights, food fights, or water fights in order to release aggression from homework or other stressful activities.
LOVE OR HATE

Relationships - a part of our lives

"I think my teacher must hate me!" "Can you believe my best friend told everyone?" "He asked me to go to the formal with him!" Everyone was involved in relationships, whether or not you wanted to be in one, you were - with your friends, teachers, family, or significant other. Though sometimes difficult and frustrating, not all relationships had their ups and downs. No matter what, "The basics of any relationship should be based on trust, commitment, and of course, love," said Melissa Jennings, a freshman in accounting.

By Jean Hou
No matter what kind of relationship you had: roommate, friend or significant other, it was never easy all of the time. There were times when you wanted to scream but there were also times when you couldn’t remember being so happy. Relationships not only had an effect on your feelings but they also helped you grow as a person: from the first relationship with your parents to the last one with your spouse or children. However, throughout it all, the relationships you held in college were some of the most important. Here, you most likely not only met your best friend for life but also the person you would most likely marry. And somewhere along the line you might have came to the realization that your parents were not as bad as you always thought they were.
No Place to Run

The National Crime Survey reported that approximately seven million Americans were victimized yearly by crimes of rape, armed robbery and assault. Taking this staggering statistic into mind, it was not hard to believe that the fear of violence seemed to occupy not only the media, but the minds of people everywhere.

And with the media throwing out stereotypes of women victims at us daily, we asked ourselves; were our fears real? Or imagined? The answers were phenomenal. Nationwide aggravated assault, murder, and rape were some of the most feared crimes, but these three types of assault were reported everyday not only in large cities but also in small cities, like Blacksburg.

For example, in the fall semester, a student was maliciously wounded while walking behind Cassell Coliseum. After the victim told the suspect to leave him alone, he was slashed with a knife in the arm. The suspect was not found.

The second reported knife attack occurred on Sept 17, when two students became victims of aggravated assault in the Cheatham Hall parking lot. According to the police, one of the suspects pulled out a knife and threatened the victims because he thought they tried to run him off the road. One of the victims was cut in the chest and upper arm by the knife and the other victim was knocked out.

However, the university was trying to help lessen the number of assaults occurring on campus. Emergency boxes were placed all over campus so students had a direct line to the campus police. Also, the Board of Visitors updated the university's sexual misconduct policy in hopes that the perpetrators would be prosecuted more easily due to the explicitness of the new addendum.

But that was not all that was done to help prevent these attacks. For example, students stood up and participated in the annual "Take Back the Night" rally and march that was held on campus in the spring. The rally encouraged everyone to take an active roll in changing society and making it safe to walk the streets alone. However, it is not enough for the administration and certain students to stand up against violence, it is time for each and everyone of us to take a stand before we are faced with a situation where we have no place to run and end up becoming another statistic.

By: Nancy Kayal
The band, Liquid Pleasure, played at the annual dance. They played all types of songs from the oldies to "Wild Thing."

Bringing in about 350 people, the German Club sponsored their annual Mid-Winter's Dance. "Originally held for Corps members only, Mid-Winter's eventually became a dance held for students and faculty of the university over the years," said German Club Vice-President Mark Pope.

The popular band Liquid Pleasure played for the night. Sini Downing enjoyed the night because the band was "really good. They played everything, from Tone Loc's 'Wild Thing' to a bunch of oldies. The dances were memorable and the German Club was ready and willing to teach all types of dances, like shagging and other dances like that."

By Jean Hou
The Mid-Winter's Dance was held in the Squires Commonwealth Ballroom. Students dance to the YMCA song.
One way students spent their money was on various pets. No matter if you lived on campus or off, students often found the expense of pets was worth it. Soo Waggoner takes a look at the mice for sale in the Hobby Shop.

Another expense that often added up for some students was the buying of current CDs. The cost of CDs ranged anywhere from $9 to $16 depending on where they were bought and if they were new or used.

What was green, thin, and once you acquired it seemed to disappear? You guessed it, MONEY! Besides the normal expense of tuition and books that we payed every year, there were always those extras that added up; the cost of supplies, entertainment, those dreaded parking tickets, etc.

As with every other school in the world we seemed to run out of money faster than we could make it. The old days were over when money and food were provided for by our parents. At the dining facilities the food got very tiresome, but cooking for ourselves took time, so when we were hungry, take out was the answer, which also meant money. If takeout didn’t suit us, then transportation was required to get to the stores or restaurants, which meant more money spent on gas plus the cost of the food.

Another item that took a vast amount of our limited money supply was a social life, which included alcohol, cover charges, movies or other entertainment.

The telephone was another money draining item. When loneliness hit, the long distance area codes were dialed. Minutes, then the hours would build up, and the price of the call rose steadily in return.

And what about those of us who owned a car? Just when it seemed like we had paid off our last parking ticket we get another one.

For many, these added expenses meant getting a job in order to afford them all. Because one thing was for sure, money did not grow on trees, instead it fell through every crack and crevice and what was left over was one poor college student.

-By Laura Shull
One of the most expensive expenses students could incur was that of groceries. Off-campus students spent an average anywhere from $60 to $140 a month in groceries. Nicole Popovich counts up how much she has spent so far to see if she has brought enough money.
Looking out over the Commuter Parking lot, it's no wonder commuters have a hard time to find parking spaces. It was true in this case that the early bird caught the worm.

In the Donaldson Brown Parking lot right outside Squires Student Center, students often parked there illegally because there were no other places to park.
The main problem used to be in convincing Mom and Dad that a car was necessary at Tech, or saving enough money to buy that ultimate dream car. Now the main problem was just as serious - finding a place to park before class.

According to Curtis Lynch of the Parking Services Department, 10,714 parking permits were sold throughout the year, while there were only 10,208 spaces available to commuters. However, there were ideas to alleviate the problem in the future. There were plans to build parking decks in the Shultz and Stanger parking lots. Places around campus were also being considered to be renovated into parking areas.

Because of lack of spaces, students tried to find spaces to park, even if it was illegal parking. Parking Services doled out around 55,000 violation tickets every year.

Mike Johnson, a senior in EE, takes time out to play SEGA, which has become a new crave for many students.

The eight ball in the right corner pocket. Students often found that the game of pool helped to relax them after a stressful day.

“Go Far,” “Go Wide,” “Good Catch!” were some of the sounds that were heard regularly on the drillfield. What is a game? According to the Websters Ninth New Collegiate Dictionary, a game is “activity engaged in for diversion or amusement.”

As most of us know, Tech was not strictly an academic school; there was always time for a little fun and games.

A typical scene when walking across the drillfield was seeing students playing a variety of games, including ultimate frisbee, soccer, football, etc.

Mother Nature also joined in and caused fun and laughter. Once the snow began to fall the gloves were put on and the snowball fights began. After the first snowfall hundreds of students crowded together in great masses all over campus to have snowball fights, build snowmen, or to sled down hills getting covered with snow.

When the weekend came the drinking games began. While not all students drank, these games were usually played with a group of friends while relaxing in an apartment or dorm. And, as the game proved, the longer they played, the drunker they got.

By: Laura Shull

Five card stud! Seniors Bill Curtin, Aaron Dereski, and James Gibney play a game of poker at home. Students sometimes chose to stay at home instead of going out to play in the snow.
These pictures depict a story of a college student finding out that she is pregnant and then looking through her options on what to do. Some of us may have faced this situation and it's hard to say what one will do. But no matter what one chooses to do, it doesn't leave you unmarked. However, it does not matter what is decided, it is always the right choice. People may not agree with your decision, but for now the decision is yours to make and only you can decide what's right for you.
Abortion - one of those taboo subjects that evokes feelings so strong sometimes families and friends are split apart.

But we are not here to say whether abortions are right or wrong; we are here to discuss the options for the woman and the feelings involved.

Finding out that one is pregnant can be a trauma in itself. Once confirmed a decision needs to be made. Options for the woman include keeping the baby, giving it away for adoption, as well as having an abortion.

However, no matter what choice is made it is never easy. Not only do people in these situations have to deal with their own feelings of guilt, fear, anger and sadness, they also have to deal with the family and friends who know. Those who have a good support system usually do better than those who do not. However, if no support system is available, then one should seek counseling for help.

No matter what decision is made, there is no right or wrong. Of all situations this one is not “black and white.” There is much more to this situation than just right or wrong, and only the woman directly involved can decide what is right or wrong for herself.
This couple dance the night away at the Ring Dance, which was actually held for two nights.
On April 1 and 2 the Ring Dance was held for the eighty-first year in the Squires Commonwealth Ballroom. The first Ring Dance was held in 1934. At that time it was simply for the cadets and their dates, now those who were invited were juniors and their dates. The theme of the dance was New York Grand Central Night. The dance consisted of two nights. The first night the atmosphere was very formal with jazzy music. At midnight fireworks were set off. The second night was much less formal. However, the dance was also the time to thank the old class officers and introduce the new ones for the following year. Also, at the beginning of the dance, dates exchanged class rings and tied them to their wrists. Once ring exchange was announced, dates exchanged rings again. In the old days the ring was tied around the waist. This long held tradition of Ring Dance will continue to be around for years to come. -Laura Shull

This time old tradition of Ring Dance gave juniors memories that would last a lifetime.
It's been called everything from obnoxious noise to an inner-angst-relieving art, but whatever you call it, Blacksburg's underground music scene lacked no enthusiasm for bands that defy the sound barrier. In all it's colorful hairstyles and thrift store fashions, this sub-culture most would refer to as Punk, has been thriving within the Virginia Tech community for years. On any given weekend night, if you found the right basement, you could catch the poppy punk of Pop Sloppy or the gothic drudge of The Dry Heaves or even the liquid guitars of Swivel Head. Stop by Pedro's and you might have found some Indie Rock bands visiting from such towns as Chapel Hill, North Carolina like Polvo or The Archers of Loaf, rocking it out NC style.
Virginia Tech's very own radio station WUVT did its part to keep the music rolling by hosting its tri-yearly THROB (The Hard Rock Of Blacksburg) with many original local acts such as the hip-hopping Audio Thrift Unit, bone crushing Supermax, super-fly Flexible Flyer and peel back the paint Youth Hostel to name a few. The 1994 school year saw the rise of an all girl sonic-blues trio known as Spackle, who proved that girls can rock it as hard as the boys. With the formation of so many new bands, there was hope that someday, one would break out and put Blacksburg on the big music map with other such cities as Seattle and Athens, but until then, this rural little college town will continue to crank it out loud and fiercely, pushing the envelop into new and unexplored musical territory where most people looked with misunderstanding eyes and ears. Nirvana and Green Day are good examples of those who ignored the established mainstream and look what happened! Blacksburg's time will come someday.

Photos and Copy by Kevin Kerr
Falling in love was supposed to be one of the happiest times of our lives, but for some it had complications.

No matter what kind of relationship one was in, the hardest ones to be in were the interracial or homosexual relationships. Not only did one have to deal with the normal problems such as mixed communication, dishonesty and bickering but on top of that one had to deal with certain parts of “society” looking down on the relationship from time to time.

Homosexuality has been around for many years but it was still a very touchy subject for many individuals.

There were many different views on why homosexuality was “right or wrong.” Some of the reasons against homosexuality was that it was religiously wrong, or that it “just isn’t done.” Also, some people didn’t necessarily think it was wrong but had a hard time dealing with it and were uncomfortable around people who were.

However, there were other people who saw nothing wrong with the relationship and looked at it as being as normal as a heterosexual relationship.

“There are enough problems in the world, if you’re lucky enough to find love you shouldn’t pass it by, no matter what people think,” said January White.

My parents asked me if I am gay.
I said, “Does it matter?”
They said, No, not really.”
So, I said, “Yes.”
They said, “Get out of our lives!”
I guess it mattered.

My boss asked if I am gay.
I said, “Does it matter?”
My boss said, “No, not really.”
So I said, “Yes.”
My boss said, “You’re fired, queer!”
I guess it mattered.

My friend asked me if I am gay.
I said, “Does it matter?”
My friend said, “No, not really.”
So I said, “Yes.”
My friend said, “Don’t call me your friend!”
I guess it mattered.

My lover asked me, “Do you love me?”
I said, “Does it matter?”
My lover said, “Yes.”
So I said, “I love you.”
My lover said, “Let me hold you in my arms.”
For the first time in my life, something matters.

My God asked, “Do you love yourself?”
I said, “Does it matter?”
God said, “Yes.”
I asked, “How can I love myself? I am gay.”
“That is the way I made you,” God said.
Nothing again will ever matter.

Author Unknown
The subject of homosexuality has been around as long as the relationship itself, but no matter how one felt about the issue the controversy continued to exist.
From disappointment to an unbelievable high, the 1994-1995 Tech basketball team gave its fans a spectacular ending to their season. With a good winning record by the end of the season, the Virginia Tech team was thought to have had a good chance at making it to the “Big Dance.” However, fans were disappointed when the announcement of the 64 teams going to the NCAA Basketball Tournament did not include Tech. But by not being invited to the NCAA, the team did accept an invitation to the NIT (National Invitational Tournament).

By first beating the Clemson, Providence, New Mexico State, and Canisius teams, Virginia Tech beat Marquette in the final game, 65-64 in double overtime. It was a last second effort, with Tech trailing by one with ten seconds left. Shawn “Smitty” Smith went to the free throw line with 0.7 seconds left. He sank both free throws, bringing Tech up by one. Marquette’s half-court shot flew past the backboard, giving the Hokies another “W” to end the season with. And with no graduating seniors, Tech will have it’s original line up returning, giving the Hokies a chance for a repeat...

By: Jean Hou
Shawn Smith holds up the NIT Championship trophy at the welcome home pep rally held for the basketball team.
Different strokes for different folks, as the saying goes. With 21,705 undergraduate and graduate students at Virginia Tech, how does someone find a way to stand out, make a statement and assert their individuality? Being different and original was an asset instead of a fault. Leslie Marshall, a HIDM major, pointed out that “if people don’t assert their individuality in a school this size, they’re going to get lost.”

By: Jean Nou
Gone platinum blond, but uh oh, the roots are beginning to show! Doug Brown shows off his colors, not minding at all the attention he draws from others.
Graduating seniors sported all types of different messages on their caps, anything from thanking Mom and Dad to "See ya later" or "I'm outta here."
Graduation: It's Only The Beginning

Eventually we all get there. On May 13, 4,766 graduating students came to the end of their college career. Some of us went on to graduate school but for most of us the real world was here to stay.

The days before the ceremony were spent studying (or not studying) for finals, last dinners with friends, taking pictures of the campus or visiting the all so familiar hangouts. But soon the big day approached and before we realized it we were sitting in Lane Stadium listening to President Torgesen say his farewell comments and introducing the keynote speaker, Republican Secretary of Education Beverly Sgro. Sgro was familiar to some of us who remembered her as the former Dean of Students, and on this day she talked to us about Gov. Allen's efforts to control higher-education spending. After the formal graduation ceremony, however, we travelled to our smaller ceremonies where we saw our professors and friends one more time and received our diplomas. It was there that we realized that all our hard work, stress and frustration that we dealt with through the four or more years was definitely worth it.

By: Jennifer Dye
TOP TEN REASONS TO LEAVE VIRGINIA TECH

10. Local heifers union wants me gone. Cow jokes caused riot at dairy science department.
9. Staying longer would mean a Ph.D - I don't know how to do original work.
8. Actually beginning to look forward to Beamer football.
7. The weight club promises to dedicate a weight bench to me if I pay for fall membership.
6. The tech police don't give me parking tickets anymore - they just give me blank ones.
5. I don't want to be the first graduate student with tenure.
4. Personal computer getting too personal.
3. Tech turkey assaults me at sports events to incite school spirit.
2. I know all the local cows.
1. I'm too familiar with the mainframe - it wants to date me.

JOE McMANOS/CT 1993

Graduating seniors listen to the keynote speaker, Republican Secretary of Education Beverly Sgro, who was at one time Tech's Dean of Students.

At the graduation ceremony held in Lane Stadium, seniors bounce a beach ball up and down the aisles with the message "Bye VT" taped to the outside of it.
From university and local issues to state, national and world issues, we faced the problems and everchanging situations to help out by times. giving our advice and time.
Throughout the years at college, we are faced with many different good and bad issues. One issue that was becoming more prevalent was that of campus crime. “Take Back the Night” was a rally and march held every year in an effort to increase the knowledge of crimes against women. However, other issues such as student parking, budget cuts, and the death of President McComas and other faculty members were also to be considered.
On the international stage, this year was one of terrible civil unrest and remarkable milestones.

In Rwanda, tensions between the majority Hutu tribe and the minority Tutsi tribe reached their breaking point leading to a civil war.

The bloodshed was sparked by the mysterious plane crash and subsequent death of president Juvenal Habyarimama, a member of the Hutu tribe.

Hutu extremists, blaming the Tutsis for the incident, began genocidal killings of the rival tribe leading to an estimated half-million deaths of Tutsi tribesmen.

An United Nations panel, sent to help distribute humanitarian aid, described the deaths as “concerted, planned, systematic and methodical.”

Two million men, women and children--fearing for their lives--fled Rwanda for refugee camps set up in neighboring Tanzania and eastern Zaire.

The Tutsi-led Rwandan Patriotic Front (R.P.L) led a bloody revolt that ousted the ruling Hutu government, but the cycle of violence continued as U.N. peace keeping forces heard reports of kidnapping and murder by R.P.L. soldiers on returning Hutu refugees.

Death and despair were no strangers to the citizens of Bosnia-Herzegovina.

Bosnia’s Serb population had been waging war against the Muslims and Croats since secession from Serbian dominated Yugoslavia in 1992.

Serbian forces continued their infamous “ethnic cleansing” campaign of forcing Muslims from the northern and eastern regions of Bosnia using sniper attacks and other acts of violence. Over 750,000 non-Serbs have lost their homes in those areas marked for “cleansing” in a two year span.

The United Nations enforced economic sanctions on Bosnian Serbs and allowed NATO to deploy strategic air strikes as well in an attempt to end the fighting.

Despite these efforts and repeated ceasefires called by both sides, the war raged on.

Continued on page 52
War continued to rage in Bosnia-Herzegovina. Bosnian Serbs continued their infamous "ethnic cleansing" campaign of driving Muslims from the northern and eastern regions of Bosnia through the use of violence and brute force.
The small province of Chechnya fought for autonomy from Russia in early 1995. The cause of independence unified the feuding 160 plus Chechen clans to combat tens of thousands of Russian troops.

After over 45 years of bitter relations between their respective countries, King Hussein of Jordan and Israeli Prime Minister Yitzhak Rabin signed a historic peace agreement. President Clinton, host for the event, remarked that both men, "give their people a new currency of hope and the chance to prosper in a region of peace."

Continued from page 50.

Meanwhile, the small providence of Chechnya fought for independence from Russia in early 1995.

The Kremlin found that the Chechen resolve for freedom knew no bounds.

The cause of independence unified the feuding 160 plus clans that make up Chechnya to fight tens of thousands of Russian troops deployed against them.

Tragedy struck Japan on January 17, 1995 when a powerful earthquake leveled dense urban areas in the western section of the country.

The port city of Kobe bore the brunt of the quake's mighty blow, as its magnitude of 7.5 toppled hundreds of buildings, sparked fires and killed over 5,000 people.

Despite the grief and strife in world events, monumental milestones were set during the course of the year.

After over 45 years of bitter, hostile relations between their respective countries, Israeli Prime Minister Yitzhak Rabin and King Hussein of Jordan signed a historic agreement calling for peace.

Last year, Israel and the Palestine Liberation Organization ended decades of hostilities, so optimism for long-awaited peace in the Middle East ran high.

President Clinton summed the moment best when he proclaimed, "[Rabin and Hussein] give their people a new currency of hope and the chance to prosper in a region of peace."

Veterans from both sides of the war met to remember fallen comrades and honor military heroes.

The World Cup crossed the Atlantic as the United States hosted the worldwide event for the first time ever.

All across the country, new attendance records were set as soccer (or "football" as it is known internationally) fans from across the globe cheered on their favorite teams.

Brazil defeated Italy 3-2 in a shootout which marked the first scoreless final in the history of the World Cup.

Nelson Mandela was voted in as the new president of South Africa. South Africans approved of the new government; an August 1994 Gallop/Markinor poll showed 75 percent of Indians, 70 percent of blacks, 63 percent of mixed-race coloreds, and 58 percent of whites felt the new government was doing well.

Fifty years after D-Day, the shores of Normandy were invaded once again. Scores of veterans, reporters, politicians, and royalty commemorated the anniversary of the momentous Allied attack against the Nazis during World War II.

BY ERIC GOODWIN
O.J. Simpson was many things to many people: pro football star, movie actor, network sportscaster, and hero. During the summer of 1994, Simpson added another thing to that list—murder suspect.

On June 12, 1994, the bodies of Nicole Brown Simpson (O.J. Simpson's ex-wife) and her friend Ronald Goldman were found gruesomely slain on the walkway of Ms. Simpson's home.

Within a week of the murder, Los Angeles police announced O.J. Simpson as the prime suspect in the case.

If this revelation was not shocking enough, Simpson's subsequent arrest proved to be an event few will soon forget.

Virtually all network programming was pre-empted as millions of viewers across the nation watched as a suicidal Simpson had his friend A.C. Cowling drive his white Bronco aimlessly about L.A.'s freeways. A phalanx of police cars followed close behind the truck, to ensure Simpson would turn himself in as promised.

O.J. hysteria swept the nation. The media fed the public's deep hunger for any and all information relevant to the case.

Trial experts sprung up out of the woodwork as newspapers and television stations vied for coverage of the story. Many felt that Simpson was tried in the press before he ever set foot in the court.

The case will go down in American history as the most famous murder case of all time.

There seemed to be an overriding theme of tragedy during the latter half of 1994. In addition to the drama of the O.J. Simpson case, two other events deeply affected Americans.

In April of 1994, Kurt Cobain, lead singer of the rock group Nirvana, committed suicide.

Nirvana brought the "grunge" sound of bands in the Seattle area to the forefront of the American consciousness.

Cobain's songs struck a chord with teenagers nationwide who felt the disillusionment and angst expressed in his lyrics.

Continued on page 56
O.J. Simpson was accused of the gruesome slaying of ex-wife Nicole Brown Simpson and her friend Ronald Goldman. The murder case captured the imagination of the American media and will go down in history as the most famous case in U.S. history.
Continued from page 54

In October of 1994, a young white South Carolinian woman by the name of Susan Smith earned media attention when she claimed a black assailant abducted her two young children in the act of stealing her car.

Her heart wrenching pleas for the safe return of her children were broadcasted on such national television shows as NBC’s “Today Show.”

In November, authorities found Smith’s car, with the two children’s bodies inside, at the bottom of a nearby lake in Union, South Carolina.

The nation was stunned when Smith recanted her story of being attacked and admitted that she was responsible for the deaths of the children.

Tensions between the U.S. and its neighbors in the Caribbean reached a critical point.

During the late spring and summer of 1994, tens of thousands of Cubans fled the poverty of Cuba for the United States.

Cuban leader Fidel Castro allowed persons dissatisfied with his communistic regime to leave the country in a calculated attempt for the U.S. to address his complaints that the American economic embargo and the automatic asylum given to boat people encourage them to leave the island nation.

Hundreds of Cubans have died while trying to cross the Florida Straits. The U.S. agreed to grant asylum to 20,000 Cubans per year in return for Castro halting the flux of boat people.

Guantanamo Bay served as a refugee camp for fleeing Cubans. It also housed thousands of Haitian refugees.

Floods put much of the central and southwestern areas of Georgia underwater. A record two feet of rain fell in July of 1994.

Tens of thousands of firefighters battled forest fires across western states. Dry weather kept the fires blazing for most of the ’94 summer.
The U.S. was on the brink of invading the small island nation of Haiti. While American forces waited, three special U.S. envoys struck a last minute deal with the military regime to restore power to deposed president Jean-Bertrand Aristide.

In 1991, a military coup forced Haiti's first democratically elected president Jean-Bertrand Aristide into exile. Since that time, Aristide was busy trying to get the world to address the human rights violations being perpetrated under the military regime and drumming up international support.

The U.S. was on the verge of invading the small island nation in September of 1994. As American forces stood poised for the invasion order, three special U.S. envoys—former President Jimmy Carter, retired General Colin Powell, and Senator Sam Nunn—struck a last minute deal with military dictator General Raoul Cedras and on October 15, 1994, Aristide received a hero's welcome as he returned to Haiti to serve out the remainder of his presidential term.

Natural disasters wreaked havoc on American turf. For the entire summer, tens of thousands of firefighters battled forest fires that ravaged millions of acres of woodland across the parched western states.

While fires raged on the west coast, floods drown the state of Georgia. Nearly two feet of rain poured from tropical storm Albert in July causing massive flooding in the central and southwestern sections of the state. The destruction was staggering; in all, 31 people died, 400,000 acres of crops were engulfed in water, colossal amounts of top soil were lost and 46 counties were declared disaster areas. Furthermore, floods in California in January of 1995 caused $300 million in damage and resulted in the loss of at least 11 people.

Continued from page 57

In the political arena of Washington D.C., the year could be likened to a roller coaster; a thrilling, if not bumpy ride.

First Lady Hillary Rodham Clinton spearheaded a task force charged with creating a health care proposal that would provide universal health care coverage to all Americans.

The proposal's complexity and lack of popular support undermined the effort. Despite months of hearings, tedious research and heated debate, 1994 ended without significant health care reform.

Although an universal health care bill was not signed into law, an important bill on crime was. The crime bill called for a ban on several types of assault firearms, broadened the death penalty punishment to include additional federal crimes, and provided billions of dollars to build new prisons, and hire police. Despite the prevailing mood of optimism, President Clinton warned that, "Our country will not be safe again until all Americans take personal responsibility for themselves, their families, and their communities. Even this great law cannot do it alone."

For the first time in decades, the Republicans won a majority of seats in both the Senate and the House of Representatives.

Led by new Speaker of the House, Newt Gingrich, the Republicans brought with them the so called "Contract With America"---a ten-point plan the G.O.P. envisioned would transform the federal government.

The contract included such proposals as a balanced-budget amendment, massive cuts in welfare, personal and corporate tax cuts, and increased defense spending. The contract was not without controversy however, as critics questioned the plan's economic feasibility.

Economics became a hot issue in January '95 as the Mexican economy teetered on the brink of bankruptcy. The peso took a dramatic fall--as much as a 35 percent drop in a one month span.

With the 1993 North American Free Trade Agreement in jeopardy, President Clinton and high ranking Republican leaders Senate majority leader Bob Dole and Speaker Newt Gingrich endorsed a proposal that would give $40 billion of loan guarantees to bailout the Mexican economy.

The guarantees would not cost U.S. taxpayers a cent unless Mexico defaulted on the loans.

While gathering support...
Despite the protest of fans, baseball players and owners could not come to an agreement over proposed salary caps. The work stoppage lead to the cancellation of the '94 World Series.

Newt Gingrich addressed a crowd of Republican supporters. The G.O.P. unveiled their “Contract With America,” a 10-point plan that hoped would change government.

for the loan package, Clinton warned, “If we fail to act, the crisis of confidence in Mexico’s economy could spread to other emerging countries in Latin America and in Asia, the kinds of markets that buy our goods and services today and that will buy far more of them in the future.”

The Mexican bailout proposal came at a time of tension between the U.S. and Mexico.

Also, in November, California voters passed the infamous Proposition 187. Public education, welfare, and other benefits but emergency medical care would be denied to illegal immigrants under the proposition.

The Mexican media criticized the state ballot as “a disgrace for U.S.-Mexican relations.”

Underlying the media outlash were concerns over the impact returning immigrants would have on fragile educational and medical institutions.

Also, this year marked the eighth time since 1972 that professional baseball has had a work stoppage.

The '94 strike began in August with a dispute between players and owners over salary caps.

The owners claimed that players had to accept a payroll limit to save financially strapped teams in smaller market cities.

The players argued that they could ill-afford to lose the hard-earned free market gains, and thus opposed the salary cap.

Despite repeated negotiations, no agreement was reached and 1994 marked the first time in years a world series was cancelled.

Tragically, the year marked the passing of several American icons. Former president Richard Nixon, former first lady Jacqueline Kennedy Onassis, and matriarch Rose Kennedy all died during the course of the academic year. Each left an indelible mark on American culture.

BY ERIC GOODWIN

Nation In Review 59
In Virginia, the year's events kept even the most casual of observers intrigued. The Disney pullout, senate elections, welfare and prison reform, a new tax plan, and budget cuts characterized a topsy-turvy year. After winning $163 million in incentives from Virginia lawmakers and well on the way to winning final zoning approval, the Walt Disney Company pulled out of plans to build a historical theme park in Haymarket.

The September decision came as a result of the negative publicity generated by the proposed "Disney America" park. Detractors claimed the park would "desecrate nearby Civil War sites, trivialize U.S. history, produce traffic jams, and worsened air pollution."

State officials who lobbied heavily for the project were shocked by the decision. The 3000 acre, $650 million park was expected to make $12 million a year in county tax revenue and create 3000 jobs.

In November, citizens were called upon to vote in the U.S. Senate elections. The race pitted incumbent Democrat Chuck Robb against Republican Oliver North of Iran-Contra fame. Marshall Coleman, a former Republican, ran as an Independent.

The election was marred by negative campaigning and mud-slinging. Pre-elections polls showed a tight race between Robb and North. In the end Robb edged North for the win.

Meanwhile, in Richmond, Governor George Allen was determined to keep his pledge to shake up state government. In December, the governor proposed a welfare reform plan. The plan limited welfare benefits to people on welfare to two years and required most able-bodied recipients to work in public or private sector jobs.

Among the provisions that won approval included stringent enforcement of child support laws, and unwed mothers under the age of 18 being legally bound to attend school and live with their legal guardians.

Continued on page 62
Pam Lipka, a senior in mechanical engineering, registers to vote. Virginia held elections for U.S. Senate in November pitting Democratic incumbent Chuck Robb against Republican challenger Oliver North.
The reform plan also contained a controversial provision that stated that women who have additional children while on welfare will not receive additional benefits. Opponents claimed that the proposal would only end up hurting children while supporters maintained that taking away additional money took away the incentive to have more kids.

Governor Allen also proposed major reforms in crime punishment. Over the past five years, there has been a 28 percent increase in reported crime. Allen, fulfilling a campaign promise to "be tough on crime," won approval for a crime plan that abolished parole and proposed to double the state's prison capacity.

Under the new plan, 23 new prisons would have to be built to accommodate a prison population that is expected to double in 10 years. The cost of the plan was estimated to be around $1.5 billion.

Along with these sweeping reforms came Allen's new tax plan. The tax plan called for hundreds of millions of dollars in tax refunds to the elderly and federal retiree's and tax breaks for private pensioners. To pay for these plans, fifteen percent of the state's 110,000 jobs were to be slashed as well as cuts in other areas of government. Half of the budget of the Virginia Commission to the Arts was proposed to be cut.

Higher education also faced budget cuts. In late September, Allen requested state agencies to submit budgets which cut 2, 4, or 6 percent from the bottom line.

Budget reductions would be made in relation to restructuring plans prepared by colleges and universities.

Virginia was ranked 45th in the nation in tax dollars spent per student, a far cry from it's ranking of 22nd four years ago.

College students across the commonwealth mobilized to protest cuts in higher education funding.

The Virginia Tech Student Government Association organized a Higher Education Day in February. An estimated 1,500 students flooded Richmond with faxes and telephone calls.

Diversity was an important issue on Tech's campus. The university hosted such prominent speakers as Professor Lani Guinier to speak about the need for a "national conversation" on race. Groups such as the Women's Undergraduate Network made sure everyone had an outlet to express their views.

The year was not without without tragedy. Virginia Tech mourned the loss of Richard Talbot in USAir flight 427's mysterious plane crash near Pittsburg.

Talbot was the founding dean of the Virginia/Maryland Regional College of Veterinary Medicine. He was praised by his colleagues as being a consummate professional and a world-renown veterinary educator.

**BY ERIC GOODWIN**
Fraternities and sororities first started appearing on campus in the early 1970's. Under the Interfraternity Council there were 33 fraternities established on campus, whereas there were 12 sororities under the Panhellenic Council. Furthermore, there were also eight historically black sororities and fraternities established under the National Panhellenic Council. The Greek system offered students the chance to meet friends and help out the community as well.

have fun and make friends.
Although most Greeks enjoyed the fast-paced excitement of camping out for tickets, some students needed a break. This φΔΘ grabs a quick nap as the sun goes down.

While camping out was mostly fun and games, some students still found the time to study. Kevin Williamson, a brother of ΣΔΘ, takes time out to prepare for an upcoming test.

Keeping busy while waiting for tickets comes in many forms for these Greeks. Some relax in the sun, others socialize, and those with any energy left at all, get in their exercise.
It was a familiar sight. Dozens of tents, decorated with Greek letters, haphazardly lined up next to one another. Students scattered across the grass randomly having a catch, studying, socializing or hibernating. Looks like football season again at Tech!

Students often camped out in long lines in order to get blocks of tickets for their organizations. Fraternity brothers and pledges, among other students, took turns waiting in the tents for the lines to open.

Sororities had the easy way out as most would tailgate with a fraternity for each football game. The lucky fraternity gentlemen would collect the athletic cards and wait to collect upwards of 150 tickets.

The hassle of the ticket policy caused much controversy on campus as many students desired a more organized system. However, most students did not mind waiting for tickets.

“We were all forced to do it, but by the end of it I was glad I did because it gave me and my pledge brothers a great opportunity to hang out and have fun,” said Sigma Chi pledge Eric Robison, a sophomore business major.

Football coach Frank Beamer often took part in the campouts by answering the students’ eagerness to get football tickets. On more than one occasion, Beamer bought dozens of pizzas and handed them out to the waiting campers.

Coupled with coolers of beer, the campouts were more of a party than an “out-of-doors” experience, but all-in-all, just another unique aspect of Greek life!

By Susan D. Strayer
Krista Welten, a sophomore in business, writes in her library hours for the week. It was common to see Greeks involved in study groups for projects and tests.

Rachel Haas, a junior in family and child development, searches for information on juvenile delinquency at the Media Center. Many Greeks found it easy to fulfill their library hours each week from the pressure of academic life.

Sometimes the only way for students to get their work done was to hibernate in their bedrooms. ΣΠ brother Jason Monk, a senior in biology and Pre-Med, goes over his day’s notes at his desk late one evening.
Education

A Top Priority for Greeks

Parties, dates, socials, drinking—these were the first things that often came to mind about the Greek system. However, Greeks were not just about socializing.

The desk beside the library door was a familiar place for most Greeks. Many fraternities and sororities kept their library hours book here for members to sign as they left the library. Some organizations required certain hours, while others made suggestions.

The educational effort made by Greeks was shown through the consistency of Greek QCAs versus total student QCAs. In the spring of 1994, the All-Greek women's QCA was higher than the All-women's QCA—a 2.98 compared to a 2.85, whereas the All-Greek men's QCA of 2.60 ran very close to the All-men's QCA of 2.64.

Many Greek organizations also had scholarship chairs. These chairpeople compiled lists of koofers and suggested study and testing skills. They also monitored the members' academic performance to prevent possible problems.

"The time and effort that our scholarship chair has put into academic programs for us has encouraged our sisters to return the favor and work hard to succeed" said Venessa Baggett, a Phi Mu sister, and junior in LASc and communication studies.

Greeks also had minimum QCA requirements for their members and many were members of Order of Omega, a Greek honor society, proving that Greek letters were very much synonymous with educational success.

By Susan D. Strayer
Alpha Sigma Phi brother, Harrison Dudley, bowls for a strike at the Kappa Delta Bowl-A-Thon. Even though Alpha Sigs have not chartered yet, they were actively involved in all the philanthropy events and usually placed.

Alpha Tau Omega brothers participate in Zeta Psi's Flag Football Tournament. Several fraternities were involved and the event lasted all day. Alpha Tau Omega provided hard competition for the other organizations.

70 Greeks

Alpha Gamma Rho (AGP)
History Meets Diversity

The Greek system of Virginia Tech was one of great diversity. Fraternities ranged from Alpha Gamma Rho and Alpha Tau Omega that chartered here in 1973, to the colony of Alpha Sigma Phi which hoped to charter soon.

Alpha Gamma Rho was the oldest nationally affiliated agricultural fraternity in the country. It allowed men with similar backgrounds and interests to share a unique kind of brotherhood. With these strong ties that developed with the brotherhood of Alpha Gamma Rho, friendships were formed for a lifetime. The driving purpose behind AGR was to help educate agricultural men and improve the field of agriculture.

The older chapters took pride in their history and duration. The Theta Delta chapter of Virginia Tech's Alpha Tau Omega continued to be involved both on and off campus. Anywhere you went on campus you would see a ATΩ brothers wearing letters or participating in student leadership positions. They also participated in several sorority and fraternity events, fundraisers and philanthropies.

Alpha Tau Omega took pride in their brotherhood and continued to be an integral part of the Greek system. They stressed the idea of brotherhood being a lifelong process and enjoyed socializing during theme parties, tailgates and formals.

However, Alpha Sigma Phi took the Greek system by storm. Although they were a colony, they made a dominant impression on Virginia Tech. They prided themselves on consistent involvement around campus as well as participating in philanthropy events. The overwhelming effort that was shown since this colony originated was phenomenal. They captured victories in many of the philanthropy events they entered, including a first place in the Tri-Delta decathlon and in Alpha Delta Pi's Safari Hunt.

Even with all the events Alpha Sigma Phi participated in, they still found the time to schedule socials with a variety of sororities and they also co-sponsored events with fraternities.

Alpha Gamma Rho, Alpha Tau Omega and Alpha Sigma Phi represented the past, present and future of fraternity life, bringing diversity and strength to the Greek system.

By January White
Brotherhood...
It comes in many forms

Whether bonding with alumni at the new house, or on the river, fraternities at Virginia Tech always found ways to take advantage of their brotherhood.

Beta Theta Pi brothers welcomed their alumni at their annual alumni picnic. Brothers old and new, gathered together at Tech to reminisce about old times and the good times to come.

The Delta Chi fraternity welcomed the completion of their new house, located in Christiansburg. Brothers were more than excited about their new home.

"Building the house was an accomplishment for Delta Chi. We were all really relieved to see it completed and I know it will be a great asset to our fraternity in the future," said Delta Chi Chris Fisher, a senior in residential and property management.

To dedicate their house, ΔΧ held a ribbon-cutting ceremony in November. On hand were brothers and their dates, charter member alumni and founding chapter president, John Chu, who performed the ceremony.

Delta Upsilon fraternity held their annual ΔΥ Downriver early in the fall semester while the weather was still nice.

Many students grabbed tubes and headed to the New River for a day of fun in the sun!

By Susan D. Strayer
After only two and a half years, the Delta Chi chapter of Virginia Tech has a place to call home. With their new home, ΔΧ held socials, meetings and weekend parties.

Zeta Beta Tau

Theta Chi

Zeta Psi

Fraternities at Virginia Tech were diverse in character and number. Many were chartered over 20 years ago while some were only chartered 3 or 4 years ago.

The Eta Lambda chapter of Theta Chi at Virginia Tech has been growing strong since 1972. They were active in both athletics and academics, as well as in socials. They had a tradition of holding one of the largest parties called Sombrero Day. Bands such as B S & M, Boy O Boy, and Dave Matthews brought their acts to the Theta Chi Ranch.

A newer fraternity, Zeta Beta Tau, has already set both the standards and traditions at Virginia Tech. They were colonized on February 28, 1992, with only two men. Since then they have grown immensely and were active on campus, participated in several Greek events, and sponsored a 1994 Homecoming candidate. They also had a non-pledging policy which promoted equality.

Like Theta Chi, Zeta Psi also had a long history at Virginia Tech. They were chartered in 1973 and continued to grow. This year, their flag football tournament was very successful. They strove for quality and not quantity and represented the Greek system by staying active in their local philanthropy: The Blacksburg's Lions Club.

By January White

The brothers of Zeta Beta Tau collect tickets for the Connells Concert at the door. Sponsoring the concert was a good opportunity for the fraternity to socialize. There was nothing but fierce competition in Zeta Psi's Flag Football Tournament. Here, a fraternity member tries to escape losing his flag.
While fraternities did not usually seem to represent strength and tradition, Greeks at Virginia Tech strove to embody these characteristics. Tradition on campus was best represented by the oldest Greek organizations.

Theta Delta Chi has been a local fraternity since 1957 and was chartered in 1970. They were founded over 140 years ago in 1847. Their ideals stemmed from those of their founders, six men who believed solely in brotherhood. They were bound by values that represented a mutual respect between the organization and the individual brother. Theta Delta Chi believed that a smaller group of brothers allowed them to function better. The 30 or 40 returning brothers each year were not only active in Virginia Tech's Greek community, but they were extremely close. They also were strong socially, carrying on tailgates, socials, their annual Buffet Day, formals and semi-formals.

Pi Lambda Phi was a newer fraternity which has only been chartered since 1984. However, the Omicron Zeta chapter has grown strong. They recently celebrated their tenth birthday by continuing their contributions to the campus and the community. They contributed to the Ronald McDonald House twice a year as well as working hard on campus. Pi Lambda Phi also took pride in their social events. They thrived on hosting pre-game tailgates during the football season as well as having band parties on the weekends. They were continuing their tradition of being "innovators and not imitators."

Another fraternity with some of the highest ideals was the Kappa Alpha order. Nationally, Kappa Alpha was one of the nation's strongest fraternities, with a high southern reputation. They called themselves an order because they concentrated on not molding a man but allowing him to improve himself and the chapter. They strove to maintain the traits of a gentleman as most exemplified by the southern General Robert E. Lee. Kappa Alpha was chartered at Virginia Tech in 1979 and they continued to grow. They spent a lot of time at their house on Roanoke Street, and like many of the other fraternities, they contributed highly to the campus and community.

By Susan D. Strayer

At a Pi Lambda Phi party the brothers and friends gather for a picture. Being in a fraternity gives the brothers an opportunity to meet a lot of people.

Pi Lambda Phi

Fraternal Equilibrium

Creating a balance fraternity brothers could be proud of was something all fraternities strove to achieve. Between service to the community, social and athletic events, fraternity calendars were always full.

Kappa Sigma fraternity achieved this goal. Chartered at Tech in 1971, Kappa Sigs devoted themselves to service through their fundraising efforts for the Knights of Virginia.

They also stood strong in athletics and made time for tailgates and their annual "Spring Luau."

Lambda Chi Alpha fraternity also strove to include everything in their schedule. This year their volleyball tournament brought campus sororities together to raise money for philanthropies.

ΔXA's also took pride in their fraternity house located on Roanoke Street. They held many events there each year. Also chartering at Virginia Tech in 1971, Lambda Chi's balanced socials with formals, and academics with daily life.

Pi Kappa Phi also reached "Fraternal Equilibrium." They were founded in 1904 and chartered at Tech in 1971.

They held annual events to benefit the P.U.S.H. foundation, and consistently ranked in the top of the Greek men's Q.C.A. average. They too, seemed to do it all!

By: Susan D. Strayer
Tailgating was always part of the Greek tradition. Pi Kappa Phi's pause for a moment out of their pre-football game celebration. Pi Kappa Phi brothers took part in another Greek philanthropy event. Here they collapse after participating in KKG's Tug-O-War tournament.

Sigma Nu (ΣΝ)

80 Greeks
Tech Fraternities:
Striving To Be The Best

Fraternity strength on campus never ends as exhibited by ΣAE, SX and ΣN.

Sigma Alpha Epsilon chartered here in 1975 and continued to be one of the strongest fraternities on campus. Every year they held a Christmas party for underprivileged children throughout the community. It was their way of trying to give back to the community and the university. Their values were those of “True Gentlemen” and they had a unique spirit that they brought to the Greek community.

The Eta Lambda chapter of Sigma Chi continued to be a dominant force on the Virginia Tech campus.

In addition to being extremely involved on campus and holding several leadership positions, Sigma Chi held their annual Derby Days. It proved each year to be a huge money maker to whatever cause they chose to donate to.

Sigma Chi kept an active social calendar with tailgates, socials and formals.

Sigma Nu charted at Virginia Tech in 1971 and was still growing. The Tech chapter remained very involved in positions on campus. This year marked their eighteenth annual “Dribble-a-Thon” in which campus sororities participated to raise money for a charity.

By January White

Alpha Delta Pi sisters watch as one of their Derby Days coaches has a cake made in his hair. Sigma Chi brother, John Wahl, eagerly takes part in the Derby Days festivities.

Alpha Delta Pi’s Jennifer Morrison and Julie McClellan hold Melissa, their new found friend. ΣAE brother, Mark McMahon, looks on proudly representing his fraternity. Their annual Christmas party always put people in the spirit of giving.
A proud fraternal system was alive and well at Virginia Tech. One of the many ways this was exhibited was through the pride many fraternities took in the different fraternity houses located both on and off campus.

Sigma Pi came along way since they chartered in November of 1990. They remained active in their house, located in Special Purpose Housing, with events such as tailgates, beach parties, Halloween theme socials, and formals. Sigma Phi Epsilon chartered here in 1970 and continued to be a strong influence on the campus.

Their house, located off-campus adjacent to Blacksburg High School gave brothers a bird's-eye view of the Blacksburg football games. However, brothers also stayed active in philanthropy events. This year they had their "Walk With A Heart On" which involved the community as well as the campus. They also kept a full schedule of socials and parties.

Tau Kappa Epsilon kept their national tradition alive here at Tech. Many brothers resided in their house, known to to brothers as the "TKE barn."

This Xi Omega chapter has been involved throughout the community and on campus for over two decades.

By January White

Community service was an important part of a fraternities activities. Tau Kappa Epsilon brothers, Joe Jones, Chip Miller, Scott Thompson and Mike Hylton work to clean up a local playground.

From six to sixty, everyone got involved in Sigma Phi Epsilon's American Heart Walk. Brothers joined members of campus organizations and local residents at the Blacksburg High School Track to walk for a worthy cause.
Sigma Pi brothers, Ed Ramous, Jamie Spisak, Roger Lin and Jason McMichael clown around at a happy hour before semi-formals. Brotherhood allowed friendship opportunities in addition to everlasting brotherhood.

84 Greeks
Strong Reputation

The Greek system at Virginia Tech was comprised of many national fraternities. Fraternities with chapters all over the United States and Canada considered Virginia Tech as another worthy addition to their rosters.

Among the many Tech fraternities known for a strong national reputation were Triangle, Phi Delta Theta and FIJI.

Triangle fraternity was founded at Virginia Tech in 1980 and has contributed both academically and personally. Nationally, it was comprised of members from all the engineering disciplines, the natural sciences, math and architecture. They thrived on their strong academic reputation, achieving one of the highest all-around QCA's of Tech's fraternities. Not only was Triangle fraternity successful in academics, but they knew how to have a good time as well. They not only planned socials and hung out around Blacksburg, but they organized camping trips and movie nights. Triangle members combined fun and success.

Phi Delta Theta was also a strong national fraternity. They were the largest fraternity with more chapters outside the United States than any other fraternity. The Virginia Eta chapter was chartered at Virginia Tech in 1972. Since then, they have kept a strong, yet close-knit brotherhood. They participated in many intramurals, ranking high in both soccer and handball. Besides tailgates and socials with sororities, Phi Delt's sponsored parties such as their Christmas party and the Miami Triad. Phi Delt's were an excited and involved brotherhood.

Phi Gamma Delta was also one of the nation's most prominent fraternities. Popularly known as FIJI, they were chartered at Virginia Tech in 1972. They have over 130 chapters in the United States and Canada. Here they strove to maintain their five values: friendship, knowledge, service, morality and excellence. They were also a very involved brotherhood. FIJI's participated in the Blacksburg Food Bank, the Adopt-A-Spot program to clean local highways, Animal Care Inc. and Habitat for Humanity. Socially, they were known for throwing creative parties such as their FIJI Islander party held each spring.

The brothers of Chi Phi enjoy their Semi-Formals. With the many benefits of brotherhood, semi’s and formals always proved to be fun.

Phi Kappa Psi (ΦΚΨ)

Phi Kappa Sigma (ΦΚΣ)

Chi Phi (ΧΦ)
Finding a Greek Home at Tech

Every fraternity at Virginia Tech had their own home base. For some, they gathered at a brother’s home, if they didn’t have a house of their own. Others gathered at Special Purpose Housing, while some Greek organizations met at their off campus houses.

Phi Kappa Sigma was located in Special Purpose Housing and they were chartered at Virginia Tech in 1973. In the past 22 years, Phi Kapps have held parties for students such as socials and theme parties. Their location was accessible to all brothers, and they abided by their motto “Once a Phi Kapp, always a Phi Kapp.”

Phi Kappa Psi also had a strong foundation at Virginia Tech. The Virginia Zeta chapter at Virginia Tech was chartered in 1976 and they resided in their house on Mount Tabor Road. Though small in number, they were strong in brotherhood. They participated in athletics and socials and often held open parties at their house.

Chi Phi was a newer fraternity on campus. They were founded way back in 1824, but in 1992 on the Virginia Tech campus. They were one of five Virginia chapters, and 57 chapters nationwide. They were gaining in both presence and stature as they strove to become strong fraternity.

By January White

At Phi Kappa Sigma’s formals brothers take time out from a busy night of dancing. Formals provided a welcome break from the weekly academic stresses.

The brothers of Phi Kappa Psi pose for a group shot at their formals. With busy schedules during the week formals gave brothers time to bond and socialize.
What do all these events have in common? They were all part of sorority philanthropy events at Virginia Tech.

Alpha Delta Pi held its annual Safari Hunt to benefit the Ronald McDonald House. Each organization was coached by sisters of ADPI and took part in a pie-eating contest, a grape-spitting contest, and an obstacle course. In addition, each organization prepared a "Reign Dance." Pi Beta Phi sorority took first place for the women and Alpha Sigma Phi took first place for the men. "The effort put forth by all of the teams really showed," said Alpha Sigma Phi coach Donna Stevenson, a senior in biology.

After last year's success, Alpha Phi held its second annual Jail and Bail to benefit their foundation for heart projects.

A representative from each organization was arrested and "jailed" until enough money was raised by passers-by for the bail.

"Philanthropy projects are good because they show that fraternities and sororities are not just social organizations," said Alpha Phi sister Carrie Snidar, a junior in communication studies.

Delta Delta Delta held their annual Tri-Delt Decathlon to benefit the Children's Cancer Ward at Roanoke Memorial Hospital.

Organizations competed in a race, which included diapering a member and forming a monster pyramid. Delta Delta Delta came in first place for the women and Alpha Sigma Phi for the men.

"We were excited to give our money to a local charity because we'll be able to volunteer for them," said Delta Delta Delta Joanna Tuyahov, a junior in comm. studies.

Delta Gamma (ΔΓ)

Delta Zeta (ΔΖ)

Zeta Tau Alpha (ΖΤΑ)

90 Greeks
Whether it was spring or fall at Virginia Tech, sororities each took a turn to help support their national philanthropies. Each sorority on campus held an annual event which became their own tradition.

Delta Gamma sorority has been at Virginia Tech since 1971, and held their annual Anchor Splash each year. Popular with many fraternities, sororities and other campus organizations, Anchor Splash included water games and a talent show. Delta Gamma’s worked all year to prepare for this event which supported sight conservation and aid to the blind.

Another popular campus philanthropy event was the Delta Zeta Classic. DZ Classic was a weekend of events for campus fraternities to participate in.

This year, Delta Zeta’s ninth Classic raised money for their national philanthropy: Galludet University for the Hearing Impaired.

Keeping up with the physical tradition, Zeta Tau Alpha held their annual wiffle ball tournament for campus organizations. In addition, they took a week to publicize and support breast cancer awareness, and their philanthropy, the Susan G. Komen Breast Cancer Awareness fund.

Zeta Tau Alpha held their annual wiffle ball tournament in the fall. Delta Chi brothers hope to hit a home run.

Bowling was a popular Homecoming activity as sisters from Delta Zeta take a break. They teamed up with Sigma Chi for Homecoming 1994.
College Greeks are Young at Heart

Even though most Greeks at Virginia Tech were between the ages of 18 and 22, it did not stop them from returning to their childhoods to help others.

Kappa Alpha Theta sorority, which has been at Tech since 1983, invited students to play kickball. In order to support Court Appointed Special Advocates, Kappa Alpha Theta held their eighth annual kickball tournament. Not only did it prove students were kids at heart, but it proved to be a fundraising success as well.

Kappa Delta also invited students at Tech to feel young again. They held their annual bowl-a-thon and pool tournament.

At the bowl-a-thon some Greeks chose to go all out by wearing odd attire while striking down pins; these projects were not only fun but worthwhile. Kappa Delta supported both the Richmond Children’s Hospital and Radford Women’s Resource Center.

Kappa Kappa Gamma took students back to their days of summer camp. Each year, Greeks battled to see who was the strongest in the Kappa tug-of-war tournament.

“This year’s turn-out really helped support Women’s Rehabilitation Projects,” said Liz Wharton, a Kappa sophomore.

Greeks live for support!

**Phi Mu (ΦM)**

**Chi Omega (ξΩ)**

Sometimes in order to raise money for an important cause, sororities dreamed up eclectic ideas that were not only fun, but for a good cause!

Pi Beta Phi sorority supported their national philanthropy, the Arrowmount School of Crafts, through two annual events.

Pi Phi’s held a three on three basketball tournament known as “Hoopfest” and also held a putt-putt miniature golf tournament. Not to be outdone in creativity, Phi Mu attracted Greeks from all over campus to their “Lolla Phi Muza” talent show. Each organization prepared a lip sync or song and then collaborated them into a show. The best performance was awarded a prize, and their philanthropies, the Children’s Miracle Network and Project H.O.P.E., benefited from the energy put forth by all of the students.

Chi Omega sorority instilled their annual tradition which all Greeks looked forward to each spring. The Chi O Twister tournament could get pretty competitive and pretty confusing as students got all caught up in arms and legs and bodies! The tournament benefited the local Humane Society.

Though each sorority had its own events, they all looked forward to participating in others.

By: Susan D. Strayer

Members of Alpha Delta Pi participate in Chi Omega’s Twister. Several organizations participated and it was a huge success.

Sisters of Pi Beta Phi take time out to pose for a picture together. Several banquets and special events were held throughout the year.
Virginia Tech as a whole had a very strong Greek system. This system was broken down into three divisions and one of these was the NPHC or National Panhellenic Council. These black fraternities and sororities worked hard on and off campus to improve themselves, the Greek system and the community.

Alpha Kappa Alpha, a female organization, prided itself on community service. One could often see the bright pink and green bags, hats and sweatshirts these women wore to display their pride.

The Theta Iota chapter of Alpha Phi Alpha took pride in their motto “First of All, Service to All, We Shall Transcend All.” Since they were chartered at Tech, they have grown into a strong and powerful fraternity. They have members actively involved on campus and have a strong interaction with the community.

Delta Sigma Theta was yet another strong organization within the National Panhellenic Council. They were one of the four of the active black sororities on Tech campus. They dedicated themselves to the school and the community. They interacted with the other four sororities and competed against each other in activities and events like the Step Show that was held in late spring.

Phi Beta Sigma and Zeta Phi Beta set up a informational window in Squires. The two organizations promoted together as a team.

Zeta Phi Beta (ZΦB)

Kappa Alpha Psi (KΑΨ)
A Strong Greek Force in Equality

The early 1900's provided many opportunities for students of African-American heritage in the educational world. Since then, the social opportunities have also increased greatly.

The social opportunities have also been established here on campus. This arose from the roots of the National Panhellenic Council which was founded in 1930 on the Howard University campus. Here at Virginia Tech the National Panhellenic Council helped organizations such as Zeta Phi Beta and Kappa Alpha Psi establish a prominent presence on the Virginia Tech campus.

Zeta Phi Beta was organized at Howard University in January 1920. They were given encouragement by Phi Beta Sigma fraternity, who was now their brother fraternity at Virginia Tech. They were the first official Greek letter sister and brother organizations. Zeta Phi Beta was a strong sorority that strove to uphold the ideals of womanhood, scholarship, service and sisterly love.

Historically black fraternities were also strong here. Holding up the true ideals of brotherhood was Kappa Alpha Psi. They too have been prominent on the Tech campus since they were chartered as the Theta Psi chapter in April 1977.

By Susan D. Strayer

Members of Zeta Phi Beta staff a booth in Squires for a fundraiser. They worked to collect money to fight domestic violence.

The brothers of Kappa Alpha Psi get together for a picture. This year they participated in the step show held in Burruss Auditorium.
Fraternity Sleeps Around

Is there anyone in the world crazy enough to sleep outside in the dead of November when they don’t have to? The answer to that question is yes... the Phi Beta Sigma fraternity. The second annual FBS “Sleep Out For The Homeless” was held on November 11.

The purpose this year was to raise money for the Montgomery County Homeless Shelter. The brothers wanted to help those who were not as fortunate and to get a taste of what it would be like. They made it close to the real thing by sleeping in cardboard boxes on the ground with clothes and a few blankets.

There were seven participating active members at the sleepout however, they now have acquired seven new brothers. Phi Beta Sigma hoped to keep this event going in the years to come because it was an excellent example of what they were all about.

The fraternity was founded years ago in the hopes of helping those in need; regardless of race, color or creed. This idea was important to them and they worked hard to preserve their traditions.

More than half of the brothers were involved around campus. Most of them worked with the YMCA and they took great pride in their work. Sam Henry a senior in interior design commented,"We did over twenty community service projects last semester and this semester we have even more lined up. We do a lot more than people really realize.”

Phi Beta Sigma had an advantage that other Greek affiliations did not, they had a sister sorority. Zeta Phi Beta throughout history been their partners in crime. They entered philanthropy events together and during the sleepout, the brothers received warm coco from their sisters. It was one of the reasons the traditions have stayed close and strong.

Phi Beta Sigma also put on a step show each year which they practiced vigorously for. Their attitude showed in the hard work they put in as a whole. As Sam Henry said,"In our motto we have ‘Culture for Service and Service for Humanity,’ we think that the sleepout and the community service we do is based on these same ideas and principals of our founding fathers... and that’s what’s important.”

Phi Beta Sigma
True Leaders: Guiding Greeks to Excellence

They represented every facet of the Greek community. They filled the roles of leader, parent and enforcer.

They were the members of the Panhellenic council (PhC), the Interfraternity Council (IFC) and the National Panhellenic Council (NPhC).

The strength of the Greek system was shown through the high All-Greek Q.C.A. In addition, 80% of the leadership positions on campus were held by Greek affiliated students.

The PhC governed the sororities and the IFC the fraternities. In addition to coordinating programs in the areas of leadership, athletics, and community service, PhC and IFC oversaw the alcohol "risk management policy."

They also coordinated rushes to help Greek organizations gain new members and they sponsored many related events such as Greek Week. They were led by the coordinator of Greek Life, Steve Leist and the assistant coordinator of Greek Life, Shari Malone.

The NPhC helped to promote the goals and leadership of the eight historically African-American fraternities and sororities. As an integral part of the Greek system, they too promoted evidence that Virginia Tech Greeks were "True Leaders."

Fraternities joined forces to help build the winning Greek Week Float. Greek members worked hard putting together the final pieces of the baby Hokie Bird.

The Greeks of Virginia Tech proudly displayed their float at the Homecoming game. The Greek Week float came in first in the Homecoming float competition.
“Spirit Week”

Homecoming and Greek Week Combine For 1994

During the fall of 1994, the traditional Homecoming week festivities took a definite twist. Previously, Homecoming festivities were celebrated during the week of the homecoming football game and Greek Week was held late in the spring.

This year it was decided to combine these two events into one week. The goal of this was to help promote Greek life in the fall before formal rush took place in the spring.

For homecoming, each sorority paired up with a fraternity to celebrate the week. Some pairs played the assassination game, and others scheduled events such as roller skating, hayrides, bowling or bar nights.

While the many fraternities and sororities carried on their pre-Homecoming events and campaigned for their candidates, there were also several Greek Week activities planned. Such events included a drinking and driving presentation, letter day and Greek night at Arnold's. Many Greeks also teamed up to construct an all-Greek float for the homecoming parade.

The week was rewarding by the end. The Hokies crushed Temple, Alpha Delta Pi’s Amy Bullock was crowned Homecoming Queen, German Club’s Kevin Ickes was crowned Homecoming King, and Zeta Tau Alpha sorority was named the Greek Week champion.

EXCHANGING OF ROLES

Turnabout Day...

...both the upperclassmen and freshmen looked forward to this day.

Once a year a day was chosen to be Turnabout Day, a day when the upperclassmen acted like freshmen and freshmen acted like upperclassmen. It all started bright and early at 6:00 a.m. and ended that evening at 6:00 p.m.

For the upperclassmen the real fun started at noon, when they played their music loudly, ran down the hall and, in general, acted goofy.

Later that night at formation the freshmen experienced what it was like to make sure everything ran smoothly.

By the end of the day everyone knew what it was like to be in the other person's shoes.

By John Bowman
Freshman Josh True makes an effort to correct sophomores Barrett Majer and Jonathan Caron.

At formation, junior Marty Easter of the Hotel Company appears to have an identity problem with two nametags.

Freshman Mark Johannsen apparently is having trouble controlling sophomore Ed Hertling's attitude.
A cadet waits patiently for his victim to come into view so he can light them up with paint.

These Cadets move out quickly to capture their target and to kill their opponents.
Corps Paintball

Paintball, a relatively new sport here at Virginia Tech, has become increasingly popular with the Corps of Cadets. In fact, the Paintball Club was founded by Cadets, and was originally made up of only Cadets. Over the past two years paintball has become a frequently used method of settling company rivalries.

Games were usually set up through the Paintball Club and were held at different fields throughout the New River Valley.

This year a large company battle took place in the Jefferson National Forest and lasted for over two days.

“The best part of the day was when I had seven kills in one game, one of the cadets I killed was hit right in the face mask and the paintball broke making the person get a mouthful of paint,” said sophomore Steve Whitlock.

Even though E-Frat put up a valiant fight, they were not able to overcome the superior forces of the Hotel company.

The second day saw action between members of Delta, Charlie, and Bravo companies. Everyone had a great time.

Each company played with intense pride and honor. They knew that “bragging rights” went to the victor, but they also realized that they were all cadets.

By Michael Simon
Missing home...

At one time or another everyone has missed being back home, so every year the Corps of Cadets and the rest of Virginia Tech sponsor a Parents Weekend.

But for the Corps it was a little bit more than just having their parents visit.

On Friday evening they held an evening retreat to honor all those who had come to see their sons and daughters, then the next day they held a Pass and Review, with which to further entertain them.

The Cadets then introduced their parents to all of their friends and told them about all the fun they have had over the past few weeks.

This weekend not only gave the Cadets time to relax before having to hit the books again, but also gave them a chance to see their parents again.

By John Bowman
Freshman Nikki Phelps talks to her parents about what has gone on so far during the year.

The Corps of Cadets prepare to conduct retreat ceremonies in honor of their parents who have come to see them.

Senior Mike Simon waits with his parents while a friend prepares to take their picture.
Marching to Victory

The Ultimate Support

Everyone at Virginia Tech knows the effect good support can have on a team, especially the Virginia Tech football team.

No one understands this better than the Virginia Tech Corps of Cadets. Year after year the Cadets showed their support of the football team by marching in the homecoming parade and participating in the home football games.

Each year they also held their own banner contest to see which company had the most spirit. This year the Hotel Company won.

Even though they competed fiercely against each other they all understood that everyone must come together to win in the end.

By John Bowman
The Gregory Guard marches at the end of the parade. Support like theirs helped everyone get into the spirit.

The Color Guard marches in the parade displaying the flags. They always showed deep respect for the flag.

Cadets from the different companies carry the banners they painted in support of the Hokies.
A Corps member receives a mouthful of a shaving cream pie. This annual event brings out the fun in everyone.

Everyone gangs up on the person who is about to get creamed with a pie. Cadets were constantly going after those who were not covered in shaving cream.
“Take this!...”

...is what most people say before they smack someone in the face with a pie. Yes, it was the annual Corps Pie Day festivities. This event began first semester when cadets started bidding on who would have the honor of getting smacked in the face with a pie. A freshman cadet was then picked to “pie” one particular sophomore, junior and senior cadet.

This scene most closely represented controlled chaos. The event took place on the Shultz plain but cadets were chasing each other all over the place, and everyone who came left covered in shaving cream and water.

“I really had a great time putting shaving cream on everybody's faces. The whole time was great, I can't wait till next year, when we do it again” said freshman Nikki Phelps.

This day was a chance for the freshmen to have some fun going after their favorite upperclassmen, as well as getting creamed themselves.

The festivities weren't just confined to the Shultz plain forever though. Before and after the events began down on the plain, many freshmen rooms were attacked with “pie bombs,” so not only were they covered, but their rooms as well.

In the end everyone had a great time and will always look forward to the next Pie Day.

By John Bowman
Dressing Up...

Every year the Corps of Cadets held a Halloween formation. It was traditionally full of fun because everyone tried to outdo each other's costume.

Cadets wore a wide variety of costumes, ranging from superheroes and cartoon characters to villains and drag queens.

There were many "creative" costumes. Some of them were the ever popular Power Rangers, Batman, Civil War soldiers or the characters from the YMCA song that everyone knew so well.

The night of festivities ended after the formation and everyone went to dinner still dressed in their costumes, so that other people could see their creativity.

By John Bowman
Many people choose to dress like each other. These cadets dressed up like a group of evil killers.

Cadets have to wear uniforms every day. These cadets chose to emulate those from the revolutionary time.

Superheroes are a hot item at Halloween. These cadets decided to be a squad of Batmans.

Regimental Staff

120 Corps of Cadets
Leadership always starts at the top and this was no different with the 1994-95 Regimental and Battalion staffs. The Regimental staff was commanded by C/Col Jon Griese, the highest ranking cadet, and in the end he made the final decision. The Executive Officer, C/LTC Ray Kaczmarek, had the duty of training the freshmen. The Staff consisted of five seniors and one junior. The seniors represented the Administrative Officer (S-1), the Public Information Officer (S-2), the Operations Officer (S-3), the Supply and Finance Officer (S-4), and the Scholastics Officer (S-5). Each staff officer had a staff of their own to help them.

The main goal of the First and Second Battalion staff for the 1994-95 academic year was to ensure all the policies and standards set by the Regimental Commander and his staff were adhered to. The Battalion Commanders, C/LTC Kelly Dickerson and C/LTC Bryan Hatfield prescribed and supervised all activities of their four companies under their command. With teamwork and tolerance both up and down the chain of command both Battalion staffs ensured that their battalions kept top notch quality and achievement in their battalions.

By John Bowman

First Battalion Staff

Second Battalion Staff
Excellence has always been a part of the Corps of Cadets and this was no different when talking about the Alpha and Bravo Companies.

Alpha company has been in existence since the founding of this university. The company prided itself on three qualities which made up the basis for their motto: unity, pride, and self-discipline. Alpha company tried to instill these qualities in the upcoming classes which gave them the basis to lead a good life.

Another company which prided itself on excellence was Bravo Company. Bravo Company has shown itself to play an important part in the everyday life dating all the way back to the Spanish-American War.

Alumni from Bravo Company have served in every American conflict since the Spanish-American War, upholding their company motto of, “Excelling as Tech’s Military Elite.”

Even today, Bravo Company continued to embrace the professional and fraternal bonds which have been an important part of Bravo Company since 1872.

Both companies continued to carry on the traditions of the founding companies.

Alpha and Bravo Companies display their Homecoming banners to the parade onlookers.
Cadets let it all out at the Corps annual Pie Day festivities. Weapons included shaving cream and water.

Cadet Major Marta Moellendick leads her company during family weekends Pass and Review.
Excellence was something the Corps of Cadets prided itself on. This was still true when the Corps expanded in 1970, adding the Charlie and Delta Companies.

Charlie Company has had a strong sense of tradition and unity in the past twenty-five years and this was still true today. Charlie Company accumulated an impressive list of honors. They won three Kohler cups for the best drilled company. Also, in just the last twenty years they have collected nine Beverly S. Parrish Gold Cord Awards for the best overall company, more than any other company during that time period. Charlie Company had what it took to be one of the best companies in the Corps. They had the foundation for excellence with strong leadership and an eager following.

Delta Company since their inception accumulated many different traditions. The one that stands out the most was the annual release of a baby pig at Ring Dance. This event was started in order to spoil the Junior’s dance. Since it’s beginning it has been an important part of every Ring Dance.

Delta Company also strived to develop in its members what it took to gain good leadership and to work hard through academics.

By John Bowman
Tradition was no stranger in the Corps of Cadets and there were no two better companies who exemplified this than the Echo and Foxtrot Companies.

Originally formed as Squadron E, Echo Company was one of the top companies in the Corps. The members of Echo Company had a unique closeness that didn’t end when they graduated. This closeness was one of the main reasons they were now known as “E-FRAT: The Fraternity within the Corps.” The traditions which evolved from Squadron E were still alive today. They were traditions such as their Scavenger Hunt and the Veteran’s Day 24 hour Vigil.

When it came to tradition Foxtrot Company was no different. Company members were involved in many Corps activities such as Gregory Guard, Skipper Crew, and had a long line of Color Guard members. The Skipper Crew was a long-lasting F-Troop tradition.

F-Company was recently awarded the Kohler Cup twice for the best drilled marching unit in the Corps. F-Troop tried to help its members develop superior leadership skills for use after graduation as they pursued military and civilian careers.

Cadet Maj. Robert Shelton leads Hotel Company down The Mall during the Homecoming parade.

Cadet Josh True drops Cadet Jonathan Caron and Barrett Majer during Turn About Day.
In any organization, even in the Corps of Cadets, mischief was always present. This was never more evident than in the Golf and Hotel Companies.

From the beginning, Golf marched to a different drum, having a bar in the company barracks during the 1920’s, and a slight mishap with a TNT charge in the Rasche Hall dirt cellar. This mischief wasn’t the only thing that made up Golf Company. This reputation tempered to include a tradition of unity and camaraderie. At times Golf may have marched to a different cadence, but when the bugle sounded, Golf fell in and helped to accomplish the mission.

Hotel Company also had a colorful history of being re-designated, reorganized, and even retired on a regular basis. Many of the characteristics of The Hotel developed in the first 13 years of existence and survived despite many changes. Those early days were when Hotel got the reputation for being made up of the Corps’ “misfits” and practical jokers. The most obvious characteristic of The Hotel was the unit pride that developed strong protective ties. Although retirement was once again a threat, history has shown that it wouldn’t kill what The Hotel was.

Golf Company

Hotel Company

Golf & Hotel Company 129
The Highty-Tighties, the Regimental Band of the Corps of Cadets, continued its tradition of gaining national recognition. They represented the Corps and university in local, state, and national events. In its 112 years of existence the Highty-Tighties marched in dozens of parades and usually took top honors.

Last year they were honored to march in the Inaugural Parade for Governor Allen in Richmond. This year the Regimental Band was the highlight of the Gator Bowl parade in Jacksonville, Florida. Next year they will have the opportunity to march in the Macy’s Thanksgiving Day Parade in New York City.

The Band has repeatedly performed in Atlanta, Georgia, as a participant in the City’s largest holiday parade. Numerous performances in Washington D.C., as well as in Richmond brought the Regimental Band numerous awards and citations, including distinction as being the retired champion of the Presidential Inaugural Parade.

The continuation of their distinct marching style and pride in excellence allowed the band members to “Live the Tradition” that symbolized the Corps of Cadets Regimental Band.

Celebrating Past
And Present

Everyone at one time or another celebrates the past and present. Virginia Tech was no different.

Virginia Tech came into existence on March 19, 1872 when it was first known as Virginia Agricultural and Mechanical College. Since its founding, many people have served the university with great pride and sacrifice. Every year, faculty, students and parents gathered to honor those who have had exceptional academic and professional achievements.

The Corps of Cadets, who have been a part of the university since its founding, have always excelled in molding professional leaders who exemplified the quality of the university. Every year the Cadets honor those recipients of awards and honors with a pass-n-review and a retreat ceremony on the Drillfield.

This has always been a time when everyone can get together and celebrate those achievements which deserve merit.

By John Bowman
AUSA
ARNOLD AIR SOCIETY
RANGER COMPANY

The Virginia Tech Chapter of the Association of the United States Army (AUSA) was made up of cadets who believed that a strong, professional, modern Army was vital to our nation's defense. The Association provided its members supplementary training in the many skills required for superior military performance. The VPI Company was formed in 1958 and consisted of the most motivated cadet leaders of Virginia Tech: A tradition of "Good Training" that built the Army's finest officers.

The Arnold Air Society was a United States Air Force and Air Force Association affiliated service organization. The Robert E. Femoyer Squadron provided cadets a chance to learn more about the Air Force. They participated in events such as the Adopt-a-Highway, Special Olympics and held parties for disadvantaged youths in the area.

"To learn, to fight, to win." More than mere words it was the guiding philosophy of the VTCC Ranger Company. Technical and tactical proficiency, physical fitness, and academic excellence were crucial elements of what it took to be a Ranger. The Company's primary mission was to teach cadets the basic skills of a soldier. By John Bowman

134 Corps of Cadets
Cadets Kelly Dickerson and Jon Griese help another cadet rappel down the wall.
The Regimental Staff leads the rest of the Corps in the pre-game march on activities.

Scabbard & Blade
Scabbard and Blade was otherwise known as L Company, 7th Regiment, the VPI detachment. This organization began in 1938 to honor those cadet officers who displayed good academic standing, demonstrated leadership qualities and upheld the ideals of the Corps of Cadets. This organization was a honor society for seniors but also functioned as a service organization.

The Blue and Gold Society was the Navy R.O.T.C.'s service organization. They strived to assist Midshipmen in their moral and professional development as future Naval Officers. During the year, the organization hosted professional talks by staff members of the R.O.T.C. The organization also held a variety of activities and service projects throughout the year.

The Gregory Guard was formed from Company E-15 of the National Society of Pershing Rifles in April of 1963. The unit was named in honor of Sergeant Earle D. Gregory, who graduated from here in 1923. During the past year the Gregory Guard won first place in the annual Baltimore Christmas Parade. Integrity, humility, discipline, valor, precision and honor were all a part of the Gregory Guard.

By John Bowman

Blue & Gold Society

Gregory Guard
Many organizations were service organizations. However, a few also provided training for the future. One of these was the Navy SEAL Preparatory Team. This organization was for those who wished to prepare for a career in naval Special Warfare or Marine Force Recon. The specific mission of the team was to train for Basic Underwater Demolition/Seal, which was a six month program conducted at Coronado, CA. They operated by the motto, "The only easy day was yesterday." The Navy Sailing team taught its members how to do many of the things required to operate a sailboat. They conducted their training on Claytor Lake, near the New River. The team this year succeeded in qualifying all available 1st Class swim qualified midshipmen. In October four members traveled to GW University to compete in the annual Regatta.

The Sash and Sabre Society was founded in 1962 as a cadet service organization. Members volunteered their time to complete service projects for the Corps, university, and community as well. Members helped on projects such as Broomin' and Bloomin' and the Montgomery County Christmas Store.

By John Bowman
Tim Hayden helps to get another cadet ready to repel off of the wall.
Corps of Cadets
In the Corps there were groups which played an important role in sporting events. They were the Color Guard and the Skipper Crew.

The Cadet Color Guard consisted of seven members, six active and one alternate. These cadets were selected from the finest from their class through an interview process. These cadets were charged with "the guarding and carrying the colors of the United States of America." This included carrying them at every pregame home football game, basketball game, and Corps of Cadets reviews. The Color Guard also had the responsibility of teaching the other cadets how to do flag detail and also flag etiquette. This past year they had the opportunity to be on national TV when the football team took on the West Virginia Mountaineers.

The other organization which played a large role at sporting events and various other events was the Skipper Crew. The VTCC ceremonial cannon, The Skipper, was the descendent of the artillery batteries that existed in Tech's early years. The Skipper was fired at formal retreats, reviews, and also to signal scores by the Hokie football team. The two juniors and three sophomores who composed the Crew were trained in the safe use of black powder and muzzle-loaded artillery. Each crew member depended on all of the other members for his/her own personal safety. This dependence and trust that developed created a close knit and relaxed atmosphere.

By John Bowman

The Corps of Cadets Color Guard performs during the pre-game festivities of the WVU versus Tech football game.
The end of a person's college years marks the end of studying and the beginning of the real world. For the seniors in the Corps of Cadets this end marked the end of their training and education and the beginning of their military careers. Every year a new class of seniors graduated into their respective military services, and every year a new leadership assumed command for the upcoming year. This ceremony was called the Change of Command.

For these graduating seniors the year challenged them to show the skills that would allow them to have successful careers. They led by example, showing the other classes how to take care of various situations that arose. By doing all of these things the senior class made it an easier leadership transition at the Change of Command. The new leadership, the upcoming seniors of the class of '96, showed that they were ready to take command by performing flawlessly during the year in their respective positions. The new leadership took command and gave the outgoing seniors a pass and review in their honor.

This marked the end of a long year but also the beginning of a new leadership, the Class of 1996.

By John Bowman
The leaders of the outgoing class of 1995 and the Color Guard present themselves to the reviewing party during the Change of Command ceremony.
From the beginning in 1908 to today, the men's basketball team has strived to conquer any challenge that lies before them. After five rounds of games, the men's basketball team won the 1995 National Invitational Tournament held in New York City defeating Marquette University 65 to 64 in overtime. Also this year, the women's basketball team attended the NCAA, and the football team went to their second consecutive bowl game.
Varsity Sports had a great Soaring year with the football team to going to their second bowl high game to the men’s basketball expectations. team winning the 1995 NIT.
A Battle In The Ranks

Following in the footsteps of their 1993 season, Virginia Tech football continued its winning tradition, finishing the regular season 8-3. Tech also reached their highest national rankings in the polls in recent memory. The season was capped off with a trip to the Gator Bowl, the most prestigious bowl bid Tech has ever received.

Tech's overall winning record catapulted them to a regular season ranking of 15th in the USA Today/CNN Poll and 17th in the AP Poll. These high rankings were the result of many hard fought battles, including victories over rivals Arkansas (34-7), Southern Miss (24-14), Boston (12-7), WVU (34-6), Temple (41-13), ECU (27-20), Pittsburgh (45-7), and Rutgers (41-34). Losses were handed to Tech by Syracuse (28-20), Miami (24-3), and unfortunately UVA (42-23).

However, Tech was able to seek revenge against UVA in a most unusual way. Tech, much to the surprise of UVA, headed to Florida for the Gator Bowl and $1.5 million, while UVA headed to the Independence Bowl, which Tech had conquered the previous year. Overall, another successful year for Coach Frank Beamer and the Hokies.

by David Dart

I know they're here somewhere. Dwayne Thomas (42) once again carries the ball down the field, helping the Hokies to gain another victory. Thomas proved to be an asset to the team as he lead the team in rushing 655 yards.

Jim Druckenmiller (16) makes a pass to keep the ball moving down the field.

Football
Antonio Freeman (80) avoids the Pitt defense allowing Tech another touchdown. Freeman captured the school record for touchdown receptions with 22, half the catches went for 45 yards or more.

With Maurice DeShazo (12) taking charge, the Hokies crush Pittsburg with a score of 45 to 7. DeShazo's success lead him to become one of two Tech players to ever pass more than 2,000 yards.
Doing what he does best,
DeShazo (12) prepares to pass for a touchdown.
DeShazo was Tech’s career leader in touchdown passes with 47 during the 1994 season.

This is gonna hurt...
Ken Brown (44) and Cornell Brown (58) show Tech’s great defense, tackling one of the Arkansas’s players.
That's what you think. Jim Baron (92) blocks the Temple player from advancing. Baron suffered a hip injury which slowed him down late in the season.
Gator Bowl Fever!
Nothing else can describe what enveloped the Hokies and Tech alumni as the end of 1994 drew near. Tech, ranked 17th, faced unranked Tennessee. Even though they were not ranked, the Volunteers rolled over the Hokies 43-27. Head Coach Frank Beamer attributed the loss to “too many turnovers and too many long plays [by Tennessee].” Well, maybe the Hokies enjoy fighting for independence more than steak.

by David Dart
Zoom! Bryan Still rushes the ball, gaining yardage against Tennessee. During the season he lead the BIG EAST in kickoff returns averaging 25.9 yards on 19 returns.

Yea! The crowd roars as the Hokies take the field for an exciting game.

When the walls come crumbling down...
Brian Edmonds (32) shows great effort as he tries to break away from Tennessee players.
New Heights All The Way

In the second season for Women's Soccer, the Lady Hokies strived to improve its record from last year as well as raise the level of soccer at Tech. With a vast majority of the team being newcomers, it was essential for team captains Patty Fountaine and Sarah Schwark, along with the rest of the veteran players, to provide leadership and support for the newcomers. Coach Sam Okpodu and assistant Anne Brennan set standards as well as expectations for the team.

The season opened with an impressive 6-0 record establishing a new school record. As the season progressed, injuries plagued several key players. With tough losses in the middle of the season, the team bounced back to end 1994 with an 8-11 record, another school record.

Next season, the team hopes to fill the leadership roles of the four graduating seniors, and find a balance between returnees and new recruits for a promising future.

by Shannon Mullen
“Let’s hold hands!” Courtney Sims (11) and Samh Schwark (15) show teamwork as they rally for the ball. Tech won a close game against American University, 1-0.
"This one's mine!" Team co-captain Junior Cummings(3) shows his skill as he prepares to pass to a teammate. Cummings had a personal season high of three assists.

"Not in my net!" Sliding to kick the ball away, goalkeeper Jon DeLong makes one of his 95 season saves.

"Now you see it, now you don't!" Midfielder Matt Sleightholm(17) leaves his opponent slipping in the mud. Matt Sleightholm, Rodney Walsh and Chris Edmonds made the All-Metro Second Team.

Men's Soccer

A Rocky Season

The 1994 season for the Virginia Tech Men's Soccer Team was a rebuilding year. With a young team, the Hokies had one of the toughest schedules in history, playing six of the nation's top 25 ranked teams. Despite outplaying most of their opponents, the team ended the season with an 8-12 record. A highlight of the season was when three outstanding Hokie players were named to the All-Metro second team in 1994; senior Rodney Walsh, who ended his career with 14 goals and eight assists, junior Chris Edmonds, a co-captain of the team, and sophomore Matt Sleightholm, who started 18 of the 19 games for the Hokies. Another highlight of the season was Adam Johnson's record tying three assists in a game. The season ended on a good note in a win over Radford. One of seven shutouts this season, the victory over Radford helped Tech keep the title of The New River Rock.

by Ryan Spencer

Men's Soccer
The Women's Volleyball team had a season of adjustment after incorporating three new members to the squad. Redshirt freshmen Terrie Zubert, leader in kills and serving aces with 336 and 60 respectively, Megan Barnes third in kills on the team with 230, and Lynelle Slade added new depth to the 1994 squad.

The team, according to middle blocker Jennifer Schmidt, is one that "thrives on emotion" and "works well together."

Completing the season with a 12-20 record, the Lady Hokies accomplished a great deal of rebuilding. Unfortunately, the team must say farewell to three key seniors; captain Amanda Yelsh, second on the team in assists with 304, Jennie McFadden and Stephanie Smith, who all contributed with both great skill and inspiration.

Next year's team will look for contributions from all returning players and two redshirt freshmen.

by Jay Johnson
Middle blocker Jennifer Schmidt and outside hitter Terrie Zubert stuff Radford's feeble hit attempt.
"You can't touch this!"
Terrie Zubert (6) tries to shoot around Mason blockers. Zubert ended the season with 336 kills.

Volleyball
Jennifer Schmidt (18) adds another scratch in the kill category. She had 255 kills, second on the team this season.

“Holy Schmidt!”

Jennifer Schmidt (18) adds another scratch in the kill category. She had 255 kills, second on the team this season.
Winning the Metro Conference Championship for the first time since 1989, Coach Steve Taylor (Metro Coach of the Year) brought the glory days back to the Men's Cross Country team. Tech stepped into national rankings after tying William and Mary, landing in the number 23 slot. Tech went on to place fifth among 41 teams at the District III Championships, a regional qualifier for the NCAA Championships.

As for the Lady Hokies, they started out the season with a bang, winning the Western Carolina Invitational and defeating Duke in a dual meet. They also had a solid performance by placing sixth out of 16 teams at the Texas A & M Invitational.

However, Tech slipped at the Metro Championship, placing fourth. They placed 22nd at the District III Championships.

By David Dart

Cross Country
This is easier than I thought. Tom Lankowicz keeps an eye on the finish line as he sprints the last of the race.

Final Determination. Melissa Ward, an engineering major, runs down the final stretch of the race with her teammate.
NCAA
Bound, Again

They say behind every great man is a great woman. That was true for the women's team as they continued a winning tradition along with the men's team. After going 22 - 9 in the regular season (10 - 2 in the Metro, first place in the conference), the women Hokies got a bid to the NCAA Tournament, where they defeated St. Joseph's 62 - 52 in the first round. Unfortunately they were badly defeated in the second round by undefeated, top ranked Connecticut. However, the women had an outstanding upset victory winning against one of the nation's top women's basketball programs. They defeated ninth ranked Virginia 69 - 62. Special mention went to Jenny Root, All-Metro Player of the Year, and Christi Osborne who was named to the All-Metro Team. 

By David Dart

Should I be nice and pass or... Terri Garland (10), having just stolen the ball, considers her next move. Garland averaged 4.8 assists per game during the regular season, totaling 116 assists overall.

Women's Basketball
Peekaboo! Sherry Banks (12) shields the ball from UNC Charlotte players during a heated game. The Hokies won by the score of 68-55.

Women’s Basketball
Soaring To The Higher Expectations

Intense. Nothing else can describe the Hokies basketball team or their fans. Except maybe extremely loyal. Even after the team suffered two losses in a row near the close of the season and lost their chance for a bid to the NCAA, the fans remained loyal. Coach Foster rewarded this loyalty by pulling an "Ace" out of his sleeve and coaching the Hokies to the 1995 NIT.

Showing loyalty, the fans filled the Coliseum in the NIT showdown versus New Mexico State and supported the team in its 64-61 victory. By the final four of the tournament, the team had surpassed the school’s best season record. Capturing the NIT title 65 - 64 in OT against Marquette gave Tech a final record of 25 - 10 and their first NIT title since 1973. Needless to say, the fans went crazy.

By David Dart

Ball, face, what’s the difference? Ace Custis (20) attempts to block the ball during the game at UNC Charlotte. While suffering defeat this time, the Hokies took revenge on the 49ers later defeating them by 14 points at home.

Men’s Basketball
Hey, if Ace can do it... Shawn Smith (42), flying through traffic, attempts to sink the basket. Smith went on to score the winning points in the NIT championship game.

My ball. Get your own. David Jackson (4) debates whether to shoot or pass. Tech went on to defeat Clemson and advance to the NIT second round.
I love trampolines!
Shawn Good (21), out-jumping the Charlotte opponent, scores two points for the Hokies. Good proved to be an asset to the Hokies once again.

Men's Basketball
Help! I'm stuck. Ace Custis (20) jams the ball, pleasing the crowd and awing the bystanders. Custis was a crowd favorite this season.
The Virginia Tech Cheerleading Squad
First Row: Kolleen Wilburn, Kim Allison.

Holy @#?! The Hokie Cheerleaders show their strength in their different stunts. They supported the Men'S Basketball Team all the way to the NIT Championship game.
Go Hokies!! The Cheerleaders practice one of their pyramids before a home basketball game.

Rah Rah Rah
Sis Boom Bah

The Virginia Tech Cheerleaders had a hard job to fill. They not only had to promote school spirit, lead the crowds in cheers and rallies, show support to the various varsity teams, and help with the pep rallies every Thursday night, they also had to be physically fit in order to do the job in the first place. The squad practiced as much as two to three hours a day in order to prepare for upcoming games and events. They also spent time working out in the weight room. In addition to all of their normal activities, the cheerleaders also attended two national competitions. In the Metro Conference Cheerleading and Dance Competition they finished in a strong third place. Also, in the UCA National Cheerleader and Dance Championship held at the MGM studios in Orlando, Florida they finished in the top fifteen. Also, in the mascot division of the championship the Hokie Bird was the national runner up while Kelly McGinnis and Jason Oates placed as national runner ups in the partner stunt division of the championship.

By: Jennifer Dye
An Indoor Success

The wise competitor noted that second place is also first runner-up (pardon the pun). While Tech’s Men’s Indoor Track team began the season with a win at their invitational meet, by the end of the season, Tech had moved to second place overall in the Metro Conference behind state rival Virginia Commonwealth University. The women did just as well, starting the season with a fifth place finish at their invitational and ending up second in the Metro Conference behind University of South Florida. The women’s climb can be attributed to many individuals’ contributions such as junior Meredith Newby who, after a throw of 49 feet, 5.75 inches, received an invitation to the 1995 USA Track and Field Indoor National Championships, where she placed ninth with a personal best throw of 51 feet, 3 inches. This improvement demonstrated the reason Tech was so successful this year. Sadly, 1995 marks the end of Tech’s participation in the Metro Conference as Tech moves to the Atlantic 10.

By David Dart

Only one more lap... Michelle Palmertree paces herself as she competes in the 1000m race. She won this event during the meet hosted by Hokies with a time of 3:08.3.

Mercy? Kaegan Yager gains points as he almost pins his opponent. Yager saw a lot of action as a freshman, hoping to improve his stats in future years.

Let me go! Newcomer Jeffrey Montague tries for an escape in order to gain two points for the match. He ended his first season with a 3-8 record.

Wrestling

Courtesy of Sports Information
A New Beginning

As is typical of a team in the rebuilding phase, Tech’s wrestling team attempted to regain its winning form this season. However, only a 6-10 record was compiled. This was encouraging though, considering that over half of the members of the squad were true freshmen. But there were a number of notable standouts and leaders, both on and off the mats. Senior Matt Burlingame, at 150 pounds, led the Hokies with a personal record of 19-12. In support was Matt Mogel, Tech’s heavyweight, who turned Tech’s personal best record at 24-10. Off the mats, Jun Davis earned the grade by making the All Academic Team.

By David Dart
Not Without A Splash

While they did not lap last season’s record, the Hokies did succeed in maintaining a winning edge. The men finished the season with a dual meet record of 7-3 and placed fifth at the Eastern Intercollégiate Championships. The women finished the season with a 5-4 record and a sixth place finish at the EIC. The teams defeated Davidson and Evansville, however, at East Carolina University only the men won. Tech also lost to Virginia but came back to defeat VMI in ten out of 11 events at home. Then at the Virginia Tech Invitational, the women’s team finished first while the men’s team placed second. Tech then won three of their last five dual meets to end the season, defeating Howard, West Virginia Wesylan and Old Dominion but losing to West Virginia and South Carolina.

At the EIC, Tech senior Collins Trimble set three school records: swimming to times of 1:50.58 in the 200 I.M., to break the record he set in 1994, 3:57.19 in the 400 I.M., and 1:50.10 in the 200 meter butterfly. On the women’s side, sophomore Martha Peck attended The Zone Diving Championships in Lexington, KY, placing 30th.

A Strong Follow Through

The golf team played under par this season as they travelled to various tournaments on the eastern seaboard. The Hokies tied for sixth place at the Cleveland Golf/Augusta Invitational with Curtis Deal leading the Hokies with a fifth place finish, only eight shots off the leader. Tech then went to Richmond winning the Metro title with senior Brian Sharp's sudden death overtime win. The title was Sharp's fourth collegiate title and qualified him to the All-Metro team, making it his fourth time to make the team. Then it was off to the Palmetto Intercollegiate Championship where Tech was the defending champions. However, they placed only ninth, giving up their title. Not letting defeat get them down, Tech rebounded, placing second at the Cavalier Classic, with only ten shots behind North Carolina State.

By: David Dart
By Leaps And Bounds

The baseball team had their ups and downs this season. They started off the season strong by defeating neighboring rival Radford University as well as NC AT&T and East Carolina University. By mid season, the Hokies had a 13 - 7 record. However, by the beginning of May their record was only 27 - 22. Standouts included Brian Fitzgerald, who pitched a no-hitter during a game against James Madison University and Bo Durkac who eclipsed the previous Tech record of most doubles in a season at 57. With seven games still left in the season it’s hard to tell how their record will turn out. Also, the Metro Tournament, which will be held in Charlotte, N.C., begins on May 17 through the 21. Overall, the Hokies baseball team had a good season and are looking forward to a better season next year.

By: David Dart
I think I've got it!! A member of the team runs to catch the ball while one of the outfielders comes forward to help.

Aiming for the plate. Brian Young throws the ball to the batter from UNCC.
I got it! Second baseman, Mike Terhune, leaps for the ball but not before the UNCC player reaches the base.
You’re outta there! Junior David Fitt attempts to get the UNCC player out.

Virginia Tech Baseball

he men and women outdoor track teams had marginal spring seasons, the women improving slightly from their indoor season, the men falling behind their indoor performance.

First up was the Colonial Relays where the men placed eighth of sixty teams and the women placed twelfth. Next was an invitational tournament where the women placed second to Appalachia State and ahead of NC State. The men placed behind both schools. At the Metro Conference Championships, the women placed second due in part to sophomore Michelle Smith’s first place finishes in both the shotput and discus while the men placed third. 

By: David Dart

Going for the distance.

A member of the men’s outdoor track team participates in the long jump event.
Here I go... A member on the women's lacrosse team runs downfield in attempt to score a point.

A Rocky First Season

In their first season as a varsity sport, the women's lacrosse team received a harsh awakening. After winning their first game against Hollins College 21-2, the ladies dropped six straight games to rivals Goucher College, Colby College, George Mason University, Davidson College and American University. However, the lady Hokies found their pride and came back in their final home game of the season, where they defeated Monmouth College 13-7. Even though the season was not as strong as the team would have liked, the women's lacrosse team was already looking towards next year with improvement on their minds. Freshman Amy Mantooth looks to be one of the Hokies rising stars as she lead the team in scoring.

By: David Dart

Women's Lacrosse
A Season of Aces

Quiet please!! As a hush falls over the crowd, the barely audible sound of a racquet rushing through the air could be heard. An instant later, a tennis ball streaked by an American University player on the court. And the Hokies Women’s Tennis team served and vollied to another victory enroute to a 3-0 dual match record for the fall season and many more individual wins. Tech romped American University and George Mason 9-0 and defeated WVU 5-1. Secretly, head coach Anne Jones was probably a little more than "very pleased with the way the season ended" since three of the team members went to the ITA Regional Individual Championships in Philadelphia.

By David Dart

Katherine Chen returns the ball. She finished the fall season with a record of 14-2.
Woman's Tennis Team

*Did that make it over?* Jennifer Lampert gives an explosive serve. She won the match, giving her a record of 8-3.
Striking back. One doubles partner lob the ball back against his opponent while his teammate moves toward the net.

I'm ready for you!
Waiting in anticipation, a member of the tennis team gets ready for his opponent to hit the ball towards his side of the court.

Men's Tennis Team
A Grand Slam

The men's tennis team came off from a strong fall season and continued their winning streak into the spring. They defeated Wake Forest University, West Virginia University, Hampton University, Old Dominion University and the University of North Carolina.

However, the team lost to state rival University of Virginia and Vanderbilt. Heading into the post season, the Hokies placed third in the Metro Conference Championships by defeating Louisville University 4 - 0, and Tulane University 4 - 2 in dual matches. The Hokies ended their spring season with a dual match record of 12 - 8.

Standouts this season for the team included Oliver Mayo, a freshman, who was Tech's best singles player. He also teamed with teammate, Miki Pusztai, to become the leading doubles team for Tech this season.

play the sport they loved.
Club sports have been around since the beginning of the university. With over 40 club sports to choose from like the Mountain Bike Club, the Paintball Club, the Skydiving Team, or Crew, students had the opportunity to participate in a number of different sports. Some club sports had a rigorous practice schedule with tough competition that could be compared to equal some varsity sports while others allowed the students to just enjoy the sport.
The Blacksburg Ultimate Team, previously called Ultimate Frisbee, was an excellent club to join if you enjoyed a fun, fast-paced environment. The game was quick and energetic, ideal for those with a competitive attitude.

The Blacksburg Ultimate Team competed intercollegiately as well as within the club. The club, which was comprised of both men and women, was a great opportunity to get involved in one of the fastest growing and spirited organizations on campus.

For those students who loved the game of volleyball, then the volleyball club was for you. The Volleyball Club took first place in the Virginia Tech, the Villanova University, and the EIVA Southern Conference Tournaments, and placed second in the UVA and UNC-Greensboro tournaments. Mark Schuler and Ross Zirkel received Olympic Festival Invitations.

A member of the Blacksburg Ultimate Club runs toward the frisbee. This fast-paced game often took place on the Drillfield, which gave members plenty of room to run around.
Concentrating on the ball, a member of the Volleyball Club prepares to bump the ball to a teammate. The Volleyball Club gave students the opportunity to play competitively while still having fun.

A member of the Volleyball Club jumps up in anticipation of spiking the ball over the net and stopping his opponents from scoring.
MEN’S RUGBY

Once again, the Men’s rugby team proved that real men don’t wear pads. The many long, hard practices that the team put in paid off this season, as the team went undefeated in the regular fall season with ten wins. The courage and the skill that it takes to play rugby was evident with each game, with bruises and black eyes as proof to just how rough the sport really was.

The sixty team members, which compromised one of the most competitive rugby clubs in Virginia, were ranked in the top ten on the East Coast.

WOMEN’S RUGBY

After coming off of a winning season, the women’s rugby team had high expectations for the 1994 season. The twenty-three team members practiced long and hard in the hopes of retaining their title as state champions. Although they lost to Radford and James Madison during the fall season, they went on to beat Longwood College and the University of Virginia, and then moved to the state tournament, where they placed fourth after beating Mary Washington College.
Players from the opposing team try to tackle one of the Virginia Tech players as she runs down the field.

A men's rugby player attempts to outrun his opponent in order to score. The men's rugby team went undefeated this season.
Members of the United Martial Arts club practice their defense techniques taught by the instructor. Martial arts taught concentration and strength as well as trying to define skill.

Martial arts students practice their techniques one on one with each other. Martial arts taught philosophy as well as self defense techniques.

Using strength and determination, this gymnastic student works on his routine on the parallel bars.

Gymnastic students practiced for long hours to define their technique. This gymnastic student practices her routine on the floor before attempting it at a higher level.
Gymnastics was a sport that required strength, skill, flexibility and overall fitness and grace. Gymnastics was not only a team sport, but an individual one. The Gymnastics club offered time for both experienced and non-experienced gymnasts to practice their skills and to meet new people. During the week, gymnastics of various levels practiced skills from forward rolls to back tucks. Experienced students were also there to help those who wanted to actually learn a little about the sport.

Martial arts clubs offered training to students in everything from philosophy, and survival tactics to conditioning and physical fitness. The variety of classes offered levels of training from beginning to advanced. The variety of clubs at Virginia Tech included Aikido of Virginia, American Freestyle Karate Club, Tae Kwon Do, and Unified Martial Arts. The classes ranged in size from individual one-on-one training to group training with practices being held once or twice a week.
UNITED SOCCER

Walking by the Field House one night, you might have come across a motley crew of bloodied participants of the game of soccer, returning home from a late game. United Soccer was an asylum for these students of the defining sport of our world, and due to popular demand, the United Soccer league created a program here to fill the void left by the university's decision to cut the Intramural Soccer program.

The league consisted of two levels of competition, the Premier league and the Competitive league. The Premier soccer league was designed for the more talented, varsity potential soccer players. The games were generally tougher, and the players sharpened their skills and adjusted to the college level of competition. The Competitive league was designed for those who showed an interest in soccer, but played merely for the love of the game.
During a United Soccer game in Rector Field House, players from the PK team try to outmaneuver the opponent from the White Fury team.

Here a soccer player attempts to score on his opponent during an indoor soccer game. Offensive foot skills are an important part of the game in soccer.

Two competitors struggle for control of the ball during an indoor fall soccer game. The United Soccer League played in the fall and also in the spring semesters.
PAINTBALL CLUB

For anyone who liked to play war games and loved the outdoors, the paintball club was for you. The paintball club was an excellent way to meet people and have a great time while having fun outside. For Corps members and civilians alike, the Virginia Tech Paintball Club provided a fun workout and developed skills which gave you valuable experience now as well as later in life. The nineteen members of the Paintball Club, as well as others, often traveled to Lynchburg, Virginia to play. The Paintball Club competed in games during the whole year - in the spring and fall as well as in the winter. For students who were looking for something fun to do with their weekends, a few welts were quite a cheap price to pay for an exciting game of paintball.

A member of the Paintball Club aims at a fellow club member. The Paintball Club competed in games during both the spring and fall semesters.
A Paintball Club member takes a shot at the photographer. During the semesters, different Corps companies held paintball tournaments against one another.

Members of the Paintball Club gang up on other members to try and win the game. The Paintball Club consisted of 19 members.

Paintball Club

A member of the Mountain Bike Club heads up the trail on Old Farm Road. Bikers had to be careful of fallen branches and other debris.

Virginia Tech's Mountain Bike Club

Biking their way up a trail, club members, make the most of the good weather. Jefferson National Forest offered many trails for bikers to ride.
Mountain biking, one of the fastest growing sports in the country today, found a home right here in Blacksburg. Situated in the beautiful mountains, the Virginia Tech campus was an ideal place to bike. Just minutes away from the Jefferson National Forest, anyone interested in mountain biking or just looking for an exciting, fun-filled sport, which provided a break from the long hours of classes and books, should definitely check out the opportunities which mountain biking had to offer. The growing popularity of mountain biking was, however, not without its problems. Overcrowding of trails, and conflicts between hikers, horseback riders, and mountain bikers caused trails in some areas of the country to be closed to the mountain bikers. Anyone interested in mountain biking in the area should contact the Virginia Tech Mountain Bike Club for more information.
FENCING CLUB

For anyone interested in the age old art of attack and defense, the Fencing Club was for you. Not only could you learn the basics of fencing, but you could also make lots of good friends while having fun at the same time. Whether you were just looking for a good time, or an experienced fencer, the Fencing Club had a place for you. While learning to parry, thrust, and dodge the foil, a member of the Fencing Club learned the valuable lesson of self defense, while also staying in shape.

SCUBA CLUB

Just because Virginia Tech was situated five hours from the nearest ocean didn’t mean that one can’t enjoy the sport of scuba diving. The Scuba Club didn’t maintain a regular practice schedule, but when they did practice, the club practiced in the swimming pool in War Memorial Hall. Like all clubs, the Scuba Club was an excellent way to meet people, while you learned a sport that provided hours of enjoyment.

Two members of the Fencing Club practice their lunging techniques. Members wore protective gear so as not to get hurt.

Scuba Club members check over their equipment before entering the pool in the War Memorial Hall.
This member of Scuba Club practices his underwater breathing techniques before he attempts to submerge.

Fencing Club members learn techniques such as thrusting, parrying, and dodging the foil. These members practice their fencing strategies.
One member of the Skateboarding Club makes a daring jump over a table in Washington D.C.

Skateboarding Club

Juggling Club

Two members of the Skateboarding Club take a break outside of Dietrick Dining Hall. Skateboarders were only allowed to practice between the hours of 7 - 11 p.m.
SKATEBOARDING CLUB
One of the newest clubs on campus this year, the Skateboarding Club started in the Fall of 1994 by Vinny Rhinehart, a sophomore in graphic design. The Skateboarding Club worked with VA Tech and the town of Blacksburg to begin building a park where skateboarders could "legally" practice. Currently, there was a policy that no skateboarding was allowed on campus except from 7-11 p.m. behind Dietrick Dining Hall. Skateboarding off campus was allowed, but there was no central place to meet.

JUGGLING CLUB
One of the most amusing and fun clubs to watch on the Virginia Tech campus was the juggling club. This entertaining sport, which took hours of practice, was an excellent way to meet people, have fun, and improve your coordination skills. For beginners and expert jugglers, the Juggling Club met on Thursdays to practice.

One of the newest clubs on campus, the Skateboarding Club has around 30 members in the organization. A member of the club practices his moves.
SKYDIVING CLUB

The first question which one might ask the seven members of the skydiving team and twelve members of the skydiving club was why skydive? The mere presence of the lurking danger and great fun of the sport was answer enough, but added was the call of the great outdoors, the rush of adrenaline and sometimes the fear of heights. The members of the Virginia Tech Skydiving Club traveled to Orange County, Virginia to make their jumps. Expert skydivers as well as those who would like to become involved with the sport were welcomed into the club. For beginning members of the club there was a fee for training but as members made more and more jumps, the prices fell so that one could make a jump for almost no cost at all. The Virginia Tech Skydiving Club was excellent for students who wanted a fun, exciting break from the books and was a great experience which one will never forget.
Skydiving Team

Front Row: Marc Goracke, Bobby Page, Chris Williams, Ian Loomis.  
Back Row: Stephen Wilkes, Ru Gakhar, Dan Fabio.

Skydiving Club

Steve Hunter and a friend of his skydive to the ground. The Skydiving Club made their jumps in Orange County, VA.
The fifty members of the Crew Club practiced long and hard, often rising early in the morning to meet at Claytor Lake to practice. In the end, the hard work and dedication seemed to pay off, with both the men's and women's teams winning competitions.

The Crew Club's women's Lightweight 4 won the Big East and the Charleston Regatta and placed fourth at the National Vails Regatta. The men's Lightweight 4 won the Charleston Regetta, while the Men's Novice 8 won the Head of Rivanna Regetta. Both the men's lightweight 4 and the men's Novice 8 won the Occoquan Chase Regetta.
Members of the women's Crew Club practice their strokes during a practice. Crew Club also did other training by running, working out and lifting weights in order to get in better shape.

CREW CLUB

ARCHERY CLUB

While most students were in their rooms taking aim at their books, the members of the archery club were taking aim at their targets. The archery club, which existed mainly for recreation, was an excellent opportunity for both the beginner and the expert alike to improve their skills.

The archery club met twice a week to practice their shot and to improve their friendships. The club provided equipment as well as instruction to all who were interested in the sport of archery.

WATERSKI CLUB

If being pulled behind a speed boat over water was your idea of a good time than the waterski club was for you. The waterski club provided a break from the books and at the same time improved your skill and agility while providing a competitive environment.

The Waterski Club competed nationally, and won the Eastern Regionals then went on to place eleventh in the National Collegiate Waterski Association competition in October.

Archery requires intense concentration and a steady arm. Before letting go of the arrow, one must take steady aim and be sure of one's mark.
Down on one knee, a member of the archery club carefully takes aim before sending his arrow flying towards the target.
HIGH TECHS

Despite the ease with which the High Techs appear to perform, the nationally ranked Virginia Tech High Techs spent much time practicing. With routine activities such as weight lifting and aerobics, added to a rigid practice schedule, the High Techs had little time for other activities.

The High Techs practiced and performed during the entire school year and were often seen at sporting events. They were a favorite during half time of home basketball games and were often seen performing for the student body, faculty and staff at various other events, such as pep rallies.

However, the hard work and dedication which went into the High Techs performances and routines paid off. This year, the High Techs participated in a national competition where they ranked highly with the judges.

While the High Techs continued to perform routines of music and dance for large crowds, they also continued to amaze the crowds with their gracefulness and agility.
In perfect synchronization, the High Techs perform a difficult maneuver while performing for thousands of spectators.

With the Hokie Bird dancing along, the High Techs perform during a halftime of a men's basketball game.
For those interested in guns and marksmanship, the Clay Target Club was ideal. The club competed nationally in skeet, trap and sporting clays. Open to any major, and to both men and women, the Clay Target Club, a growing organization on campus, was an excellent club for those who enjoyed target shooting. It provided students a chance to meet new people while having fun at the same time.

While competing in the National Trap and Skeet tournament, the Clay Target Club placed seventh in the American skeet, International skeet and International trap divisions, ninth in the Sporting Clay Division, fifth in the American Trap Division, and sixth place overall. Club member Marion Packett was named to the NRA All American Shotgun Division.

Members of the Clay Target Club hunt for a target as they reload their weapons. The club gave students the opportunity to practice their skills while meeting new people at the same time.
Taking careful aim, a member of the Clay Target Club practices his skill with a rifle. The club also allowed students to compete on a national level basis.
WOMEN’S LACROSSE

The Women’s Lacrosse Club finished another exciting season. Playing a full schedule during the fall season, the women’s Lacrosse Club advanced to the post-season Hollins Tournament where they finished with a record of 4-3. Caroline Meador was selected to the All-State Team for Women’s Lacrosse.

Women’s Lacrosse was a challenging sport, and ideal for anyone interested in playing a fast growing and fast paced game.

MEN’S LACROSSE

The Men’s Lacrosse Club once again finished an excellent season, working hard all during the season to keep the thrill and excitement of the game alive.

The Lacrosse Team competed in the VMI Men’s Lacrosse Tournament and posted a 3-0-1 record. In the Tournament, the club beat Shenandoah College, Mary Washington, and Virginia Wesleyan College, and tied with Radford University.
Defenders attempt to prevent the opposing team from scoring a goal during a spring game.

A member of the Women’s Lacrosse Team attempts to pass the ball downfield to one of her teammates.

Two opposing players attempt to get control of the ball without hitting each other.
The original McBryde Hall, which was completed in 1917, was the first campus building to be built in the neo-Gothic style. The building was named after John M. McBryde, Tech's fifth president from 1891 to 1907. However, the new McBryde Hall was completed on the same site in 1971. McBryde Hall held several departments such as math, political science, history and computer science as well as big lecture classes for chemistry and biology.
From a decrease in the Arts Achieving and Sciences graduation excellence requirements to new through computer technology in the classrooms, we buckled down for another year.
Returning students were shocked when they looked over the calendar for the upcoming year. Classes began on Monday rather than Tuesday. For most students, this change in schedule proved to be both frustrating and inconvenient.

Students living on campus could not arrive until Sunday, so not only did they have to move in and try to organize their dorm room, but they had to buy books and fix schedules. On Monday, students still had to fix up their rooms, stand in lines, buy more books, and deal with Express Check-In. In other years, Monday was like this, but a big factor was left out: classes and homework.

This year, in addition to all these worries, students had to adjust to school and homework all within one day.

Although, students living off campus did not feel the pressure quite as badly, Monday classes still took their toll. Meal plans, Dining Dollars, and other Express Check-In problems could not be handled until Monday. Even the most prepared students had to deal with lines and the inconvenience of Monday classes.

Christian Robey, a junior in philosophy agreed with most on-campus students, “Plain and simple, it takes more than one day to move in; the time spent unpacking needed to be used getting ready for the next day.”

Most students agreed that Monday classes were poorly planned and hoped that future semesters would once again start on Tuesdays.

By Tonya Clark

“IT TAKES MORE THAN ONE DAY TO MOVE IN; THE TIME SPENT UNPACKING NEEDED TO BE USED GETTING READY FOR NEXT DAY CLASSES.”

C. ROBEY, A JUNIOR IN PHILOSOPHY.

Collegiate Meat Judging Team

Agricultural Technology Club
Due to the fact that school began on a Monday rather than the usual Tuesday, students had a hard time adjusting. Most students tried to stay awake, but after all the moving in and waiting in lines it was difficult to keep their eyes open. Classes seemed to be the ideal place to catch up on the lost sleep.

Dr. Barbara Carlisle's acting class in the Performing Arts Building takes it easy for the first day of the semester. The first day of class is typically on Tuesday, so the schedule change caused quite a bit of stress for the students. The relaxation techniques they learned in class came in handy, for that day as well as the many to come.
Students graduating under the College of Arts and Sciences were informed of good news last spring. The minimum amount of graduation requirements was lowered from 126 to 120 credits, a decision that went into effect the day after the 1994 spring graduation. Although recent graduates were not affected by this decision many upcoming students in this college benefitted from the change. “I was really excited when they reduced the requirements because now I’ll be able to graduate a semester earlier than I had expected,” said Ellie Chisko, a senior in liberal arts and sciences.

In order to graduate from the College of Arts and Sciences students must retain a 50 credit hour maximum and a 30 credit hour minimum in each discipline for a degree and at least 12 credits of elective courses. The College of Arts and Sciences Core Curriculum was six semester hours in Areas 1, 2, 3, 5; three credits under Areas 6, 7 and eight credits in Area 4. Students were also required to complete the necessary courses under the University Core Curriculum, which was a total of 38-41 semester hours.

A reduction of six credits may have seemed minute, but once they began taking classes to satisfy the requirements for graduation it was noticeable. “Six hours means two less classes which I have to take, and it will make it easier to graduate in four years because I can take fifteen hours a semester every year,” said Kevin Parsons, a freshman in psychology.

By Nicole Dumas
Brian Fowler, a junior in communication studies, signs up to receive information from various graduate schools in which he is interested. Juniors prepared themselves early for the tedious process that lay ahead of them. Being accepted to graduate school required lots of time and hard work.

Robin Stitely, a junior in biology, listens intensely to a school advisor of the graduate school of her choice at the Graduate Fair in October. She started to plan in advance for her future to be assured she would be ready when application time rolls around.
As the sun set, lights switched on all over campus and students began their nightly rituals. For many, this meant burning the midnight oils and hitting the books, studying. Studying late at night was done for personal reasons. "I'm too tired during the day, so I take a nap in the afternoon and wake up when it's dark. I'm less tired at night and more enthused," said Tom Fong, a freshman majoring in physics.

Studying at night was sometimes the only option for students with busy daytime schedules. David Brock, a sophomore business major, commented, "My classes are spaced out during the day and I usually have some club meeting during the evening so my only free time is at night."

Trying to get some peace was difficult even during quiet hours because students often had to deal with noisy roommates. So, some in turn found other locations to do their schoolwork. "I go in the study lounge at the end of the hall, especially if my roommate has his girlfriend over or he's playing bad music," remarked Mike Lewis, a freshman majoring in Spanish.

Lack of sleep can be a major factor in how effective late night studying will be. Many students tried to stay away from a 'sleeping' environment so that they would not fall asleep. Jorge Queipo, a freshman majoring in computer science said, "I can't sit in my bed because I'll either fall asleep or get used to studying there and get insomnia, so I study at my desk."

By Cindy Kulp

"I go in the study lounge at the end of the hall, especially if my roommate has his girlfriend over or he's playing bad music."

Student Virginia Education Association

Finding an area spacious enough for yourself and your books was a difficult task for students living on campus. The floor seemed to offer the most room for all the necessities needed to prepare for studying, although it was not the most comfortable place.

Studying in the resident halls required determination and dedication. Many students had to deal with the noise disturbances as well as a cluttered area in which to study. This was a normal environment for those living in dorms.
Much as we would like, college was not all fun and games. Getting an education required hard work and dedication. Many students were not prepared for this lifestyle and so it came as no surprise that most students learned the art of procrastination.

Students had good intentions and tried to get their studying completed early so that they could have fun afterwards. But, to be honest it was a rare occasion to meet someone who had not had to pull an all-nighter, due to procrastination.

On-campus students wasted time wandering from room to room, only to discover that hours had vanished. The student then got so worked up about the loss of precious time that they panicked and it was impossible to do something constructive while in this state of mind. This resulted in losing more time, but eventually the students realized they were in a "now or never" situation with only themselves to blame, so miraculously the work got done.

The same scenario applied for those living off-campus only on a smaller scale. The trend seemed to be that students subconsciously searched for fellow procrastinators. So they either went downtown or became acquainted with television sitcom characters.

Whatever one did, they inevitably ran out of time just to hear themselves say, "I am the worst procrastinator." And vowed never to put themselves under so much stress again...until the next time.

By Jennifer Norris

THE FAMILIAR PHRASE “I AM THE WORST PROcrastinator EVER” COULD BE HEARD BY STUDENTS ALL OVER BLACKSBURG ESPECIALLY WHEN FINAL EXAMS STARTED

Student Art Association

Biology Club
Keeping up on the latest gossip, Christy Amos, a freshman in engineering, would rather talk on the phone than study for her next exam. Time seemed to go by more quickly when talking to friends and it was more interesting than books.

Debby Jones, a freshman in family child development, chooses to play a game of cards with Keri Shea, a freshman in business, rather than read a book required for her English class. Students were able to find lots of options better than homework.

Taking a short nap before continuing her studying, Kristin van Wolkenten, a freshman in university studies, catches up on her lost sleep from the night before. The force of gravity was just too much for many students' eyelids.
This semester a number of students experienced technology at work in lecture classes. Virginia Tech slowly put computer overheads in the classrooms to replace transparencies. The computers allowed professors to simply type the notes neatly onto the overhead.

It's out with the old and in with the new. No more smudgy transparencies and no more illegible handwriting. We have stepped into the direction of computers and graphics in the classroom. Science has advanced everything imaginable.

The use of computer overheads was part of a program called the “Instructional Development Initiative,” which was part of a larger university program called, “Phase II.” “Phase II” was funded by the state which was supported by the State Council for Higher Education in Virginia.

There were mixed feelings around campus about the new technology. Communication studies Professor Matt McAllister commented, “It took awhile to get my courage up and try it, but it sure makes my writing more legible!” Others were not so optimistic, George Bailey, a senior in graphic arts, stated, “Overhead projectors are unnecessary technology. Professors can now eat and drink instead of having direct involvement in the conveying of lectures, which is essential to having a complete understanding of the lesson.” Nevertheless times were changing. Soon professors may be doing their demonstrations on computers.

By Tony Witherspoon

Society of Physics Students

Dr. Scott Patterson reviews his daily lecture notes on his new computer overhead before presenting them to his next class. Professors found the technology to be a helpful addition to their classes because now students were able to read the teacher's handwriting.

Before his Introduction to Communication Studies class, Prof. Matt McAllister discusses a technical problem with UUSA staff member, Chuck Lord. The new technology was useful in the classrooms, yet becoming familiar with the computer overheads took awhile and could pose a few problems.
Students sometimes tried to see how far they could push the limits of the honor system. A big controversy this year was whether or not Tech Notes was a violation of the Honor System.

Heather Ostheimer, a junior in biology, works on an assignment for class. Students and professors alike took the honor system very seriously. Students had to make sure that they cited every source in order not to be charged with plagiarism.
Everyone heard about and has probably been reminded of the honor code at least once during the semester. In fact many professors commented about it in their syllabi. This year a new reference cropped up in many syllabi—references to the new business, Tech Notes.

Tech Notes, a business which hired students to take notes in their classes, and then sold them to other students, caused quite a bit a controversy. Some felt that this practice of selling and buying notes was a direct violation of the Honor Code and strictly forbade it, while others saw it as a useful tool in helping students better learn the material. "I don't see what all the fuss is about, it's just like borrowing a friend's notes when you have to miss class or make sense of your own notes" Rick Smith, a senior in English said.

According to the owners, the notes were not meant to replace the students attendance to the class, but instead to supplement their own notes.

Although some professors disapproved of the practice, many students tried them out. For some classes the notes were an added help, but for others they were not as well done as their own notes, and didn't provide any additional help. "I missed class one day so I decided to try the Tech Notes for one of my intro classes, but I found out that whoever was taking the notes did a poor job and my own notes would have been much better. They were of no use to me whatsoever," Kelly James, a junior in family and child development, said.

By Stacey N. Linger
Tutors came in very handy for students who needed that little extra help in getting an “A” in one of their classes. Zhiyuan Qiu, a graduate student in statistics, helps Doug Shirley, a freshman in finance, with one of his classes.

There were tutors available for almost every class from Introduction to Communication Studies to calculus and physics. Rudy Picardo, a sophomore in mechanical engineering, helps tutor Gail Lowe, a freshman in early childhood and development, in math.
We may have all thought we were great writers in high school only to discover once we hit freshman English that this was not so.

What was the proper way to write a thesis statement, how do we organize a paper with clear transactions and how many examples is enough to back up what is said?

The writing center, located at 205 Williams Hall, was brought into existence around 20 years ago to help beginners enhance their writing skills.

Although the writing center sees many freshmen, upperclassmen, graduate students and even some faculty have benefited from its services.

The tutors included faculty members, grad student interns and some undergrads. They were all well-trained in order to handle the job.

Since approximately 20-30 students passed through the center each day, it was best to make an appointment so that you were sure to get help.

When you arrived at the center for your appointment with your rough draft in hand, the tutors would then go over your paper with you a sentence at a time showing you the mistakes that were made and how to correct them. Also, if you were even having a rough time writing the paper they would help you at whatever stage you were currently working on. This process took anywhere from 30 minutes to an hour.

By Jennifer Norris

The Writing Center, which was located in Williams Hall, offered a helping hand to freshmen, upperclassmen and grad students.

Besides finding the normal cartoon characters drawn on desks, students also wrote poems, messages to friends or even math equations. Also, instead of taking their anger out on their friends or enemies there were oftentimes rude messages written on the desks.

Staying awake during class could sometimes be very hard, so in order to keep awake many students started doodling on desks. Often one could find cartoon characters ranging from Batman to Bart Simpson to caricatures of professors drawn on desks.

Students also liked to show their school support by drawing a VT on desks. However, students didn’t seem to realize that every summer custodial people spent countless hours cleaning the tops of desks throughout campus.
Students have some of the most interesting ways of expressing themselves.

Every semester it was quite an adventure to read and interpret what creative students had added to the graffiti written on the desks over the semester.

During lags in class, or while the professor lectured on and on, students had a tendency to doodle on their desks. Some students just scribbled, while others virtually engraved their name or fraternity. Still others got more creative by drawing pictures or writing poems or starting philosophical conversations.

Occasionally you could find math equations and calculations from a student who forgot scratch paper for their math test. Tidbits of advice or lengthy conversation pieces might also be found.

However, you could also find messages that were not so nice written on desks. Students often voiced their opinions about everything from who they hated or loved to current political issues. You could also find messages from sororities and fraternities about parties that were coming up.

But one thing students did not realize was that every summer custodians went to every classroom and cleaned off the artwork/messages left on the desks.

So, if class gets a little boring one day, and you want to draw or write something on your desk take time out to remember how much time the custodians spent cleaning.

By Tonya Clark
Sometimes classes were not as easy as they looked. Often times students would take art classes because they thought it would be fun and easy but soon found out that it was harder than it first appeared. Rivka Swenson, an English major, works on her drawing of a nude.
Though most students considered college classes to be challenging and worth their while, some classes just barely earned this distinction. Such slack classes were often the result of boring or easy subject matter, a boring or uninteresting professor, uninterested students, or any combination of the three. Whatever the cause, slack classes were sources of jokes among many students.

John Lam, a senior in aerospace engineering, said of his slack class, “Introduction to Psychology required me to sit in a full McBryde 100, listen, and take four tests. The effort required was not high.” Often introductory courses were considered slack because the level of subject matter was not high, but these courses were essential to upper level courses in the same area.

Somehow some classes became known for being slack and thus earned a reputation as an easy “A.” However, sometimes the rumors were true and sometimes they were very, very false. One class that had the latter quality was Human Sexuality. A certain graduate student in mechanical engineering who requested anonymity (well it was me, but who cares, right?) went in thinking it would be an easy “A,” but came out with the worst grade of his college career.

Slack classes were probably unavoidable, even at the college level, but keeping away from them (or taking as many as possible) involved research, talking to many fellow students and keeping one’s eyes open.

By: David Schmiel
There were times when students wished there were more than 24 hours in the day. When big exams hit it was hard to manage your time efficiently enough so that you could work all your schedule in and still be able to get a good couple hours of sleep.

Managing your time so you fit everything into your schedule often could be more difficult than figuring out the hardest physics problem. Many students bought organizers to help manage their time better, some even bought the new electronic organizers.
“I have so much to do!” was a common cry heard anywhere, from the largest industries to the smallest businesses. College students were no exception to this; with activities, friends, social gatherings and schoolwork, a college student’s day truly lasted 24 hours, especially during final exam week. Management of time to ensure room for all a student’s activities involved planning, discipline and hard work.

Since the first purpose of going to college was to get an education, students with good time management skills prioritized their activities to place schoolwork first: “My list of priorities starts with my classwork, then my job, and once I feel secure in those areas, I can think about social activities,” said Sravan Srihan, a senior in ISE. This simple concept of placing academics first was the foundation of a good time management scheme.

Knowing one’s limitations and work ability was also key in managing time to get the most done: “I carve an envelope of time in which I know that I can get all my work done. That way, I don’t overextend myself by placing pressure on myself to finish in too short a period of time,” said Michael Scardina, a graduate student in ME.

Finally, good time management required planning and clear thinking to complete a task. A methodical procedure, thought out beforehand, did wonders towards increasing work efficiency and task completion time, according to Srihanan.

After trying to add classes on the terminals and having no luck, students then have no choice but to try to force add their way into the class. Jen Hardgrove, a freshmen in forestry, is getting Dr. Esen to sign her force add slip so she can be in his class.
New semesters were stressful for everyone. There was always so much to do between moving in, buying books, and getting readjusted to school life in general. And there was only one week to get it all accomplished.

This was especially true for students who discovered they had no classes or were missing some due to complications with no hope of getting any of which they needed.

Students who found themselves in this sort of situation turned to force adding classes. This was usually the last resort when trying to add classes but has now become more common. There were mixed emotions on the subject.

Some say it was simply a matter of luck and that you were better off if you already knew the professor involved. Others say it required grovelling.

Many believed force adding should not even be an issue. As long as tuition was paid, students should be allowed in the classes they needed to take.

However, it was very difficult to cater to everyone’s needs and wants. Students understood this and therefore arrived at a conclusion. Force adding was alright as long as certain students, such as seniors who desperately needed the class received top priority.

There was nothing more frustrating than trying to fight your way into a class and realizing you have to wait another semester to take it.

By Jennifer Norris
Students often helped each other in labs in order to better understand the experiment. Many majors in the College of Arts and Sciences required a certain number of hours of labs to take along side of their corresponding classes.

The wines and vines class, which is offered under the foods and nutrition major, was a popular class for majors and non-majors alike. The main stipulation for this class was that the student had to be 21 in order to take the class.
When first applying for college, it seemed like there were so many choices that you will never decide what to major in. Then when you finally made up your mind and came to school you realized that you made a mistake.

However, for some of us it took awhile in university studies to decide what was the right area to major in.

For those of us who were interested in business the College of Business added three new minors: a global business concentration for business majors only, a real estate concentration for any majors and a business concentration for majors outside of the College of Business.

However for those of you who enjoyed the outdoors, the College of Forestry would have been a good choice for you. With five different fields to study such as Wildlife Management, Fisheries Science, Forestry, Outdoor Recreation and Wood Science and Forest Products there was plenty to choose from.

However, some of us were luckier than others. Those of us that were in the College of Arts and Sciences had their credit hours dropped from 126 to 120 allowing a few of us the option of graduating a semester early.

And for those of us who enjoyed engineering the College of Engineering offered classes in 12 majors from computer to ocean engineering.

No matter what college you were in there were many different classes to satisfy your interests.

By: Jennifer Dye
For those of us interested in staying up late nights working on projects, the College of Architecture and Urban Studies was the place to be. With 11 related programs this college focused on professional in-depth clarification and control of design methods and technology. The college professors also encouraged students to do research and extensive design projects. Students could be seen working late into the night in Cowgill Hall.

However, if you enjoyed working with people, the College of Human Resources was the right choice for you. The college focused on shelter, food, clothing, management and human resources. Students also received hands on experience by working in places such as the day care located in Wallace Hall and the restaurant and hotel located in the Donaldson Brown Center.

In addition, for those of us who wanted to be educators ourselves, the College of Education offered degrees in elementary, middle and secondary education.

Furthermore, the College of Agriculture and Life Sciences offered areas of study from horticulture to crop soil and environmental science.

But let’s not forget the Virginia - Maryland Regional College of Veterinary Medicine that offered PhD and masters degrees in veterinary medicine. They're four year program allowed students to spend three years in the classrooms and labs and one year receiving practical experience in areas such as surgery and general care.

By: Jennifer Dye
A horticulture student checks the plants in the greenhouse to make sure that they are growing up right. Students who majored in horticulture were under the College of Forestry.

Students in the College of Architecture work late into the night in Cowgill Hall to finish their projects on time. Architecture students had many projects to complete during the course of one semester.
Students often found it difficult to go to classes when the weather was bad. Often students would stay in bed if the weather was really bad or would wait to go to classes when the weather cleared up.

Students were seen wearing different types of clothing during the cold weather. From gloves, scarves and heavy jackets to no gloves, scarves or jackets.
Have you ever woken up in the morning to a day full of classes and looked out the window and it was pouring down rain? Now, sometimes this meant nothing but for some it set the tone for the day. Weather conditions usually had an effect on peoples schedules more than they realized.

When the sun was shining and the wind was blowing ever so slightly, homework and exams didn’t seem so bad. On the flip side, if you had ever been in the middle of the Drillfield with the wind blowing fiercely and the rain pounding your umbrella, homework, exams and other problems seemed like the end of the world.

Weather also was a major component in the decision making process. Let’s say it was a Friday night that you had set aside to stay in and study for that big exam. You opened your window for some fresh air and it was a beautiful crisp night. The kind of night that was good for hanging out at The Balcony or on the deck of P.K’s. So, what did you do? However, picture the same scenario but it was cold and rainy. Most likely you would have stayed in and studied.

Weather could make the best or worst of things. It could also make the campus look like paradise or like a mudslide had just occurred.

However, all in all, classes, homework and exams continued to go on no matter what the weather condition was and as always we learned to adjust and make it through.

By: January White
Bathrooms, bars, cars and elevators. What did all these places have in common? They were places where students sometimes chose to study.

While studying was an important part of college life, it could become tedious and boring. Students often solved this problem by changing their studying environment. It could mean going from upstairs to downstairs or for some it could become more drastic.

Becky Clor, a sophomore in early childhood education said, “Home in Michigan my parents had a van with a ladder up the side. When I got frustrated studying inside I would go out to the van and climb up the ladder, then study up there. My neighbors thought I was strange but I got a lot done.”

There were several problems with studying in your apartment or dorm room. For example, the phone would ring, people would come by and if desperate enough you may have rearranged your CDs.

Unusually enough, imagine yourself at a bar, Friday night and looking over to see people studying in a booth. Conflict of interest... maybe, but it worked for several students.

Tracey Dove, a senior, has been studying at The Cellar for two years and said, “It is by far the most relaxed place to study. Maybe it’s unusual but a lot of people study there.”

More common study places were Mill Mountain Coffee Shop and Deet’s Place.

By: January White

Tracey Chew and Roseway Guignard study at the new coffee shop on College Avenue. Students often chose unique places to study in hopes that it wouldn’t be very noisy. Many students chose to study at the various coffee shops due to the quiet atmosphere.
Lynn Young, a junior in business law, studies in the quiet of an elevator. Students tried to find secret places or hidden alcoves where they could study without being interrupted.

Keith Marretta, a senior in nutrition, looks over her notes while walking to class. Students often studied while going to class in order to get the last few minutes of cramming in before a big exam.
Brian Pollack, a sophomore in accounting, fills out the financial aid application. Even though students filled out the application, not all students were eligible for financial aid.
When spring semester rolled around, not only did we have to worry about classes, where to go for spring break and finding a summer job, we had to make sure that we turned our financial aid forms in by the deadline.

With this in mind, we gradually made our way to Burruss Hall to visit the counselors in the Scholarship and Financial Aid office.

For some this was a mere procedure and wasn't something to be worried about. However, for others sitting down with a counselor proved futile and was often very frustrating. Sometimes it seemed that no matter how hard you begged and pleaded with the financial aid counselor to help you out, financial aid wasn't available. This was often due to the fact that once your parents made a certain amount of money, you were ineligible for financial aid.

So the next place to turn was the scholarship route. Many scholarships were available in the public and private sector. However, they also had requirements that had to be met, from being a certain major, living in a certain town, or having certain career goals. Some scholarships were also based on the amount of need while others were not.

But if there was no way to receive money from either scholarships or financial aid, you could then apply for a short term loan. As long as you fulfilled the requirements, you could borrow up to $600 from the university itself.

By: Jennifer Dye
The dreaded final exam. Our last ditch effort to do well in class. From the first day of classes when we received our syllabi, we dreaded taking final exams.

For some it was not so bad. When our final exams were spaced out across five days, the stress level was not as high. But for others who had three or more exams within a 48 hour period - the end seemed unreachable. Oftentimes it was easy enough to get your exams changed to more reasonable more times, but if you happened to be one of the unlucky ones who forgot to talk to your professor then by the end of your exams all you had the energy to do was crash.

One of the worst things when taking a final exam was finding out that it was cumulative. Finals that only covered one-fourth of the material were not so bad, in fact, they were just like taking a regular exam. However, taking cumulative exams were much worse. Not only did we have to know the new material, but the material that was covered four months ago, and that was almost impossible.

However, no matter what situation we were in, we all handled it differently. Some of us started studying a week or two in advance, while some of us enjoyed the night before cramming method, and even some of us had a case of "senioritis" and didn't study at all.

No matter what one did, it was all soon over. And there was one good thing about final exams, and that was that they were a means to an end. Once they were started the semester was almost over.

By: Jennifer Dye
Stress from final exams was common among students. They often stayed up all night in order to make a good grade on an exam. However, once the exams were over the stress soon disappeared.

Students often studied in different positions in order to keep awake. This student studies for his exam on top of his loft.
From the new organizations such as the Homebrew Club tradition to the German Club, one of sure the oldest clubs, students got together to share a common fit goal and make new friends.
The first Ring Dance was held in the Spring of 1934, by the Class of 1935. However, the first Mid-Winters Dance was held in the early 1900’s. Every year new organizations registered on campus and added another aspect to student life. From the traditional to the not so traditional clubs, students had the opportunity to do something besides the general schoolwork. There were different types of organizations: honor societies, special interest, media, service and culture.
Marching Spirit
Tech band continues to lead crowds with triumphant musical entertainment

In the stands at football games, one single group stood out as the leaders of spirit for the Hokies. The Marching Virginians led the crowd at each game in various spirit related and uplifting tunes.

“They’re just typical kids who come to Virginia Tech, play in the band, are dedicated to the band and will walk out of here and never play an instrument again,” said conductor Dave McKee.

Over the years, students grew to love several of the traditional Marching Virginian songs. Songs like “Tech Triumph,” “VPI Victory March” and the “Hokie Pokie” continued to bring students and other fans to their feet at every home game. During these songs, fans could often be seen dancing and singing in the stands as the band played on.

However, playing these songs for the crowd was not as easy as it sounded. The Marching Virginians practiced daily and practices began the week before classes got started.

“It’s not that hard,” said Heidi Burt, a senior in industrial engineering and a piccolo player in the band. “We’re there to entertain the crowds, we have to look spirited all the time.” -Abby Legg

◆Parade◆
During the Homecoming parade, the trombone section shows their spirit while marching down Main Street as part of the festivities.
◆Charge!◆
With instruments in hand, members of the Marching Virginians rush out onto the field at Lane Stadium. Charging onto the field at halftime became a trademark for the band that crowds have grown to love.

◆Kick◆
Showing his spirit, the Hokie Bird joins the tubas in a "chorus line" kick during the halftime show of the Pitt game.

258 Organizations
Who keeps the students informed? The campus media of course! With various outlets including a literary magazine, yearbook, newspaper, television and radio station, students were sure to get the information they’re looking for.

The Student Media Board’s purpose was to recognize and promote the campus student media. The Board met twice a month during the spring and fall semesters and once in the summer. Each media organization sent two representatives to the Board, an executive officer and business manager. The Board also dealt with issues from finances to safety and equipment purchases.

One of the organizations that sat on the Student Media Board was the Collegiate Times, the campus newspaper that was published bi-weekly. The CT, as it was popularly known, ran on money generated by advertisements sold, like any other newspaper. The amount of ads sold dictated the amount of pages in that issue.

The Collegiate Times put out an issue twice a week, on Tuesdays and Fridays. The staffs of all three sections of the paper: news, sports and etc., had to work together to meet their deadlines.

The editorial staff edited the writing assignments, or copy turned in by staff writers. The Student Publications Photo Staff took care of the pictures. Students also submitted their own cartoons.

The production staff designed the layout of each page and pasted everything to "slicks," which were delivered to the printer in the wee hours of the night. The paper was distributed the following day.

Students submit works of fiction and art to *Silhouette*. *Bugle* produces its 100th edition

Continued from page 259

Students also had an alternative in writing for the media. The *Silhouette*, a literary magazine, allowed students to write in a more creative fashion.

“We are the only media on campus which promotes fiction creations by students,” said Sharon Olson, a senior in English and the assistant editor of the *Silhouette*.

The *Silhouette* was an outlet for students to publish poems, fiction, art and even one-act plays. The staff gathered submissions throughout the semester. The magazine was published at the end of each semester and sold for $3.

“I like reading the work that students turn in for submission consideration,” said Olson. “The staff is very small and very close, so we have a lot of fun together.”

In order to raise money for the magazine, the *Silhouette* held at least one benefit a year and sponsored Coffeehouses, where poetry was read aloud at an open mike.

This year the *Bugle*, Virginia Tech’s oldest media organization, celebrated its 100th anniversary. The staff began work early in the school year, designing layouts and brainstorming possible story ideas. There were also six deadlines throughout the entire year. Section editors made sure that work was put on the computers, while the Photo Staff took the pictures and printed them in time for deadlines. The business manager took care of the finances and advertising while the editor-in-chief edited and pasted up the pages that were sent to the printer.

Just to let you know
VTTV broadcasts the unique and otherwise not available; WUVT provides an alternative information source.

Continued from page 261

In addition to the print media, Tech offered a student run television and radio station.

WUVT, first organized in September of 1947, went on the air for the first time on April 1, 1948. WUVT was forced to shut down in 1951, when the studios were burned down in a fire. However, the station began broadcasting again months after the fire.

WUVT worked 24 hours a day to provide an educational experience to students by giving them the opportunity to participate in the different areas of the staff, such as disc jockeys and/or managers.

Although the radio provided students with a chance to learn the waves of music, some students preferred to experience the television side of broadcasting.

VTTV strived to provide unique information and programming that students could not find anywhere else. Students on staff learned both the production and management aspects of television.

The Communication Studies department started the station in 1988 to provide students with more areas of experience. In 1990 VTTV became a member of the Student Media Board. -Abby Legg, Jessie Hensley and Jennifer Strader

Raising Spooks

Students fall “victim” in a house of horrors to raise money for charities

Blood-spitting vampires, a mad scientist and a wolf-man all convened at the same place. You might have guessed... it was Halloween.

On the night of October 31st, the upper quad RHF sponsored a haunted house to help support local charities and the Montgomery County Christmas Store. Admission was less if students brought canned food. The Haunted House, held in Squires Commonwealth Ballroom, began at 7:00 p.m. and lasted until 11:00 p.m.

Pulling off a haunted house was not an easy task according to sophomore Meredith Westington. “Partitioning the room was really hard,” said Westington. “Wood is expensive and we had to get everything donated.”

But on that opening night, the ghouls and goblins were ready to go. RHF members were dressed as witches, fortune tellers, scarecrows and demons. Many were tour guides, leading groups of four to six student “victims” through the maze of gore and destruction. Each had a story to tell as they led students through the dark, stopping momentarily, perhaps in awe of the mad scientist or headless person.

“I’m just going because my roommate’s in there and she’s going to get her arm cut off,” said Robyn Otto.

The upper quad RHF collected a total of 140 cans to be donated to the Montgomery County Christmas Store. Over $600 was collected and distributed among local charities. -Cindy Kulp

◆Scary◆
Marty Easter awaits his “prey” in the haunted house sponsored by the RHF. Entrance into the haunted house was cheaper if students brought canned foods with them.

Concerts, films and plays involve students in diverse social activities

"Part of our mission is to be diverse," said Vicki Moose, VTU office manager, of the organization's whose duty was to provide entertainment for everyone.

The Virginia Tech Union included committees on special events, speakers and issues, house and hospitality, concerts and alternative sounds.

"We bring activities and entertainment to the university and surrounding areas," said Stephanie Johnson, Special Events Chairperson.

The concerts committee brought Saturday Night Live's Adam Sandler to campus in front of a sold-out audience in September. The Chinese Magic Review performed in mid-November and the Drifter's and the Shirelle's sang in honor of Black History Month in February.

The Virginia Tech Union not only invited the entertainment, they took care that the events ran smoothly. The house and hospitality committee handled the catering and ushering for presentations. The Homecoming committee handled much of the planning and decorating of the Homecoming Dance.

Oliver Stone presented "Making Movies Matter" in December. Also that month arrived the holiday play, "A Christmas Carol." The Union successfully brought various kinds of entertainment together to please most everyone. -Jennifer Strader

Tasty

Students taste ice-cream cakes from Baskin-Robbins at a "tasting party." Residential and Dining Programs sponsored a "Party on the Town" for students to sample the various cuisines of area restaurants.
Saving the World
Global problems conquered in game as students work together on future

Each year the Lutheran Campus Ministries sponsored a WorldGame Workshop to educate students about global issues. The 75 students registered in this year’s game represented 11 regions of the world, as well as the media, multi-national corporations, financial institutions, UNESCO, the United Nations, an Environmental organization and the World Health organization.

The object of the game was for each region to assess their situation, meet their needs through trading, purchasing and wealth building, and to solve their region’s problems by using their technology, resources and money, and by interacting with other participants.

The idea of the game came from American architect and inventor, Buckminster Fuller, as a constructive and creative alternative to military war games. He defined the enemy as problems like hunger, illiteracy and disease rather than a person or a nation.

“He developed the game to educate people about the world’s problems and to have people working together for 100% of humanity,” said James Tantum, facilitator. “The purpose is to think positively about the future and envision change,” he added.

Developing products and presenting workshops for over 20 years, the institute has reached approximately 110,000 people. -Dawn Baumgartner

◆Cooperation◆
In order to promote and benefit the country they represented, students worked together to find methods to excel.

◆Research◆

Celebration Time

The Newman Community marks 70 years of Catholic support on campus

After spending years establishing a Catholic community on campus that provides Christian leadership, concern for others and support for Catholic students, the Newman Community’s hard work paid off as the organization celebrated its 70th anniversary.

To celebrate the event, the Newman Community dined and danced the night away exhibiting great excitement for the anniversary. The following day, the group held a mass in Burruss Auditorium, which was attended by numerous alumni and students alike.

Father Jim Cowles, the campus minister and Catholic priest, says that Newman tried to offer “an experience of community because it’s hard to offer that on a big campus.”

The Newman Community gave students opportunities to experience a friendship atmosphere while boosting the Catholic ideals. The group offered educational, spiritual and retreat opportunities to its students as well as providing opportunities to reach out to those in need within the local community.

Students involved in Newman, visited the elderly in the area and the Juvenile Detention home. In addition to giving students areas of outreach, the organization also provided support for academic life by giving out scholarships each year. Although Newman provided students with these avenues of service and more, the main objectives were to bolster religious beliefs. Throughout its 70 years on campus, Newman provided the much needed religious opportunities. - Abby Legg

Local YMCA forms a partnership with groups in Africa to make a difference.

This year the YMCA of Blacksburg on Washington St. embarked on a journey of a higher level of service, one that took them to Africa.

The YMCA joined the African Alliance of the YMCA in Sao Tome to create a partnership that will strive to create more awareness in the country. The first project of the African partnership was a women’s sewing program designed to provide the women of Sao Tome with sewing skills and a greater feeling of importance because Sao Tome is male dominate.

“This throughout Africa, there’s a tremendous power unbalance between men and women,” said Bill Hohenboken, a YMCA African partnership committee member. “This project is what the people of Sao Tome want.”

Although the committee had great plans for its new partnership, the organization had to first raise money to accomplish its goals. The immediate money goal for this project was $3500, which went towards the purchase of sewing machines, cloth and training supplies.

“We can’t be alone on it or it won’t happen,” said Anne Shake, the YMCA program director for international programs. Shake believed that the YMCA was in a real position to make a difference. -Stacy Horn

◆Party◆

A German Club member makes sure all goes well at the community Halloween party the club sponsors each year with Chi Delta Alpha.
The second week of February was no ordinary week. Circle K, Chi Delta Alpha, Gamma Beta Phi, Wellness Peer Educators and the Student Health Advisory Committee organized an educational program for students that provided information about safe sex and distributed guidelines for condom promotions.

According to the Center for Disease Control, the number one cause of death for Americans between the ages of 23 and 44 was AIDS. In New York City alone, AIDS was the number one killer regardless of age.

In light of such startling statistics, the service organizations joined forces to sponsor a week of awareness activities for Virginia Tech students. Members of these organizations passed out health information and condoms in Squires, as well as pamphlets on the correct way to use a condom. Research showed that condoms were 98 percent effective when used correctly.

The education that Circle K, Chi Delta Alpha and others were providing to students was very important if the war against sexually transmitted diseases will ever be won. Through education of this kind, clubs were able to reach hundreds of students each year and gave them the latest information needed to survive in today's society. By continuing this program more students will learn. -Erin Paige Exten and Abby Legg

Cultural Talents
Chinese Magic Revue visits Tech and brings amazing feats of flexibility.

The human body can do amazing things, especially if that body is in the Chinese Magic Revue. The Virginia Tech Union sponsored event brought acts of amazing talent to Burruss Hall.

The members of this talented troupe began their training around the tender age of four or five, practicing daily until their acrobatic skill was finely honed. Once trained in precision and grace, they were prepared to carry on a 2000-year-old tradition of dazzling audiences with their extraordinary feats.

Mr. Hai Ken Tsai and his brothers, Hai Ken Hsi and Hai Ken Fou led the performance. The Chinese family name was closely associated with amazing physical accomplishments in Taiwan.

The entire program was astounding, but particularly fascinating were the demonstrations of Chinese Kung-Fu and body contortion. One man pressed metal rods against the hollow neck until they bent, held a heavy glass jar with only his palm and had bricks broken over his head with a sledgehammer. The contortionist put on glasses, read a magazine, fed herself and lit and smoked a cigarette with only her feet. The Chinese Magic Revue has been touring for 20 years, and offered an exciting glimpse at some of the finest performers of any culture. -Jessie Hensley

◆ Legends ◆
The Shirelles and The Drifters performed dynamically for the audience. Both groups sang with tremendous heart and soul.
Black History Month brought top names of music, television and politics to campus

In order to educate and expose students at Virginia Tech to a variety of cultural events, groups on campus provided students with several opportunities to learn. It was a month full of colorful speakers, vibrant performers and exotic exhibits - all designed to showcase the numerous contributions of African Americans.

The Black History Month committee "wanted to provide a variety of programs and opportunities for the campus to continue its exposure to diversity, particularly as it relates to African Americans," said Ronald Giddings, assistant dean of students and chairman of the committee.

Less than a week after Squires Colonial Hall witnessed a tribute to Martin Luther King Jr., the facility resounded with the powerful words of BET anchor and chief correspondent Ed Gordon.

Gordon shared his views on the crippling effects of discrimination in this country, particularly the toll it has taken on African Americans. Discrimination aside, Gordon placed the ultimate responsibility with his African American counterparts.

On the same lines as Gordon, Lani Guinier, a professor of law at the University of Pennsylvania and former Clinton administration nominee for a high-level Justice Department post, spoke about the need for a "National Conversation on Race." Guinier used statistical and personal, as well as literary evidence, to convey her belief that race relations in America resemble a nightmare.

"The problem of race in this society is not a problem of individual bad actors," Guinier said. "Race is a societal and cultural phenomenon." Continued on page 280

**Speaking**

Lanie Guinier urged students to fight racism during her visit to campus. Black History Month provided a forum for speakers.
In addition to inspirational speakers, The Shirelles and The Drifters entertained crowds with performances that brought back memories of the good old days. Both acts brought back the excitement of the soul and rock music that they performed years ago.

Besides the fantastic display of soul singing, Black History Month welcomed the annual Afrikan Drum Festival to campus. The Afrikan Drum Troupe from Charlottesville, consisting of members Scottie B., William “Whit” Whitten and Darrell Rose. The African trio played numerous different types of drums, including an hourglass-shaped drum called a Djembe and the bow-shaped Berimbau.

Sharing in the creativity of a culture, the month's activities included an interesting display of African art. Numerous sculptures, paintings and other student art exhibits were put on display for all to see during the month.

With events in areas of the arts and music combined with the inspirational words from African American role models, this year's Black History Month was a memorable experience. “Several programs attracted a wide variety of people,” said Giddings. “Anytime you can do that, I think you can call it a success.” -Nigel Hatton

◆ Lecturing ◆

Students listen tentatively in a seminar on Ethnic training. During Black History Month organizations planned events to inspire and educate students.
Numerous paintings and other art forms explored the African American history during the month of February.

At the Afrikan Drum Festival, crowds were able to witness amazing talents in rhythm techniques on the drum.

At the African Art Exhibit, two students enjoy the extraordinary sculptures that represent the culture.
Musical Wonders

Tech's band boast two outstanding groups working to make life easier.

Tau Beta Sigma sorority and Kappa Kappa Psi fraternity strove each year to make Virginia Tech's band run a little smoother. By setting up Band Parent's Weekend and organizing helpful programs to push new members along, these two groups brought band members together.

"I joined because I'm a flag and I didn’t feel like I was a part of the band," said Jenny May, a sophomore Tau Beta Sigma sister.

Making new members, or "rookies," feel at home was also a very important part of the groups. The sorority ran band camp and organized music for the rookies to make their transition a little easier.

Because Tech's band was student run, the sorority and fraternity provided a network of workers that helped to prepare for games, fund raisers and other fun activities. May said that the sorority served as "the director's right hand people; if he wants something done, he asks us."

Among the groups' tasks: sending out invitation to Alumni, preparing food for parent's weekend, making videos of the band's performances and other fund raising activities. Kappa Kappa Psi also held a tailgate for parents during the band's parent weekend. As with any parents' weekend, theirs was a chance to show off their skills and hospitality to dedicated parents.

Both Tau Beta Sigma and Kappa Kappa Psi worked to serve the band, however, not all students could join. In order to join one of the groups, applicants must have been a member of the band and had at least a 2.2 QCA. Tau Beta Sigma had over 30 active members that planned and organized events that kept the band whole. -Abby Legg

An Honor To Join

Golden Key Honor Society serves the community as well as the campus.

Even though Golden Key Honor Society only accepted students in the top 15 percent of their class, they still drew a membership of 2,000 students dedicated to the service projects that the society gave back to the community.

"It's an honor society, but we provide service because that's what we feel it's all about," said Erik Hallnor, president of the Golden Key Honor Society.

Although the membership was remarkably larger than others here at Tech, there were only 50 active members in Golden Key. Hallnor said that even though 50 sounded small, other Golden Key Societies, like the one at UCLA, had over 5,000 members and only 20 active members.

Besides being in the top 15 percent of your class, the society only took juniors and seniors. Hallnor guessed that the average QCA in the society was around a 3.3.

"We're just an upper level honorary society," said Hallnor. "I guess they figure that if your in the top 15 percent in your junior or senior year, you're probably going to stay there."

The society used its manpower to participate in service activities like Adopt-A-Highway and S.H.A.R.E. and they sponsored the AIDS walk in April. The society also hosted the Mid-Atlantic Student Conference this year in New Jersey. -Abby Legg

◆ Playing◆

Like other clubs, the Golden Key Honor Society participates in intramurals. Volleyball remains one of the most popular intramurals.

Student Voices

Student Government Association gives students an outlet to make a difference

The Student Government Association at Virginia Tech worked to ensure the voice of the students on campus and in the community. Along these lines, the SGA sponsored Higher Education Day so that students could respond to Gov. George Allen's proposed budget cuts for higher education.

The SGA set up phones, fax machines and letter-writing stations in Colonial Ballroom at Squires Student Center in order to give students a valid chance at making a difference.

"When we were faxing the letters to Richmond, they called and asked was to stop because we were tying up their lines," said SGA President Seth Ginther. "They asked us to finish faxing later in the evening. I think people will definitely notice since an estimated 1,500 students turned out to protest Gov. Allen's proposed budget cuts."

The letter writing and telephone calling campaign was chosen because SGA members thought it would be the most efficient and effective way to let members of the General Assembly know students do not want their education funding to be cut.

"I know a lot of politicians. It means a lot to them to get letters," said Kara Norment, director of SGA's LEAD program.

In addition to giving students an outlet for change, the SGA also acted as a representative of student opinions in campus politics. In situations such as Gov. Allen's budget cuts, students went to the SGA to see what avenues they could help with.

To accomplish the maximum success in representing the student body, the SGA worked through a structure that benefited all students.

SGA Executive Council

Writing
Jeannett Toscano writes her senator a letter regarding the proposed budget cuts to higher education that would hit Tech hard.
Student Voices

Tech’s student government ensures fairness to the student body by using an intricate system of checks and balances.

Continued from page 287

Even with all the benefits of Tech’s student government, without a well-organized system of leadership and membership, the SGA would never be able to run as smoothly as it does.

The SGA was the only representational organization for all undergraduate students. The first SGA was organized at Tech in 1908. Since then, the mission of the SGA was to represent the interests of students.

There were two basic elements of the SGA. The three standing committees, which were the executive committee, the credentials and elections committee and committee on committees, and the student legislature, which was comprised of the Senate and the House. The president of the SGA oversaw everything on a higher level, but also took charge of the committees. The vice president and speaker of the House then oversaw the Senate and House.

All organizations had representatives in the House and then there was one senator for at least every 350 students enrolled in the university. This system ensured that each student and organization would have a voice in the governing of the university. Tech’s system was similar to the U.S.’s system of choice.

After establishing members of both the House and the Senate, in addition to the president and other leadership positions, the SGA functioned to hear motions and vote accordingly. Committees also existed to provide forums of debate for all issues coming before the SGA. -Abby Legg

◆Marching◆

Women from all organizations united to “Take Back The Night” and marched in honor of women victims of violent crimes.

◆Dancing◆

One couple at Midwinters found some time to kick up their heels on the dance floor.
SGA Lead

Student Government Association

At Homecoming time the Student Alumni Associates enjoy building a float. This year the Hokie Bird was the subject of their float.

For Faculty Appreciation Day, members of Student Alumni Associates give professors an apple for their hard work.
Helping Hand

Student Alumni Associates offer hospitality to alumni returning to campus.

The Student Alumni Associates not only gave students a chance to give back to university, but the group also allowed students to experience the importance of staying involved with the university after graduation.

55 members strong, the Student Alumni Associates acted as a host organization for alumni returning to campus for any reason. Although the group did most of their work in the fall during football season, the associates also conducted tours for alumni and held several other events that gave back to the campus.

Among the events that the organization sponsored was Faculty Appreciation Day. On this day, the group set up stations around campus for students to vote for their favorite professor. The professor receiving the most votes would be presented with the Student Choice Award.

The Student Alumni Associates also sponsored another very special program called Presidential Ambassadors. The group nominated 12 senior members to be ambassadors, whose job was to help the president of the university during any public functions that he held.

“Our organization takes only top notch students and gives them the opportunity to get involved with their university. We teach students how important the alumni are and how to stay in touch after graduation,” said Ryan Esleeck, vice president of the Student Alumni Associates.

Through this organization students stayed involved with the university’s alumni and provided a basis for the original Tech spirit. -Abby Legg
Land Designs

The Turf Club provides an outlet for students to put their major to work

Since the founding of the Turf Club in 1993, turf and landscape majors have had a place to put their skills to work and interact socially with others in their major.

"We try to get turf and landscape students to interact and discuss things having to do with turf," Michelle Frazier, secretary of the Turf Club said.

The club's members came mostly from the turf and landscapes areas. However, Frazier said that the club did have some horticulture majors. Since the group was comprised of mostly the same majors, it was easier for the club to organize events to please everyone.

Frazier said that the 40 active members of the club participated actively in all the clubs service and social projects. These projects included planting trees on the Virginia Tech golf course, visiting other Turf clubs, Virginia Tech Turf Landscape Field Days and various other social activities like meeting to play golf.

Not only did the club give students a chance to get involved, it also gave students a helping hand in finding jobs after graduation.

Although turf and landscape was not a well-known major at Tech, it was a passionate one. Turf and landscape students formed close friendships and loved their work. Each member of the club participated heavily in the activities.

"I've worked outside my whole life. I love mowing grass and after I worked my first year at a golf course, I loved it," said Frazier. -Abby Legg

Dr. David Chalmers, advisor of the Turf Club, recognizes individuals and their accomplishments at Virginia Tech Turf Days 1994.

Bryan Gooch, president of the Turf Club, represented Virginia Tech's club at the Turf and Landscape Conference 1995 at the Richmond Centre.
Turf Club

Yuvi Zalkow and David Watts set up their home brewery. The Homebrew Club met to discuss the best techniques in brewing.
Strange Brew

The Homebrew Club educates student beer brewers on the best techniques

The Homebrew Club at Virginia Tech gave students an opportunity to learn the best techniques of beer brewing while at the same time providing a forum for friendship and education.

"We were all sitting around last spring and we all brew beer, so we looked into starting a club," Chad Norwood, secretary of the Homebrew Club, said.

Home brewing was not an exact science, and every recipe was different. According to Ben Cohen, president of the club, the basic process was simple.

"You boil about two gallons of water and add the malt and hops," Cohen said. "Also you can use malt extracts, whole grains or partial mash of extract and grain."

Extracts or whole grains could make or break a beer and which one used depends on the recipe. The process was not that difficult, but could be a long process. The process of boiling, adding yeast and sealing the container to ensure that no carbon dioxide escaped took weeks. However, in the end brewers could expect a beer to remember.

"It's a pretty laid-back club for people who share an interest in brewing. We've made pale ales, cranberry beer, blackberry beer, India pale ale and holiday beer," Norwood said. "You do have to be 21 (years old) to join." -Abby Legg

Ben Cohen, president of the Homebrew Club, Chad Norwood, David Watts and Yuvi Zalkow work to build equipment for club purposes.
United Hokies
Organizations recognize the Hokie Bird as a symbol of Tech's unity

Although every organization had its own objectives and social circles, the Hokie Bird never failed to unite each and every organization at Tech.

Watching the Hokie Bird bench press touchdown points and work the crowd at football games boosted moral and involved everyone in Tech spirit. When the Hokie Bird stood up to cheer everyone cheered with him.

"The Hokie Bird is probably the most recognized symbol of the university," Danny Monk, associate athletic director and cheering squad advisor, said.

Taking on the responsibility of representing an entire university took a very special and very athletic person. This year, Kevin Murphy and Curtis Dvorak alternated jumping into the hot and bulky Hokie suit to perform at school functions.

"I didn't expect it to be as (much of) a cardiovascular test that it turned out to be," Murphy said. "It really starts to wear on you."

Even though the Hokie Bird's job was a tough one, it was one that every organization held dear. Student Alumni Associates even spotlighted the Hokie Bird on their homecoming float.

"We're the Hokies and he's our symbol. He displays Tech's unity," Colleen Crossan, a member of Student Alumni Associates said. -Abby Legg

The Hokie Bird takes a minute to catch his breath after a long day of keeping the fans spirited.
House and Hospitality

◆Passing◆

The entire crowd works together to support the Hokie Bird on its spirit path over students’ heads.
Show Me The Way

R. S. V. P. runs tours of campus to show visitors another side of Tech

Stepping onto Tech's campus for the first time could be overwhelming. Visitors and incoming students alike, found themselves surrounded by towering stone buildings without a clue as to where McBryde Hall was.

The Recruitment of Students Volunteer Program, R. S. V. P., existed to aid in the search for buildings on campus, answer questions about Tech and help with the many other problems that visitors might have encountered.

The group offered its tours of campus all year round, staying especially busy during freshman orientations and other visitor days throughout the year. Visitors just needed to call the visitor and information center or the undergraduate office to set up a tour.

Once on the tour, student tour guides walked with visitors all over campus, pointing out major sites like Burruss Hall, Newman Library, the dorms and other important buildings that might have been of interest. The tours came complete with historical information about Tech as an academic institute, as an athletic forum and as a school full of spirited students that frequented places both on and off campus.

R. S. V. P.’s tours of campus continued to provide an outlet for visitors to become better acquainted with every aspect of Tech and its student life. - Abby Legg
Courtney Beamon explains some of the finer aspects of Tech's campus and student life to visitors.
In order to recognize advisors of each organization, the awards ceremony included special awards for these men and women.
Leadership and Student Organization Programs, Buick and University Unions and Student Activities joined forces to honor student leaders at the University Student Leadership Awards Ceremony.

The awards recognized students for excellence in graduate and undergraduate student leadership, excellence in a student organization, extraordinary effort in advising, as well as volunteerism and contributions to the campus community.

Numerous awards were given during the course of the evening. Among those recognized, Marcey McCammon, president of the Residence Hall Federation, Noel Danielson, a member of the Panhellenic Council, Charles Ault, a retired professor and a member of the Newman Community, Carla Moravitz, president of the Golden Key National Honor Society, and Sharon Raucci, of Alpha Delta Pi sorority.

In addition to being rewarded for their service to the campus, some winners received shares of General Motors common stock.

The YMCA Student Programs, which has over 500 members, was recognized as the organization of the year. Lynn Nystrom was the advisor of the year for her work with the Collegiate Times, Engineer’s Forum and SEC. Winners were selected by committees made up of students and faculty. -Christina Jerzyk and Abby Legg

Students

After an entire year of working hard for an organization, students were rewarded for their time.
Free And United

Students unite to celebrate Freedom Fest with live music and arts

Freedom Fest sponsored by the National Organization for the Legalization of Marijuana Laws and the Free Your Mind Coalition, which consisted of Amnesty International, the NAACP, TREE, NRV-CARE, the Caribbean Student Association, the Asian-American Student Union, Womanspace and the Student Government Association, was an event for freedom, unity and the celebration of our diversities. Roughly 400 people gathered on Schultz Lawn to participate in the event.

Robb Jeffrey, president of NORML, said the purpose of the festival was to bring about peaceful change among different races and cultures through unity, and that the event was premised on the idea that freedom leads to diversity.

Jeffrey said NORML went into the project thinking that “it would be a large group of different people coming together and having a good time with no problems.”

“Freedom Fest is the kick-off day for Free Your Mind Week, the collaboration of diverse organizations on campus bringing light to social issues of importance,” said Ryan Nissim-Sabat, president of Amnesty International. “At Amnesty International, we want to stress the importance of treating all human beings equally. Too often on campus, we divide ourselves as people. Through Freedom Fest, we wanted to bring an opportunity to everybody to be united by the gift of music.”

The Afrikan Drum Ensemble, Yams From Outer Space, Egypt, Outside Help and Thrift Unit are a few of the bands that participated in the Freedom Fest activities.

The arts and crafts were pretty popular as well. One could buy anything from hemp book bags to carpets from Ecuador. Wood animals, jewelry and belts, all from Guatemala, were only part of the interesting vendors present. - LaTasha Williams

◆ Watching◆

The NORML Freedom Fest brought many students out to enjoy fabulous live music.
Vendor
Freedom Fest gave many vendors a chance to display some of their "mary jane" wear out for sale.

Band
Thrift Unit was among the live bands that performed at the fest.
Choices
Oftentimes candidates run unopposed, however, this year three platforms ran candidates for the SGA elections.

Volunteering
Circle K members volunteer their time to help administer the elections for SGA.
Elections ensure that organizations continue to enlist worthy leaders

Voting is a part of our democratic right. Most organizations, big and small, on campus hold elections and allow students to vote for those they feel will best serve the organization.

Surprisingly, there were many ways to hold elections. Smaller clubs, such as the Math Club held a "heads down, hands up" election to vote for the next year’s officers. Other larger organizations distributed ballots in which voters wrote the name of who they wanted in office. Still other organizations that were more campus wide, such as the SGA, held various election polling areas where voters placed a check mark beside the name of their choice for each office.

However, all of these election methods have pros and cons. Smaller elections often were not entirely private voting. Usually though in these clubs all of the candidates were known and most members were present at the meetings vote.

In larger organizations, again most of the candidates were known since names were hand written on the ballots. Unfortunately, not everyone votes. Campus wide elections attracted only a small proportion of the student body and they may not have known the candidates running for office. However, although voters may have been uninformed about candidates, every vote still counted. -Tonya Clark

◆Voting◆
Students stop outside McBryde Hall to vote for SGA elections. Candidates usually stood near voting tables in order to sway the voters at the last minute.
This presidential home was originally built in 1876 and is the second oldest building still standing on campus. However, it has now become part of Henderson Hall. This hall is now the home of the university infirmary, placement and counseling center. During the years, the faculty have strived to help their students and to break new grounds in their research. Without the dedication of the faculty and staff, the university wouldn’t be where it is today.
Despite changes in administration to budget strong cuts and a hiring freeze, the foundation faculty and staff continued to strive for excellence in their quality of students and their work.
RESIDENT ADVISORS TAKE CHARGE

In every situation, there must be a person in charge. So the residence halls have that certain person...the resident advisor, or RA for short. A RA was there to be in a peer-helper role, giving advice in both social, personal or academic areas. They were the designated person responsible to help residents live in a community. The RA's strived to make each hall a nice place to live and each person a vital member of that community.

RA's planned activities to achieve a livable environment. For example, West Ambler Johnston RA Sarah Larsen planned a day hiking trip to the Cascades for her hall. Some halls planned activities together with other halls, such as fine dining or group games.

The selection process for becoming an RA was very long. In the fall, students began the application process. After a series of interviews, group meetings and training sessions, the applicants were notified of their position in the spring. The students were selected for their leader potential skills and their focus on service to the university. One hundred and seventy RA's were chosen, along with 25 others who were selected for the head RA positions.

"RA's make the dorm a community to live and to be a member..."
Gail Kerby, Assistant Director

Orientation was a fun time for all the resident advisors to get to know each other. West Ambler Johnston staff serenade everyone.

By: Amy Archbold
Richard B. Talbot was the founder of the Virginia/Maryland college of Veterinary Medicine and a professor of veterinary medicine. He was described as a visionary, a leader, a family man of integrity, and a nice man by those who knew him.

Dr. Talbot was a pioneer in veterinary medicine across the country. He founded and became dean of the veterinary school. He was dedicated and worked hard, never giving up his dream. In 1984, he stepped down from the position and became a full professor.

Along with his activity within the university, he was involved in the community. He was President of Rotary Club and an active member of Blacksburg Presbyterian Church. He was currently serving as Editor-in-Chief of the Journal of Veterinary Medicine.

In what was called the deadliest accident of USAir in seven years, on September 8, 1994, Dr. Talbot was killed at age 61. The crash near Pittsburgh killed 132 people, including six Virginians.

Professor Talbot will be remembered by many. The mark he made on this university and other places is truly one to be admired.

THE JOYS OF LIFE

RELAXATION, FREE TIME AND FUN...

Who has time for it? In today's busy world, people spent most of their time working hard at their jobs and other responsibilities. Every once in a while, we had to take time out for a break and a mind refresher. Students and faculty alike needed the chance for free time. However, usually the free-time activities were sometimes different from student to faculty. On most weekends, you would see a student "party till you drop" or studying hard. On the other hand, faculty members had responsibilities and their activities would revolve around that.

President Torgersen enjoyed his free time very much. He was an avid tennis player, as well as a big football fan...especially a Hokie fan. But President Torgersen was not all sports. When he traveled, he read a lot. He felt that you "need to get a break, clear your mind of work on occasion, and physical exercise is important." Just as likely as seeing the President at a sporting event, one could find Senior Vice President and Provost Wayland Winstead cruising the highways or back-roads on his motorcycle. He also enjoyed playing bridge, cooking, and reading. "It is essential to have a life outside work," explained Winstead.

By: Amy Archbold
Leisure was important to everyone. President Torgersen stops for a minute to contemplate his next activity.

Striving to improve the services in the university, Vice-President Raymond Smoot does some paperwork.

Trying to finish some paperwork, Vice President Thomas Goodale continues to work hard.
The business world was ever-changing. Dean Sorenson, College of Business, keeps students and faculty informed.

Dean Meszaros, College of Human Resources, works hard to ensure that her work was the best that it could be.

Gregory N. Brown, Dean of the College of Forestry and Wildlife Resources valued commitment to quality teaching.

Keeping up with current findings was imperative to stay on top of things. Dean Eyre read to continue learning.
Virginia Tech had a large group of professors, faculty and staff that were dedicated to making the educational experience the very best that it could be for every student that studied here. The wide range of activities that faculty members supported was incredible; activities such as social clubs and sports to tutoring and other academics. And in the midst of it all, they continued to make every opportunity open to any student that was willing to put in the extra effort.

Every day as we saw thousands of students walking to and from classes, we found evidence that someone cared enough about them to go the extra mile and give them the best education possible. The campus was clean, programs ran smoothly, and to some, students were more than just a number in this large university. Without their support, the students would have lacked the much needed guidance to begin to step out into the real world. The students could not have made their mark on society or the future if they had not had the dedication of the faculty and staff at Virginia Tech.

*By: Amy Archbold*
There were over 1500 professors at Virginia Tech, and the average undergraduate was able to work with about 40 of them.

Sometimes, a relationship with a professor extended outside the classroom. The professor moved beyond the role of instructor, to that of confidant and friend.

What exactly was involved with being a professor? Certainly much more than planning lessons, preparing lectures, and grading assignments. Professors strove to keep a high level of interest and to stimulate ideas in their students. They worked to go beyond merely explaining a concept to creating an understanding.

A professor's responsibilities did not end on campus. Outside of the classroom, professors spent the majority of their time doing research, writing papers, and attending conferences and meetings. It was obviously a demanding profession, but, to most, a richly rewarding one as well, said Dr. Clayton, a business professor.

"Professorship is a very demanding profession, but richly rewarding as well."
Dr. Clayton, business

By: Amy Simmons
During office hours, math Professor Eileen Shugart tutors Mike Roche, a sophomore in building construction.

Experiments are important in research. Dr. Glenn Holmes explains one experiment to a psychology class.

Some classes are taught in a “hands-on” environment. In the computer lab, Dr. Edward Clayton looks on as his management science class figures out how to complete the assignment.

Classes in McBryde 100 are typically large lectures. John Anderson lectures in Accounting 1504, a required freshman business course.
One responsibility of being a TA was the extra paperwork. Elizabeth Ruck grades papers for her math class.

A chemistry laboratory teacher's assistant helps a student with an experiment they are conducting.

Janice Little, a graduate student, enjoys the experience she is getting by teaching at Virginia Tech.
One of the obligations of most graduate students was to serve as a teaching assistant, or TA. Some TA's graded papers or held office hours, while others taught classes as well as graded papers and held office hours.

Depending on the TA, some enjoyed the experience of teaching while others did not. Most agreed though that they learned the material much more thoroughly after they had to explain it to others.

Those TA's who wanted to eventually teach were able to get first hand experience. One TA was already a junior high teacher that was pursuing a higher degree. She liked teaching at the college level because she "didn't have to worry about discipline, and the students were very enthusiastic." Being a TA really helped one to decide if teaching could really be a career. Others looked at it as an obligation, one that was required for graduation and nothing else. Elizabeth Ruck, a math TA, said, "It's a part of being a graduate student, but I might like to teach later. For now, it's an obligation."

"Teaching is a rewarding part of being a graduate student."

Elizabeth Ruck, Math

By: Tonya Clark
Students, professors and classrooms were what usually came to mind when most people thought of college. But what about the people who helped keep the establishment running smoothly every day?

The Virginia Tech staff, were all the people who cooked for the students, delivered the mail, and kept our "homes" clean, just to name a few.

These individuals worked long hours just like everyone else.

Ron Marshall, supervisor at Owen’s Food Court, worked 40 hours a week and enjoyed every moment of it. “The best part of working here for me is the challenge of providing quick and efficient service every day. I also get to work and meet with fascinating people,” he said. Marshall enjoyed serving the students because he liked to help out as much as possible.

Similarly, Patricia Saunders of the Virginia Tech mail room said she enjoyed her job because it was a pleasure to see the students’ faces light up when she handed them their packages across the counter.

Mondays and Fridays were the busiest, she said, with up to 800 packages to process.

By: Jennifer Norris
The Squires information desk was a hub of activity. Freshman James Torbin returns his key for a practice room to Marcy Vaughn.

To keep everything clean outside the library, Warren Lipes from housekeeping, sweeps the stairs.

Leslie Collier, trade book-buyer, enjoys the responsibility of choosing which books the University Bookstore sells.

The university setting was ideal for Sharon Holmes. The helpful students and her co-workers made a difference in her job.
With over 21,000 students Building here, we managed to learn a not only from books but also foundation how to deal with new people and situations, which would help us in years to come.
Since the beginning, we have strived to learn not only the academic side of life but the part that only college could teach us. From participating with hypnotist, Tom Deluca, to hanging out with friends and doing homework, by the time May came around we were prepared to face another academic year or to face the "real world." The first women graduates in 1925 help to exemplify how we continued to challenge the norms of life and stand up to the difficulties.

The neatly manicured VT bushes welcomed new students as well as visitors, as they enter Tech's Campus. For many students, this was one of their first memories of Virginia Tech.
Hokie fans could be spotted all over Virginia. Some flew VT flags on their way to sporting events and others wore Tech apparel to show their spirit. Alumni could be spotted wearing the burgandy and orange colors of their alma mater. At football games, the Hokie Bird and cheerleaders were often the center of attention, especially when the team scored a touchdown! Fans cheered the Hokie Bird on as he lifted his hefty barbell for every point we have scored. Often a distinctive gobble could be heard over the loudspeaker to help pump up that Hokie pride and further raise spirits. The cheerleaders chanted and started “The Wave.” The band played the school song, and of course everyone’s favorite dance, the Hokie Pokie. Greek fraternities and sororities could always be seen at the football games cheering on the Hokies.

Look! It's the Hokie Bird! The Hokie Bird helped to boost spirits at sporting events. He was often passed up and down the bleachers in Lane Stadium during football games and lead everyone's favorite dance, the "Hokie Pokie."
So, you have your college degree. But what comes next after the graduation ceremonies and celebrations? It's time to enter the "Real World", the mystical realm that parents and professors have been carrying on about forever. Some graduates will continue their studies in graduate school, and some lucky grads will already have jobs lined up. Of course, there are some grads who try to stay out of the workforce for just a couple of weeks longer by taking trips to Europe or even just Florida for a last farewell party with their friends. However, some are left faced with the daunting prospect of finding a job... yikes! Internships, resumes, and interviews are all steps eventually taken by everyone, toward that rewarding, well-paying career. Hopefully, with all the knowledge and insight gained in college, graduates will be prepared to join the elite workforce. If not, there's always McDonald's.

By: Amy Simmons
Lane Stadium, seating over 50,000 fans, was not only a place to cheer the Hokies on to victory, but was a place for social gathering. Greeks as well as other organizations, often opted for block seating so everyone could sit together.
Today's forecast: mostly cloudy with a good chance of showers. Sound familiar? Bleaksburg, err...Blacksburg, as many students called it, had to become accustomed to cold, gloomy, gray weather. Sometimes, the sky was clear and blue in the morning, but by the afternoon it was gray with impending showers. You could never trust the weatherman for an accurate forecast! However, this gloomy atmosphere didn’t bring Tech students down. They just bundled up and packed an umbrella; an essential accessory for every back pack! The sun did sometimes make a surprise appearance, and these beautiful days were celebrated with a variety of outdoor activities from hiking and jogging, to playing frisbee by the duckpond. During the spring and summer months, many people were found sunning themselves outside their dorms or apartments. The usually chilly weather just made the sunny days more welcome. By: Amy Simmons

The sun is shining, the birds are singing...This was much welcomed weather by the students and residents of Blacksburg. Many students called the area "Bleaksburg," because of the often rainy weather.
Nothing lasts forever except memories. As college offers many opportunities for fun, it is true that many will look back on the years spent at Virginia Tech as some of the best years of their lives. When asked what seniors will miss most after graduation, the common answer was the great friends they have made. College isn’t just a place to get an education, it’s a place to make special friends which are irreplaceable, especially those made your freshman year. True friends are hard to come by. You were especially lucky when you realized you can laugh, cry, be silly, serious, strong or weak with them. Seniors say they will miss hanging out downtown, football games (and tailgates!), late night talks and late night snack runs, spring break getaways, and parties, just to name a few. Although graduates will disperse all over the country and in many cases the world, most plan to keep in touch with their VT friends for years to come. By: Jennifer Norris

This group of friends enjoys just hanging out together. Groups of friends could be seen on nice afternoons playing football, frisbee, or just hanging out around town. Most people will keep in touch with their college friends for years to come.
There are not many students remaining at Virginia Tech who have ventured through the doors of the Lyric Theatre. Virginia Tech used the old theater while Squires Student Center was being renovated. It is hard to forget the old, yellow theatre seats creaking, as co-eds piled into a class there, or the lines of students standing down College Avenue waiting to get into a VTU sponsored Friday night movie. Originally built in the 1930's, the theatre was a center for entertainment in Blacksburg. The Spring of 1991 was the last semester Tech had a use for the space. Once the renovation of Squires was completed, the university no longer held activities there. The Lyric has stood empty for the past 4 years, except for its use as a local Democratic Headquarters. There was currently a committee of townspeople, faculty, and a couple of interior design students, dedicated to restoring the Lyric Theatre.

400 Seniors
The Lyric Theater, built in the early 1900's, is located on College Avenue. As of the fall of 1994, there was a committee dedicated to restoring the once prosperous theatre to its original form.
With 8:00 classes and only 10-15 minutes between each class, students used a variety of methods to get around campus. Some relied on the bus, others biked, some roller bladed, and some walked. During the spring, summer, and fall months, most students were out biking or walking to soak up the sun’s rays and enjoying the warm weather. During the cold winter months of classes, the bus service received much more use. Some students rode across the Drill Field rather than brave the wind chill. Of course, there were still those few who biked or bladed. After a snowfall one may have walked to enjoy the winter wonderland, but most hurried from building to building bundled in hats, scarves, and gloves. Thoughts on these arctic days consisted mainly of “How many days until spring?!” Whatever your mode of transportation, the important thing was that you get to that next class before the professor hands out the test. 404 Seniors
The Duckpond was a favorite spot among many students. In recent months, several improvements were made such as, adding new decking and picnic tables. It was a great place to take a walk or just to sit and think.
Making ends meet...
With the rising cost of college, many students took out loans or applied for scholarships. Others took matters in their own hands and went out to find part time jobs. The jobs these students found, vary as much as the students themselves. Some chose to deliver pizza, while others found positions within Tech itself. Most students didn’t care what they did as long as it pays. Many students were lucky enough to find jobs that didn’t interfere with their studies. But for most, there was always that day when studying for a test becomes a priority over the extra money. Some students were fortunate enough to have bosses who were understanding and flexible. And for those who didn’t, there was always the infamous “call in sick.” It didn’t matter how the money came in, just as long as it did. Some say it built character; others just wanted to make ends meet (or have some extra cash for a beer now and then). By: James Wood

The Balcony was a favorite place to go on Thursday nights and Friday afternoons for dime beers. It was especially nice in the late spring and summer months when the weather was warm, because people could hang out on the deck.
What was your first impression of Tech? Was it the neatly manicured VT bushes on Southgate Drive? Or was it the overwhelming size of the campus? For many seniors, it was their freshman year roommate and dorm, as well as the larger landmarks of campus such as the coliseum and Lane Stadium. One senior recalled the pranks he and his hallmates played on each other in "Major Bill," now faculty office space. "We used to fill plastic bags with shaving cream and stick the end under the door. Then we would drop a book on the bag and wait for the angry yell that followed!" Other seniors recall professors who made a lasting impression. "I didn't know how I was going to like the large classes, but I found that most professors were pretty cool. I made it to graduation!" said another senior. All graduates had their own first impressions that they will recall for years to come, and their own suggestions for surviving 4 or 5 years of college. By: Adrienne Conte

The Grove, located near the Duckpond, was home to the President of the university. Before the current house was built, the President’s home was located in part of what is now Henderson Hall.
Southwest Virginia offered many outdoor activities and getaways. When seniors were asked their favorite places to go to get away from the hustle and bustle of classes, many different answers were given. The Cascades was a popular answer. "It is always fun to go swimming under the falls after the long hike to the top," said one senior. Others preferred the more challenging hike offered at Dragon's Tooth. Tech Recreational Sports offered rental of camping equipment for those students who wanted to take a weekend trip. They offered tents, sleeping bags, cooking utensils, and even fishing equipment. For those avid mountain bikers, Brush Mountain trail was nearby and there were some hidden trails just beyond Mountain Lake. Of course, for the busier students, the Duckpond and Tech's golf course were close, but far away enough to take a break from a demanding course load or just to enjoy the outdoors. By: Adrienne Conte

416 Seniors
When the weather permitted, Mountain Lake was a popular spot to go on weekends. It was best known for the movie *Dirty Dancing*, filmed in the 1980's. The decks overlooking the lake were a great spot to eat a picnic lunch.
The Alumni Hall, which at one time was the Faculty Center, was built in 1935 to house faculty and contain a public dining room. The facility was closed in 1965 for renovation into the wing of the Donaldson Brown Continuing Education Center. In 1984 the staff of the Alumni Association moved into the first floor of the original Faculty Center. One of the functions of the Alumni Association was to produce a yearly Bugle Update for 50 year reunions.
Here we find not only the people pictured in *The present Bugle*, but the people who made this yearbook possible by carrying on the 100 year past. old tradition of excellence.

GET RECOGNITION ON CAMPUS.
(WITHOUT WAITING UNTIL SENIOR YEAR.)

- **Start a Greek chapter.**
  Why submit to housecleaning and the elephant walk when you can be a founder?

- **Champion a cause.**
  Focus on something most people take for granted like field mice or saturated fats.

- **Dress unusually.**
  Recent retro styles are too obvious. Try genie shoes and a fez, instead.

- **Enter poetry competitions.**
  Sonnets about lost love, sunflowers and the space under staircases tend to win.

- **Get a Citibank Photocard.**
  With your picture on your card, you’ll be recognized everywhere. As will fraudulent users.

WE’RE LOOKING OUT FOR YOU™
To apply, call 1-800-CITIBANK.
Some people get it. And some people don’t. If you’re ready for a card that gives you the financial freedom to express yourself the way you want, you’re ready for the Card. (And the Continental Travel Certificates aren’t bad either.) Apply now.

TO APPLY FOR THE AMERICAN EXPRESS® CARD, CALL 1 800-942-AMEX, EXT. 4100.
Our hats are off to you.

Congratulations. We’re glad to be with you at this special occasion... and so many other occasions you might not be aware of.

Did you know that the average aircraft has 60 AlliedSignal components aboard, ranging from automatic pilots to climate control systems? Our Bendix® brakes, FRAM® filters and Autolite® spark plugs are among the world’s leading automotive brands. And our carpet fibers, refrigerants and fabrics add comfort to your life.

Our 85,000 employees in 40 countries would like you to know more about us. Write AlliedSignal Inc., P.O. Box 2245, Morristown, New Jersey 07962.

AlliedSignal
At Westvaco, we strive to be different. What about you?

To work for Westvaco, you need to think about what it takes to apply technology in different ways. For us, it's an imaginative focus on research and the drive to create innovative products and services that others in our field find difficult to match. We have a well-defined strategy that has made us a major producer of paper, packaging and specialty chemicals, an industry leader in obtaining patents and a Fortune 200 company. We have over 14,000 employees worldwide, markets in 70 countries and annual sales exceeding $2 billion. That is just part of the difference that could make Westvaco an exciting opportunity for technically-oriented students. Would you like to know more about the Westvaco difference? Contact Rebecca Strong, Personnel Administrator, Westvaco Corporation, Bleached Board Division, 104 East Riverside Street, Covington, Virginia, 24426.

If you think the tests in college are tough, wait until your first job interview. Last year, America’s businesses lost $60 billion to drugs.

So this year, most of the Fortune 500 will be administering drug tests. Failing the test means you won’t be considered for employment.

After all, if you’re into drugs, how smart can you be.

WE’RE PUTTING DRUGS OUT OF BUSINESS.

Partnership for a Drug-Free America
TURN CLASSROOM ACHIEVEMENT INTO WORLD CLASS CHALLENGE!

As one of the world's leading contenders in the tire industry, Michelin is dedicated to one goal: create and deliver the best to the customer. Clearly, it's what sets us apart in our competitive industry. But Michelin quality doesn't just happen. It comes as a result of hard work, unyielding standards, and commitment to innovation.

It also comes from selecting, developing and rewarding the finest technical talent available. And that's where your hard-earned academic accomplishments can pay off. If you've already proven yourself as a quality-minded individual, by seizing every challenge and making every effort to outperform your personal best, Michelin could provide you with the ideal base on which to build a future.

Be part of our world class challenge. We have plenty to do: in further development of advanced technologies, in manufacturing systems design, in actual production, in research, and much more...projects that will stretch your imagination and expand your knowledge.

Sound interesting? Then be sure to see your college placement office for details!

Or write to:
Michelin Tire Corporation
P.O. Box 19001
Greenville, SC 29602-9001

MICHELIN
PUTTING CAREERS IN MOTION.
An Equal Opportunity Employer.
Congratulations, you’ve made your dream come true.

After all the late nights and early mornings, and all the parties skipped because of anatomy, biochemistry and pharmacology finals, you’re going to be a veterinarian. Before your new challenges begin, pause a while to revel in your achievement.

When you do set out in practice, keep in mind that Pfizer will be there for you every step of the way. With animal health products that meet the needs of today’s veterinarian. Backed by sales force and technical service assistance, product usage updates and client meeting materials that add value to the service you provide.

So even if your “Yorkshire dales” are in Albuquerque, New Mexico, or Canton, New York, Pfizer will help you write one success story after another.

Pfizer Animal Health
AT THIS POINT, YOUR ALMA MATER DOESN'T MATTER.

There's one exam even the best of colleges can't prepare you for.
Last year alone, America's businesses lost more than $60 billion to drugs.
So this year, most of the Fortune 500 will be administering drug tests. Failing the test means you won't be considered for employment.
And that's a matter of fact.

WE'RE PUTTING DRUGS OUT OF BUSINESS.
Partnership for a Drug-Free America
Have you ever dreamed of building the impossible?
At AT&T, you will.

It could be the world's first optical computer or a practical use for superconductors. If you have the kind of innovative thinking to turn the ordinary into the extraordinary, you're just what we're looking for. We need people with the kind of remarkable ideas that will help keep us a leader in the high tech global market.

Your thinking could be applied at AT&T Bell Laboratories, where we've pioneered discoveries like the laser, the solar cell, and the Hobbit chip—the heart of our new hand-held personal digital communicators. Or implementing technologies such as robotics. We offer a diverse range of career challenges, from Sales and Marketing to Research and Development.

If you're a college student with the kind of mind power to help structure a technological revolution, at AT&T, you will. Arrange an interview through your career placement center. Or, send your resume to AT&T, 100 Southgate Parkway, Box 100, 1st floor, Morristown, N.J. 07966.
"Human energy is the primary resource of the organization. Tapping into it, unleashing it, focusing it, perpetuating it—these form the cornerstone of the future."

And Corning, committed to the future, and a recognized world leader in technology - provides a continuing opportunity for human energy to achieve its maximum potential - in an environment that nurtures talent, creativity, and ambition.

Whether your interest is in Consumer and Industrial Markets, Health and Science, or Electronics and Telecommunications – there is a lifetime of opportunity for you at Corning.

If you’re interested in making a long-term contribution—if you’re interested in helping to define and shape the Future—we invite you to join the Corning Team—Corning is committed to the Future!

ICI Americas is a Delaware corporation of about 7,000 employees, with annual sales exceeding $1.5 billion. The company's products serve almost every major industry and include a broad line of pharmaceuticals, agricultural chemicals, plastics, polyesterfilms, petrochemicals, specialty chemicals, dyes and textile chemicals, security devices, aerospace components, electronics, fibers, and advanced materials.

ICI Americas Inc. conducts an extensive nationwide recruiting program through various college and university placement offices. Although applications are considered on a year-round basis, a significant portion of the hiring of college graduates in any given year occurs before July 1. If a corporate representative does not visit a particular campus, students are advised to direct all correspondence to the address above.

AN EQUAL OPPORTUNITY EMPLOYER M/F
Our People Are Our Greatest Resource

As the largest US supplier of power transmission and distribution equipment, ABB Power T&D Company can attribute its success to the quality of its people. Those people got their starts at institutions like Virginia Tech.

With 23 domestic manufacturing facilities and more than 50 sales offices across the country, students in Electrical, Mechanical and Industrial Engineering can establish careers in marketing, sales and manufacturing operations. As part of the ABB Group, headquartered in Zurich, Switzerland, you’ll be part of the world’s strongest electro-technical company and one of over 206,000 employees worldwide.

If you’re the resource we’re looking for, see your placement counselor for details.

Physical and Life Sciences, Engineering Professionals and Future Graduates:

In A Challenging Career
As A Patent Examiner

We invite applications from professionals and future graduates in the following areas of specialization:
- Engineers - Aeronautical, Agricultural, Biomedical, Ceramic, Chemical, Civil, Computer, Electrical, Engineering Physics, General, Industrial, Mechanical, Metallurgical, Nuclear, Petroleum, Polymer Science.
- Life Sciences - Biochemistry, Biology, Biomedical, Biotechnology, Botany, Horticulture, Microbiology, Pharmacology.
- Physical Sciences - Chemistry, Physics, Design - Art, Architecture, and Graphics.
- Textile Technology.

For more information call (703) 305-8231.
Send your resume or SF-171 to:
U.S. Patent and Trademark Office
P.O. Box 171
Washington, DC 20231

U.S. Citizenship required for employment.
An equal opportunity employer.

PARTY ANIMAL!

Choose From
- Bubble machines
- Decorative fountains
- Mirror balls
- Strobe lights
- Helium balloons
- Patio lights
- Gazebo
- Dance floors
- Popcorn machines
- Theme party decorations

FIGHT
CRIME
Unisys Federal Systems in Reston,
Virginia is addressing the growing
field of information systems servicing
the law enforcement, criminal justice
and public safety industry. As this
practice grows, we are in need of
experienced software professionals
who have a BSEE/CE/CS with class­
room experience and three or more
of the following skills:
• UNIX, C, C++, Visual Basic
• ORACLE, INFORMIX, Ingres, Sybase
• Requirements Analysis
• Information Modeling
• DOS Windows
• PowerBuilder
• Client-Server Architecture
• Database Administration &
  Systems Administration Skills
• Fingerprint Identification
  Operations
• Law Enforcement/Criminal
  Justice Applications

Unisys offers a full line of employee
benefits, including paid tuition
reimbursement and extensive after­
hours software education courses. If you
have the requisite skills, you are urged
to fax resumes to (703) 620-7834
or by mail to:
Unisys Corporation
Attn: Staffing/BLN
12010 Sunrise Valley Drive
Reston, Virginia 22091

An equal opportunity/affirmative action
employer, committed to workforce
diversity.

UNISYS
The Bugle wants to give a special thank you to Thornton Studio, Scholastic Advertising and Taylor Publishing for all their help this past year.

Thank You

SPPS
Thanks to all the photographers who submitted photos to make this book possible. Thanks especially to Kevin and Lina who made sure I had everything I needed.

Special Collections
Thanks for helping me find all the old photos that I needed to put on the dividers.

Liz Crumbley
Thank you for always being there to listen and for always giving such great advice! Also, thank you for supporting me and for giving the Bugle the freedom to evolve and grow!
Well, here I am, still in the office trying to finish the last deadline! I really don’t know what to say. This year was a good one, full of surprises - both bad and good. But overall it was a fun year that holds lots of memories.

However, this Bugle wouldn’t have made it if it were not for my staff and the others behind the scenes. First, I want to thank Adam for putting up with me. You really came through for me when I needed something done and I really appreciate all the help you gave to me when there was a deadline. You went above and beyond your job and that meant a lot to me.

Next I want to thank my staff for all the hard work they put into this edition. Everyone did a great job and always came through for me!

Stacey, even though you left for a more lucrative job, thanks for the advice and for listening to me bitch when I was stressed and tired.

Kevin, thank you so much for everything you did this year. I believe that you have been one of the best photo editors that has been around in a long time.

The last two people were not on the staff but were always there when I needed them. First there is Ben, who seemed to enjoy hanging out in our office more than his own, but was always there move old Bugles or fill out job stickers! Finally, I want to thank Rick for always being there when I needed someone to take my stress out on. But also for helping me finish my deadlines and for alphabetizing endless amounts of cards! I really appreciate your understanding of my job, even when the hours were long.

Well, now that the year is over and this 100th edition is almost done, it is sad to see it go. But I want to wish everyone on the staff good luck in their future college careers and I hope to see all of you back next year!

And since I am coming back next year, hopefully I won’t make quite as many mistakes (as you’ll will see when you look through the book), and I’ll save all my sentimentality for next year.

Thanks again for all the hard work everyone put into this book.

-Jennifer C. Dye
Editor in Chief, 1995 Bugle

The Bugle, the yearbook of Virginia Tech, was published as an annual production by the Student Media Board of Virginia Polytechnic Institute and State University. The Bugle office was located at 364 Squires Student Center, Blacksburg, VA 24060-0546, (703) 231-9851.

Volume 98 of the Bugle copyright 1995 by the Student Media Board of VPI & SU. All rights reserved. No part of this publication may be reproduced without the written permission of the current editor in chief.

This edition was printed by the Taylor Publishing Company, 1550 West Mockingbird Lane, Dallas, Texas, 75235, (800)677-2800. Our publishing representative was Lelia Crabtree.

This edition sold for advance purchase only for $37. All funds for the production and operation of the Bugle were generated through the sale of yearbooks, advertisements and student portraits.

The cover material was Blue 452 with a Cordova grain. The book was Smyth sewn with rounded spine and headbands. The endsheets were tan parchment stock with 9512H ink.

The pages of the book were printed on 80-pound Enamel.

The cover and spine were designed by Jennifer Dye and Stacey Linger.

Information for the Varsity Sports section was received compliments of Sports Information Office. The dividers pictures were compliments of Special Collections. Advertisements were provided by Scholastic Advertising, Lilburn, Georgia, 1-800-964-0722.

All layouts were designed by the student staff. All layouts were created on Quark Xpress version 3.1. All layouts were submitted camera ready.

All photographs, except for student portraits and various other photos, were taken and developed by Student Publications Photo Staff (SPPS), a member organization of the Student Media Board of VPI& SU. Portrait photography was provided by Thornton Studio photographers. Black and white photos were submitted to Taylor where they were laser scanned and enlarged/reduced to specifications. Color negatives were enlarged by both the SPPS and Thornton Studio, 40 West 25th Street, New York, N.Y., 10010. Color prints were submitted 100% to Taylor. The Bugle contained 80 pages of four-color process.

The body copy throughout the book was 12 point Palatino Roman, captions were 10 point Times Bold, photo credits were 7 point Berkeley Book Italic and folio tabs were 14 point Goudy Italic.

The opinions expressed in this volume were those of the authors and do not necessarily reflect those of the administration, faculty, staff or students of VPI & SU.
After it was known that the Men's Basketball team won the NIT with the score of 65-64, students left their apartments and flocked to downtown Blacksburg to celebrate. The police closed off the streets, as the students crowded around enjoying the moment. This was the first time the Tech basketball team has won the NIT since 1973.

We came here to Virginia Tech to learn, to make new friends, to have new adventures and to hopefully come out in the end with not just a diploma in hand but with also many fond memories and a good future ahead of us.

It was never easy to say goodbye. For some of us we were coming back next year, if not to finish our undergraduate work but to begin our graduate work. But for others of us who were heading off into the working world it somehow seemed harder. This was the moment that we had been waiting for, but when push came to shove it was scarier than we thought it would be.

So before we left Blacksburg, next time to return as alumni, we went to our old hangouts one last time, had dinner with friends, took pictures of familiar places and packed all of our belongings from the past four or more
Continued from page 457

years into our cars. But more importantly we looked back and remembered everything that had happened this past year.

We remember the constant construction as Major Bill was being turned into offices and the remodeling of the Drillfield which made it harder to drive around. We remember going to the Gator Bowl to sadly watch the football team lose the game in their second bowl bid. We also remember the feeling of excitement after the basketball team beat Marquette in the NIT. However, we also

Continued on page 461
Jason Monk, a senior in biology, and Alan Davis, a fourth year architect student, take advantage of the warm weather and spare time during exams to cook outside.

Donald August and Tim Crimal participate in the games at Senior Celebration, which was held before graduation.
remember the harder times. We remember
the ever constant budget cuts to higher
education and the state freeze the governor
put on public jobs. But we also remember
how the students fought back and with the
help of the SGA wrote, called, and faxed their
representatives to inform them of
our opinions.

But let's not forget what was
most important to remember this
year - the 100th anniversary of The
Bugle. Without this yearbook being
around it would be very hard to
remember your college career
twenty years

weather by studying outside.
Male and female students
alike were seen sunbathing
around campus.
Continued from page 461

from now. Through this yearbook we have tried to represent the good and bad times of student life, the ups and downs of varsity and club sports, the hundreds of student organizations and the daily goings on of the Corps, students and faculty. We have tried to capture all the traditions of the year by keeping up with one very important tradition - this yearbook. But it does not end here. The Bugle will hopefully be around for another hundred years and will continue to carry on the traditions of not only itself but of the university and students.

During the springtime, Blacksburg was often warm enough for students to start staying outdoors more. One could often find students sunbathing, studying outside, playing volleyball or other sports, or just enjoying the warm weather. This sunset was typically seen during the spring months.
The cyclists bike past Burruss Hall during the Tour DuPont. Lance Armstrong won the stage that ended on The Mall on campus.

Students hurry on their way to class. By the end of the semester it became harder and harder to make it to every class on time.
Just as at the beginning we evolved from 1895 to 1995, we will again evolve as we face the future and what it holds for us, but we will always continue to carry on the traditions that have made us who we are.
100 Years of Excellence
